US officials said the United

Arterican anti-satellite weapon (Scheduled for November) would have already taken place. The President made clear however, that the United States

would continue to insist on the right to raise nuclear missiles at the proposed talks. He emphasized that any agreement "must logically depend upon our bility to get the competition in offensive arms under control and to achieve genuine stability at substantially lower levels of nuclear arms".

Listening to the President in the hall of the General Assembly was Mr Andrei Gromyko, the Soviet Foreign Minister, who pointedly failed to join in the applause when Mr Reagan declared that "there is no same alternative to acceptance of the control of the contro alternative to negotiations on arms control".

The President met Mr Gro-

myko briefly at a reception here on Sunday night, and is to hold talks with him at the White-House on Friday - the first substantive meeting he has had with a senior Soviet official

with a senior Soviet official since coming to office.
Yesterday's speech was note-worthy as much for its tone as for its content. There was none of the tough anti-Soviet rhetoric which had characterized the Persident's earlier statements. President's earlier statements on US-Soviet relations.

This time he avoided casti-gating the Soviet Union or is allies, even in the sections of his speech dealing with human rights or Aighanistan. The one note of criticism in the 40-

Pound holds steady in nervous markets

By David Smith, Economics Correspondent

The youngest daughter of the Australian Prime Minister Mr Foreign exchange dealers said market conditions remained Bob Hawke, is a heroin addict and has shortened life expectancy, it was revealed last night. nervous, and that another bout of dollar strength could not be

Minister's wife.

She said on a Sydney commercial television channel that Mrs Rosslyn Dillon, aged 23, and her husband Matthew A strong rise by the German mark also pushed the pound's average value down. The Sterling Exchange Rate Index was down 0.2 points on the day are both addicts. They were

buth undergoing a rehabili-tation programme. They have an 18 month old son. Sterling opened in London at \$1.2585, up 1.1 cents on Mrs Hawke's revelation goes Friday's London close. Apart from a dip at lunchtime to \$1.2495, before weakening to some way to explain why Mr Bub Hawke broke down and kept at a televised press

ruled out.

\$1,2460. Later, in New York, sterling dropped to \$1,2435. The Sterling Exchange Rate conference in Canberra last Thursday when questioned about attacks by Mr Andrew Index hit a low of 76.6 at noon, when the German mark was at its strongest before closing in Peacock, the leader of the Opposition, suggesting that he was "soft" on organized crime and about a court case involv-

The day was again dominated by intervention in the currency markets by the West German Bundesbank. After Friday's \$450m (£360m) intervention against the dollar, the Bundesbank is believed to have sold \$150-\$200m yesterday morn-

At one stage, this inter-vention succeeded in pushing the dollar below three marks, at DM2.9750. The dollar later recovered to DM3.0225. The Bank of England did not

intervene in markets on ster-ling's behald, dealers said. Sterling dropped from DM3.8150 to DM3.7690 as a result of the German currency's strength. Dealers also reported

Sterling, up by more than a cent against the dollar at one stage yesterday, finished the day down 0.15 cents at \$1.2460. Colliery Overmen, Deputies ling because of the strike ballot and Shotfirers (Nacods), which could close down all Britain's

coal mines.
The general ecaction dealers and currency analysis to the highly volatile markets of the past few days is that the factors that have made the dollar strong still remain.

The ¹4 point cut in prime rate y the US bank Morgan Guaranty on Friday, reducing the rate from 13 to 123 per cent. has not been followed by other banks.

The third quarter "flash" estimate for US gross national product, showing growth slow-ing to an annual rate of 3.6 per cent. is according to some US conomists, likely to be followed by a fourth quarter growth surge. This could again prevent any significant early reduction in US interest rates.

At one stage yesterday, when sterling was trading at \$1,2585, money market rates eased and some traders were talking of the possibility of a small reduction in British base rates from their current 10.5 per cent level.

In New York markets opened nervously, waiting for clarification of American policy on exchange rate intervention from Mr Donald Regan, the US Treasury Secretary, at the meetings of the International Monetary Fund and the World

Bank in Washington. IMF forecast, page 21 Kenneth Fleet, page 21

councils

Whitehall leak

Labour deprived of £50m

By Richard Evans

Labour-controlled councils of more than £50m in housing cash, according to a confiden-tial Department of the Environ-

ment memorandum.

The internal document was leaked to Dr John Cunning-ham, Shadow Secretary of State for the Environment, who released it yesterday. It quotes Sir George Young a innior environment minister, 25 saying the apparent mistake involving the Greater London Council, the Hackney, Leicester and Liverpool councils is

"political dynamite".

Sir George adds that the evidence "seems to confirm that the department has been unfair" to the four authorities, three of which have also been rate-capped by the Govern-

ment.
The disclosure of the memorandum, dated May 2, from Mr
Trevor Beattie, private secretary to Sir George, to Mr P.
F. Owen of the department's
Local Government Finance
Directorate, will prove a double embarrassment to the govern-

ment.
Not only is it the latest in a growing line of "leaks" of confidential Whitehall documents, but the information it contains will be seized upon by the Opposition MPs to prove that the Government is deliber-

Labour councils.

Last night leaders of Hackney Council in east London chained that if the Government had not made the mistake they would not have been rate-cap

The Department of Environment confirmed that the memorandum was geniune. An Investigation is almost certain to be set up to try to find the "mole" who sent the document to Dr Conningham. The memorandum, which

deals with the complicated system for allocating govern-ment grants to council housing ment grants to council housing budgets, refers to a draft paper which shows the system has apparently deprived the four-councils of millions of pounds. Hachney, which issued an ansuccessful High Court chal-

lenge to the Government in March over a cut in its total spending, is said to have lost £9m, Leicester £7m, the GLC £32m and Liverpool £3m. la a letter sent yesterday to

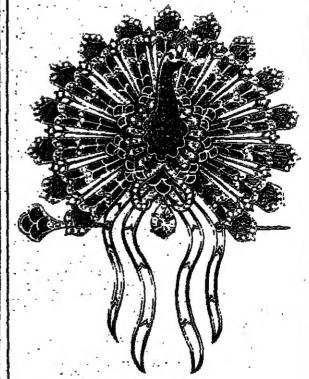

Mr Patrick Jenkin, Secretary of State for the Environment, Di Cunningham said that the leak shows many millions of pounds have been removed from hard-pressed inner city housing authorities.

Mr Kenneth Livingstone, leader of the GLC, said last night: "The government is placed."

clearly covering up a major scandal. The GLC is taking immediate legal action to see what restitution it can get." Dalyell defence, page

Walker replies to bishop

Mrs M

rou have preached that the miners must not be "defeated". But directed a great deal of environmento defeat them. You imply that it is Mr MacGregor and the Government. Such an implication has a supermonated at the present time. It was for this reason that I directed a great deal of environmental and economic aid to the Northeast between 1970 and 1974 – new roads, new homes and new factories. Such an implication has no justification whatsoever.

We have never tried to defeat the miners. We have tried to see that they were victorious to a degree unsurpassed in the histroy of the mining industry. We tried to give them the guarantee of a better life, devoid of any industrial strike or unrest. Please examine as a Christian bishop the sequence of events which occurred before Mr Scargill decided for the first time in your lifetime to call a national strike

Government agreed to provide a further £3,000m to invest in new machinery in the years ahead. A policy in sharp contrast to the sovernment of France, which has decided to balve its coal industry, and in Germany, where the coal industry is also planned to decline

3. Mr MacGregor, whose depar-ture you request, became the first chairman of the NCB to declare that every miner who wished to continue working in the industry would be able to do so. In the whole postwar period since nationalization, pits which have ceased to be able to produce coal on any tolerably economic basis have been closed. In recent years, they have been closed under procedures agreed between the National Coal Board and the the National Coal Board and the order to prevent men who follow National Union of Mineworkers, the normal traditions of the NUM Mr MacGregor has seen to it that these procedures have continued, position of the majority of their position of the majority of their these procedures have continued, but has added a vital new assurance, which is that every miner will be guaranteed a job in the industry if he wishes, or, alternatively will be provided with an opportunity to take early retirement on terms more

draw attention to the adverse effect on a community if a pit is closed. I

The following are extracts from a letter sent yesterday by Mr Peter Walker, Secretary of State for Energy, to the Bishop of Durham:

You have preached that the prescription of the mining even you are. In 1970, we inherited a situation where in the previous six years hundreds of pits had been closed at many times the rate of anything contemplated at the present time. The way for this reason that I was for the mining communities.

in 1984, however, the man whose

departure you request became the first chairman of the National Coal Board to demand that the NCB themselves take on responsibility for any community affected by

He has created a new company, providing aid advisory services and accommodation to bring new firms and enterprises to the mining communities. The Government has your lifetime to call a national strike in his industry without giving his members the right of a ballot:

1. The Government, without pressure, invested £650m more in the coal industry than had been agreed under the Plan for Coal which was endorsed by the Labour government and the National Union of Mineworkers.

2. In spite of the insolvency of the National Coal Board the Government arced to provide a investment programme: soins to

investment programme is going to take place in the industry.

An examination of these factors will show that there has never been a plan to defeat the miners. It s a plan I would certainly argue that

deserves the support of any Christian, and is a plan to give miners and their families better future than they have enjoyed in the As a Christian, I hope that in your moments of meditation and prayer you will ask why the 70,000 miners who were given a democractic vote.

decided overwhelmingly not to strike. At such moments you could also ponder why it is that these men have day after day been threatened by mobs from outside their own communities. Mobs which have used violence and intimidation in

I believe the reason why those miners who had the opportunity of balloting voted so overwhelmin not to strike, and the reason why the other two thirds of miners have generous than any other industry in been prevented from having a this country or in any coal industry in the world.

4. In your sermon you correctly dispute, we genuinely strived to create a position where there was a good wage offer, not a single compulsory redundancy, a massive

of no compulsory reduncancies, the investment in the future or the investment in the tuture or the offers prepared to assist mining communities. He has only made one demand and has only been willing to discuss one factor. This is the demand that any pit, no matter how uneconomic, should be kept open until the last tonne of coal is about of coal is a second or until the last tonne of coal is exhausted or until safety prevents the continuation of operations.

> No miners' leader has ever made such a demand. No government and no National Coal Board management have ever or could ever concede such a demand. Mr Scargill has never moved or negotiated upon it. Whilst social democrats, moderate socialists, and trade union leaders all recognize that such a demand is unreasonable and unjustified, Mr Scargill has insisted that the non-balloted strike action shall continue until this demand is

Perhaps neither you nor I can malyse accurately his motives. But if you have embarked upon a study of Mr Scargill's written and spoken words over many years you can only come to the conclusion that he has always favoured conflict as opposed to participation, because he believes it is by conflict with the existing that his utopia will be

If I had considered that Mr MacGregor was a man who had either been instructed or personally had the intention of destroying the mining industry, or that he was contemptuous of miners or their communities, I would, of course, have dismissed him immediately. Or if it had been insisted that he had continued, I would have certainly have resigned. But I know that Mr MacGregor is a man who wants this industry to succeed, who wants it to expand and not contract, and who has been eager to provide miners and their communities with aid and assurances never previously given under his predecessors. Perhaps your observations on Mr MacGre-gor were based upon his image as portrayed in propaganda rather than upon the genuine aspirations or

faults of the man himself. You and I agree that the miners must not be defeated. But we must do our best to assess who is the true

Review of civil court system By Frances Gibb, Legal Affairs Correspondent

The Lord Chancellor's De- evidence on how long each stage partment intends to appoint a team of outside management consultants as the first step in a full review of civil court procedures, aimed at eliminat-

The idea, to be formally approved by the Lord Chancelor, represents a completely new approach to law reform and the first use of managment experts with a business approach rather than lawyers pooling individual

Chancellor's Department said: "We want to try to fing out form those who are not involved in running the system, or who make money from it, how it works in practice".

One official in the Lord

The consultants' job would be to quantify how the civil court system works: providing the first detailed statistical

in the process is: where the blockages are and at which point the costs begin to mount.

The scrutiny will provide the factual basis for a complete review of th civil court system which the Government announced would be undertaken by the Lord Chancellor in response to a recommendation of the Royal Commission on Legal Services, which reported

The Lord Chancellor's Department has outlined its plans in a consultation paper to be discussed at a two-day seminar of civil procedure starting today under the aspices of the Law

The high-level seminar, to be attended by about 40 judges, practising and academic lawyers and others, will provide the first material for the Government's

ing topics for scrutiny and proposals for reform, For some time there has been widespread concern among the judiciary and legal profession, as well at the public, about the length and expense of litigation.

The Law Commission believed the time was ripe for a detailed look at the efficiency and economy" the present adversarial system to see how it would be reformed so that cases were disposed of more speedily, economically and conveniently. Apart from costs and delays, it highlights in its own dis-

cussion paper other criticisms of the system which include failure to provide effective access to justice; including criticisms of present legal aid rules; the divided structure of the court system in, for instance, family matters; and the way the adversarial system can "magnify" the unhappiness

Leaks only way to get truth, MP claims

By Richard Evans

The leaking of confidential Whitehall documents is the only way to obtain the full truth about government activities, Tam Dalyell, Labour MP for Linilithnow, said last night.

the government over the sink-ing of the General Belgrano in the Falklands Conflict added: The civil servant who jeopardizes his own career for the public good is possibly the noblest Roman of them all." He told constituents at Whitburn in West Lothiam that

hard it was not only for MPS but also for select committees and the Leadership of the Opposition to get the truth. "It seems you only do so when you receive leaks. The

Resorts in computer holiday drive

By Derek Harris Commercial Editor

A pilot system is being launched by five English seaside resorts which could lead to holidays in Britain, including the increasingly popular short breaks, being sold by high street travel agents through computerized booking links similar to those used to sell many foreign

package holidays.

Travel agents sell far fewer holidays in Britain than they do foreigh holidays but Mr Eric Sutherland, President of the Association of British Travel Agents, yesterday promised "100 per cent personal support" for the new system. He added: "There is a marvellous future for British holidays. A United Kingdom holiday can be highly attractive and quite distinctive but it has to be packaged and marketed professionally."
The resorts which have

signed contracts for a computer booking system are Bourne-mouth, Brighton, Hastings, Scarborough and Torbay. The system is called Rita – meaning reservations, information, tourism and accommodation - and will be operated by Datasolve, part of Thorn-EML

Mr Michael Montague, Chairman of the English Tour-ist Board, said: "With Rita I believe that English tourism is taking a huge step forward. At last there will be a fast cheap and easy way to choose and book a full range of seaside

Tourist information centres in the resorts will continuousy up-date information on availability of hotel rooms and feed this into the Rita system. That in turn can be made available to travel agents. It means inquiries and bookings could be made either through the agents that choose to link up with the system or through the tourist

information centres. • Chief officers of councils in holiday resorts in England and Wales which have had a successful season are likely to

get large pay rises. Their salaries depend on population and councils may include tourists in their official figures to bolster their salaries. Authorities simply divide the number of tourists in their area during a season by four and add the answer to their static population. A spokesman for the Joint Negotiating Com-mittee for Chief Officers of Local Authorities said: "Salaries range from between £12,459 to £15,843 for an authority for under 75,000 population to between £27,846 to £28,959 for councils with a population of two million. An authority that has had 800,000 visitors -200,000 after being divided by four - could have increases of £7,000 for its chief officers."

Eric Sutherland: "100 per cent support"

Netherlands lure Laura Ashley

By Tim Jones

More than 800 new jobs could be lost to Britain if Laura Ashley, the textile and clothes manufacturer decides next month to establish a new £6m plant in The Netherlands instead of in Wales.

The company had hoped to build the new factory at Newtown, Powys, but is being lured to The Netherlands by the promise of a £2m grant from the Dutch government.
Mid-Wales is no longer an

assisted area and although grants are available to help to prevent British companies going abroad, those amount to no more than £350,000 and there is no assurance that one would be made.

Mr John James, the group managing director, said: "If we switch to Holland our present operation at Carno in Mid-Wales, which now employs 400, will continue, but will grow obsolescent because all the new machinery will go elsewhere.

"Then there would be the slow decline we have seen in the textile industry in the north-west of England."

The company employs about 2,300 people in Britain and moved to Mid-Wales in 1968. Since then it has received grants amounting to about £2m. .

Mr James, said: "It seems

from non-EEC countries can receive generous assistance for coming to Britain, when aid on a similar scale is not available for indigenous firms

The company already has a factory at Helmond, in North Brabant, in The Netherlands. and directors from Carno discussed the siting of the new plant when they visited it last

Mr Barry Jones, Opposition spokesman on Welsh affairs, said: "I have been monitoring this development closely. Laura Ashley is a British firm of international repute and it has to be encouraged to expand its operations in Wales."

McCartney speaks up for cannabis

Paul McCartney, the former member of The Beatles, has explained in an interview how he defends smoking cannabis to his four children. Mr McCartney, who has

been in court four times for drugs offences, says in drugs offences, says in ? omen's Own magazine that he tells his children: "Look, what do i do? I don't preach the stuff.

used to drink. I'm from this society where, if you drink eight pints a day, you're a man. But I think that's dumb. I'm not a steelworker in a hot furnace all day and I don't play rogby. Sorry kids, but I genuinely feel 'pot' is less harmful for me.

"And they say: "Well, Dad, if that's what you think, it would be crazy to do the other." He says. "Well, I say, it's illegal, so I'm going to be told off. I hate that part, because I

want to be the most upstanding father in the world." Mr McCartney and his wife, Linda, say they want to give their children as normal an upbringing as possible, in spite of his wealth being estimated at

menswear, again with a new emphasis on fashion. Stunt rider is banned from driving

Eddie Kidd, aged 24, the motor cycle stunt/rider, was fined £150 and banned from driving for three years for a drink-driving offence by magistrates at Marylebone, London, yesterday. He was also ordered to pay £50 costs.

Kidd, of Kelvin Road Highbury, London, admitted driving with excess alcohol in his breath at Marble Arch on

Mr Ronald Coupland, for the prosecution, told magistrates that Kidd took a breath test over the legal limit. Miss Elizabeth Roscoe, for

the defence, said that Kidd's livelihood would not be threatened because he performs his stunts on private land.

Greenham clash

Nine women peace protesters were arrested during clashes at Greenham Common air base in Berkshire yesterday. Police said that they would be charged with obstructing the highway.

He criticized the "patchi-ness" of domestic support for the "two powerful engines for the projection overseas of British culture and British standards", the British Council and the overseas service of the

Delivering the British Council's fiftieth anniversary lecture, entitled "Vultures and Philis-tines" at Chatham House in London, Sir Anthony attacked as a false economy cuts which closed British Council libraries abroad for the sake of "microscopic" financial savings, and

scathed the country's attitude towards foreign students.

"It is monumentally shortsighted to crect financial obstacles before overseas students who merely go elsewhere to the benefit of our competitor,", he

"It is really dazzlingly obvious. If you are thoroughly familiar with someone cise's language and literature, if you know and love his country, its cities, its arts, its people, you will be instinctively disposed all other things being equal or nearly equal, to buy goods from him rather than from a less well known and well liked

Sir Anthony said support for cultural diplomacy was still less than wholehearted in political and private circles in Britain.

GLC clash with Arts Council on gallery

By David Hewson

The Greater London Council esterday gave the Arts Council six months notice to vacate the South Bank's Hayward Gallery and announced that it intended to turn the building into London's "only municipal art

gallery".
The Arts Council, which has run the gallery since it opened in 1968, immediately threatened legal action against the GLC in order to stop the eviction, and one senior council officer described the decision as "a political spoiling act".

The gallery is scheduled to come under the direct control of the Arts Council when the GLt is abolished, but a termination of the lease will threaten a number of exhibitions which have been planned until the summer of 1986. These include large shows featuring the work of Degas and Hockney and an exhibition of Spanh work.

Sir William Rees-Moga, chairman of the Arts Council, said the notice to quit was "unconscionable and irresponsible. As the GLC is fully aware. the council already has national and international commitments to an exhibition programme extending into the summer of 1980 and planning for exhi-bitions beyond that date is well advanced. The council's ten-ancy agreement implicitly recognizes the impracticality of disrupting a planned exhibition programme at less than 18 months notice".

The GLC move was also criticized by Sir Roy Strong, director of the Victoria and Albert Museum and chairman of the Arts Council advisory panel on art, who described it as "a major blow to the visual arts in this country".

The Hayward not only

provides great exhibitions for countless Londoners and visitors in the capital, it is a centre for the Arts Council's travelling exhibitions and its loan collection of British art.

be only half as noisy as in 1980 through the new regulations in which Britain had taken the lead, Mrs Chalker said. She shared the public's view that lorries were intrusive, smelly and noisy and did not fit into narrow streets. But they played an essential role in the economy and the answer was to civilize rather than abolish

Earlier attempts at making lorries quiet carried heavy economic penalties, but that does not apply to the latest, developed by the laboratory with Foden, BL, and Rolls Royce, at a cost of about £10m.

It dampens the sound by having less engine vibration, lower revs, a turbo-charger, bigger silencers, a quieter far and wraparound fibre glass and steel muffling. Its capital cost is only 7 per cent and its running costs only 1 per cent more than a noisy equivalent. Sculpture exhibition: Eugene Dodeigne, a French sculptor, with a figure from an exhibition of his works in granite and bronze in The Yorkshire Sculpture Park, Bretton Hall College, near Wakefield. incident. The court was told that the MP had pulled up behind an unmarked police coach in Sloane Street. Chelsea in his Datsun car shortly after midnight on Aril 27. He, along with every member present, blames the car and power stations as being the There was a traffic jam and Sir Anthony got out to see what was causing the delay. Two policemen noticed he was

"staggering and was unsteady".
Mr Lett said. As the traffic
started moving again, Sir
Anthony ran back to his car and on the winds

The survey, in terms of
Britain, found that the Lake started the engine but only drove for 10 yards before the officers stopped him.

When PC James Ross told him to get out of the car the MP started to drive off after saying:
"Not bloody likely. I'm getting
out of here." The officer tried to
grab the ignition key and
shouted at him to stop but Sir Anthony drove off.

A taxi driver slowed the Datsun down by swerving in front of it and when the officers caught up, one smashed the car windscreen and Sir Anthony drove the car at two of them. He was arrested as he was about to go into his house in Graham Terrace, Chelsca.

Mr John Matthew, QC, for the defence, said: "This was an immediate and uncharacteristic reaction, really, to total panic, realizing he was over the limit. The situation went from worse to worse. It was almost like a brainstorm".

Lennon's guitar comes home

John Lennon's first electric guitar has returned to England. smuggled out of West Germany to avoid a possible export ban. It will go on display at Liverpool's Beatle City.

The Hofner guitar signed by all four members of the Beatles was given by the group as a prize in a talent context at a club in Hamburg in 1962. Its owner, Mr Frank Dostal, says he once refused a six-figure offer for the guitar.

Schools change Gloucestershire education

committee voted yesterday to end the grammar school system and replace it with five compre-hensive schools serving a sixth form college. It also decided to end all selection.

Whitehall brief

Golden age of cooperation

By Peter Hennessy
At first glance, a new book
on school building policy, 194573, has little if anything to do
with the present ferment in
Whitehall about ministers and civil servants, central and local government, the relationship between administrators and professionals within departments, and between the Civil Service as a whole and the private sector.
In fact, Mr Stnart Machine's

Educational Development and School Building, to be published on Thursday (Longman, £19.50), is brimming with insights into what now looks like a golden age of successful cooperation in all these fronts. Put simply, the old Ministry of Education had to cope with

the reorganization stimulated by the Education Act of 1944, the raising of the school-leav-ing age and the postwar baby boom at a time when Britain was broke and building matcrials were very scarce.

The new architects' and building branch of the ministry muder the young Mr Antony
muder the young Mr Antony
Part (who went on to become
Sir Antony and to run the
Department of Trade and
Industry in the 1970s), in
cullaboration with gifted architects such as Mr Stirrat
Johnson-Marshall, oversaw a
programme which by the midprogramme which by the mid-1970s had provided 7,500,000 new places in primary and secondary schools at a cost of

Stuart Maclure: brimming with insights

more than £8,000m (in 1976

It was, by any standards, a success story in terms of both policy and management. The quality of the output of the teacher training colleges which filled those new classrooms is another matter and another

difference between 1940s Whitehall and 1980s Whitehall is very striking, as even a cursory search of the declassified files shows. Then as now public expenditure faced an austere climate. But in those days there was an optimism about eventual economic recovery and social improvement, a "seed corn" approach in which careful plans were laid in the genuinc expectation of better times. In 1980s Whitehall, where

the polite name of realism. The achievements of postwar social policy are at a discount, dismissed as part of the "failed" era of "Butskellite"

Books such as Mr Maclure's are a timely autidote to this crude rewriting of recent history. Such works are a powerful argument in support of Dr Anthony Seldon's quest to set up a centre for contemporary British history which would blend the fruits of the Public Record Office with the best techniques of oral history to capture the essence of government in the recent past.

It seems very hard, however, to attract funds for an institute to study recent strategic policymaking in Whitehall. It is far easier to secure money for important sub-slices such as business history.

This is the last of the "Whitehall brief" series. I am off to the Policy Studies Institute in Victoria to prepare a book on the postwar bareauc-racy and how it might be reformed, attempting to do on a wider canvas what Mr Maclure has done for a section of education policy. Before chang-ing address, I should like to thak my suppliers in Whitehall for their assistance and for the

Tamils blame Navy for fatal random fire against coastal villages

From Michael Hamlyn, Jaffna, Sri Lanka

pregnant, Mrs Kalavathi Thangathurai lay beside her husband on the dirt floor of their home. a mud-walled, palm-thatched room in a compound housing 30 of more of their relatives.

It was 9.30 at night, and hurtling through the nodding palmyrahs came what one man later described as "a fiery star". It struck a corner upright of their shanty and exploded, showering fragments which pierced holes in bicycle wheels, n saucepans and in the walls. Kalavathi died. Her husband was injured.

They were not important people. They came from a family of low-caste Hindu Tamils, shoe-makers, who had fled north last summer to escape the terror wreaked upon their Tamil neighbours by the majority Sinhalese in southern

towns and villages.

Kalavathi died as a result of the casual terror inflicted on the Tamil population of the north of Sri Lanka by the security forces attempting to put down the rebellion by armed young militants seeking a separate

According to local Tamil activists, each evening at about that time the Sri Lankan Navy ships patrolling the waters between Sri Lanka and neigh-bouring Tamil Nadu, in India, have been loosing off a few random rounds in the direction of Point Pedro, the northernmost tip of Jaffna Peninsula, or Valvettiturai, the village of fishermen and smugglers near

warheads, and Chinese-made, extremists.

to judge by the fragments exhibited by the villagers. They have struck, apparently indiscriminately, a girls' school, a Christian church, a fishermen's shelter, a public library and a number of private houses.

"They are trying to drive us from our homes," one irate villager said.

The military authorities in the north deny that the shelling could be coming from naval ships, since the Navy had no guns that fired shells, a disingenuous excuse that was repeated later by the National Security Minister, Mr Laith Athulathmudali.

Athulathmudali.

More compelling was his suggestion to me that the shots came during anti-terrorist operations and that the Navy would not have fired upon the towns while the Army was in occupation of them. He thought it unlikely that the Navy fired the shot that killed Kalavathi.

Now, however, the Govern-ment agent in Jaffna, Mr M. Panchalingam, says that he has received an assurance from the Secretary of Defence that the Navy will not fire towards land

any more.

The random killing of Kalavathi is paralleled by the equally random killing of Captain Mohan Das in Point Pedro. The captain was having some trouble with one of his industrial endeavours and called at the post office to make a longdistance telephone call. As he left he became caught up in a vengeful sweep through the little township by armed police who roared out of their camp

Consulate fugitives dig in for long stay

From Our Own Correspondent
Johannesburg

The South African Government was yesterday studying the response by Sir Geoffrey Howe, the Foreign Secretary, to a message delivered by Mr Dennis Worrall, the South African Ambassador in London, on the six African and Indian fugitives in the Bri ish consulate in Durban.

The message is understood to have expressed Pretoria's dissatisfaction that the drama is being allowed to drag on.

The South Africans, however, have denied that they have issued anything like an ultimatum to evict the six men or face closure of the consulate, a small suite of offices on the eventh floor of a Barclays Bank building in Field Street, near the Durban waterfront.

The fugitives from the South African security police spent their twelfth day in the consulare vesterday, with no early end in their uninvited stay in sight. Lawyers representing the six men, who along with relatives are the only people allowed contact with them, sayey do not expect a verdict before Thursday on their legal appeal against the validity of the detention orders issued against them. Their case was heard by the Pietermaritzburg

Court last Friday. Dr Farouk Meer, an evecutive member of the Natal Indian Congress, told The Times last week that if the verdict was favourable. The six would leave the consulate and accept. the risk of being

rearrested. If it is unfavourable. They may stay in the consulate while the matter is taken to the Appellate Division of the Supreme Court in Bloemfontein, the highest judicial body in the land, for a final ruling. There is no telling how long that

might take. Although the consulate does not enjoy quite the same status as an embassy. Its premises are regarded as inviolable under diplomatic convention, except in one or two special cases such as fire. It is most unlikely that the South African police would consider entering the consulate

without British permission. Much has been written about the spartan conditions in the consulate. Certainly. It has been British policy to provide as few comforts as possible so as to encourage the six men to leave. In fairness. It can be reported consul, has shared his unwanted guests' hardships, dossing down with them each night

European notebook

First steps on the long march to unity

Europe. Queens and presidents have invaded Normandy.

Tanks have rolled again through the streets of Brussels. The bridge too far away in Arnhem was crossed in peace. This winter an army of American veterans will light a second time through the Ardennes.

This is the week when that liberated Europe is meant to start an important march forward down the road to what so many of its citizens believe should be a new kind of federation. It is a week when the last technical EEC budget battles are meant to be fought and the first real face-to-face skirmishes on integration are due to occur.
The technical budget battles

are being waged anonymously behind closed doors by diplomats with brains - in the words of Mr Nigel Lawson, the Chancellor - "like polymaths", They have the anesome task of putting together by next Monday a detailed package for agreement covering everything from the impact of the Portuguese birthrate to ways of neutralizing the European

Parliament.

That package may well be putted apart in Luxembourg next week by foreign, farm and finance ministers. But by now none of them can be in any doubt that it will then have to be neatly and quickly wrapped up again if there is to be any early hope of a move towards European union. It is a union which, despite the bad blood spilt over the budget argument. everyone wants Britain to Join and to join wholeheartedly.

Last week Mr Leo Tindemans, Belgium's best known elder statesman, wrote: ".\

is the Europe without the British ruby anniver- would remain forever a muti-sary year of the lated, incomplete Europe . . . I Liberation of am convinced that the United Europe. Queens Kingdom, deprived of the and presidents economic and political support of the Commonwealth, will end by feeling the necessity of

European integration." As the warm tributes round Europe in fortieth anniversary ceremonies testify, the Belgian Foreign Minister speaks for many nations. Though Britain is frequently damned for its attitude in EEC councils, it is admired, even envied for what Mr Tindemans calls its "sense of democracy" and for its wartime defence of the "demo-

cratic ideal of the West". It is that idealism which inspired the creation of a new FEC committee which meets for the first time on Friday in Brussels, Set up by the European summit, its members have been chosen by heads of government and have a man-date to explore every facet of

European union. The British representative is Mr Malcolm Rifkind, junior minister at the Foreign Office; but other countries have nominated diplomats, experts and top civil servants as well as politicians.

Their task in the next two months is to put together an interim report for the Dublin European summit in December. It will have to tread the difficult path between French rhetoric and British reticence. It is unlikely to be a very satisfac-

tory first report for anyone. In 40 years, however, there could be celebrations to mark the anniversary of a new process of unification. But if all fails in Luxembourg in the month ahead it could well be time again to follow Pitt's advice and "roll up that map of

Ian Murray

Farewell to lira zeros

The Italian Government

Prime Minister, said in Cre-mona yesterday that this ought to be possible now that the state

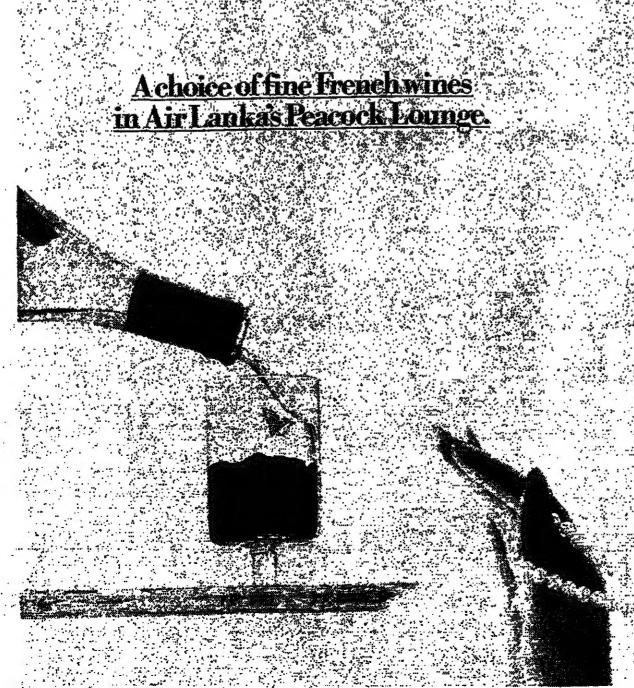

of the economy was improving. He looked forward to seeing lira which is once more a lira, so that the housewives need not go shopping with too many zeros attached to her money".

It should make life easier also intends to introduce next year a for foreign valisitors, who often "heavy lira", worth 1,000 of the feel out of their depth when even the simplest of transaction runs into thousands of lira, and

sometimes millions.

The reasoning behind the Government's intention to cut the last three zeros off lira calculations is its belief that single digit inflation is at last on the horizon and the possibility of price stability lies ahead for the first time in 10 years.

Outspoken

Hungarian

refuses exit

By Gabriel Ronay

A Hungarian intellectual, who wrote to The Times last

month to seek help from Western public opinion for Romania's persecuted Hunga-

rian minority, has been sum-moned to the Hungarian In-terior Ministry and invited to

leave the country.

Mr Gaspar Millos Tamás,
one of the few East Europeans

sho dared to write to The

Times giving his full name and

address, was politely offered a passport and an exit visa "to whichever country you like.". Budapest sources said. But he

refused to go. Mr Tamas, an historian and

essayist, is himself a Transylva-

nian Hungarian who was forced

to leave by the Romanian authorities a couple of years

ago. He moved to Hungary on

the strength of the unwritten right of ethnic Hungarians from neighbouring states to live in the mother country... In his letter, Mr Tamás

voiced Hungarian public concern about the mounting oppression of some two million Transylvanian Hungarians by

the Ccausescu regime. He pointed out that four leading

intellectuals opposing the regime's Romanization drive are not given the chance of a

fair trial and are charged on

According to the sources, the

fear of damage to precarious Hungarian-Romanian relations

has prompted the Budapest

authorities to try to get rid of Mr Tamas who "rushed in where angels fear to tread". The Kadar regime has been trying to alleviate the plight of fellow-

Hungarians across the border through quiet diplomacy. But this has signally failed to halt Bucharest's nationalist drive

For this reason, the sources added. Mr Tamás decided to

seek Western help for the endangered Transylvanian Hungarian community regard-less of the consequences to

Mounting public concern in Hungar, about the Transylva-nian Magyars makes the hand-ling of the Tamás case a delicate

issue. To expel him from the country for speaking up in support of appressed fellow-Hungarians in a neighbouring

communist state would create more problems than it would solve. Besides, the sources said.

it would infringe the right of

ethnic Hungarians to seek

refuge and live in the "mother

against its Magvars.

apparently absurd grounds".

only eight miles south of the Israeli-Syrian front line in the Bekan valley.

Another soldier was wounded in the same incident, in an area which had hitherto been considered safe from guerrilla

Five more soldiers were wounded two of them seriously, in an ambush on an Israeli patrol outside Nabatea and three others were hurt in a bomb attack only a mile from the Israeli frontier at Metulla.

The Israelis were able to claim that they had shot dead six guerrillas, three of them Palestinian and one a French woman working for the Pales-tine Liberation Organisation in which he was travelling was who took part in an armed

Awali river from a dinghy.

But in Damascus, where the Syrians are well aware of the cost Israel is paying to stay in southern Lebanon, Mr Murphy-was being told that any new security guarantees for the Israeli frontier would have to be worked out between the Israeli and Lebanese military authorities, that they could not be enshrined in any kind of official peace treaty between the two countries and that Israel would no be permitted to maintain even small forces inside the Lebanese border.

The Israeli's have already made it clear that they no longer expect Syria's occupation army to leave Lebanon simul-taneously with their own occu-

Something about Amelia, a controversial film which dealt bluntly with father-daughter incest was named best dramatic special of the 1983-84 season, and Concealed Encoures, a drama about the Alger Hiss-Whitaker Chambers conspiracy dispute, won best mini-series.

Lord Olivier won best actor in a drama for his role in King Lear. The main acting award for Something about Amelia went to teenager Royana Zal, whose mother is

Low morale in Iran's 'forgotten' army

By Hazhir Teimourian

A secret official document recently smuggled out of Iran sheds light on difficulties faced by the Iranian Army, which has been locked in battle over the past four years with the armed forces of Iraq.

The document, a copy or which has fallen into the hands of the left-wing revolutionary opposition, the Mujaheddin, is in the form of a long letter dated July 10, 1984 from Colonel Ali Sayyad Shirazi, the Iranian land forces commander, to the former Defence Minister, Mr Mohammad Salimi. Its wealth of detail leaves tittle doubt about its authenticity.

Colonel Shirari says that for four years the Army's requests for money to pay its personnel for overtime work have been refused, leading to general loss of morale and despair.

He then contrasts the way the Army has been treated with the many extra payments made to the Revolutionary Guards Corps, a separate army of Islamic zealots which is being seen as an eventual replacement for the fand forces left from the years of the monarchy.

Colonel Shiragi says: "Army officers have often served longer than their counterparts in other revolutionary organizations such as the Guards, and they believe themselves forgot-ten by the authorities, though they have paid with their blood to protect the revolution",

The spirit of Confucius is alive and well

From Denis Taylor, Zhuo Xian, China I new statue of Confucius by party activists as a guide to

replacing one destroyed by Red Guards during China's Cultural Revolution was unveiled in the temple complex in this town near Peking during weekend celebrations to mark the sage's birthday. In spite of doubts expressed

by Western scholars about exactly when the philsopher who has influenced Chinese life for most of the past 2,500 years was born, the Chinese have no reservations. They say that he was born here in 551 BC and that last Saturday (Sept 22) was his 2,535th anniversary date, measured by the Chinese Lunar calendar.

Confucius was vilified during the Cultural Revolution, which was unleashed in 1966 and ended with the arrest of the Gang of Four led by Jiang Qing the widow of Mao Tse-

tung, 10 years later.

Reading of the sayings of
Confucius was not simply an attack on the figure who symbolized China's long feudal past. In 1974 the attacks became part of the left wing campaign against Chou En-lai, erate and popular Prime Minister, and were understood as such in a country where oblique historical references in newspapers are read

Liu Shangde, deputy governor of Qufu County, said at a press conference here on

Sunday that most of the Confucian heritage destroyed in the area during the Cultural Revolution belonged to the Ming and Qing (14th-20th centuries) dynasties. But all the buildings and archives of the Kong family, who are said to have descended from the philospher through 77 gener-ations, had been saved and hidden by local people.

Konk Decheng: the head of the present and 77th gener-ation, lives in Talwan. But his sister, Kong Demao, was in the Ming Hall here on Saturday to see the new statue of Confucius He is seated, like a great Buddha with a human face, in a

predominantly gilt and dark red pavilion with candles and incense burners before him. The weekend festivities, to which foreign journalists were invited, showed the growing Chinese flair for public re-

But Chinese national television pictures of the ceremony also reinforced the point that enthusiasm for things Confacian is now emphatically permitted.

ment in connexion with the ETA prisoners. The contradicted widespread reports in the Spanish press yesterday that France had obtained promise from Madrid that the three ETA members would be entitled to have a lawyer present during police interroation, that they could freely choose their own defence lawyers and that inter-

Extra police were dispatched to the Basque country yesterday and Spain's security services were put on special alert against possible violent repraisals. The left-wing Basque party, Herri Batasuna, has called for a general strike in the Basque region on September 28.

In Paris lawyers for the three extradited to Spain have appealed to France's Council of State. But as the council is only a consultative body, without any legal powers, it cannot overturn the French Government's decision.

The three ETA members are facing nine homicide charges in Spain. They are due to arrive in Madrid later this week and will. Senor Ledesma denied that be taken in the first instance to Financial speculation made easy

The Buenos Aires cycling trick

In the second of two articles from Buenos Aires, DOUGLAS TWEEDALE looks at how the policies of a military govern-ment encouraged the specu-lation and flight of capital that accounts for much of Argen-

In the Argentina of the late 1970s la bicicleta (the bicycle) was an essential vehicle for manoenvring through the lab-yrinths of Buenos Aires financial markets, which had just been freed from government regulation by the Economy Minister Señor José Alfredo Martinez de Hoz.

But not, of course, the twowheeled kind. La bicicleta was an Argentine term coined in

those years to describe the kind manoeuvres in which loose capital was "pedalled" around in circles for the sole purpose of generating more capital. In a word, speculation,

According to officials of President Raul Alfonsin's newly-elected administration. In bicicleta is also essential to understanding how Argentina

world \$45 billion (£34.6hn) or ten times what it earns from foreign trade in any given year

"Our debt is different from that of Brazil or Mexico", says Secor Aldo Ferrer, named by President Alfonsin to head the state-owned Bank of the Prov-ince of Buenos Aires, the country's second largest bank. Instead of contributing to development, Argentina's indebtedness was caused by speculation in foreign currency and capital flight promoted by the (military) government."

Whether or not Sebor Martinez de Hoz deliberately set out to encourage speculation, at least two aspects of the policy be implemented clearly allowed "bicycling" to become the national sport of Argentina's middle class after

The combination of high local interest rates (which allowed speculative capital to earn approximately twice as high a rate of return as on international markets) and of an artificially overvalued peso on the Government's exchange table encouraged Argentines to berrow increasingly from banks flush with Eurodellars and to put the money to "work" on local markets.

The economist, Señor Jorge Schvarzer, who belives the Government did this deliberately, has calculated that "smart" money could in theory have earned 20 times its own military rule (1976 to 1983).

Señor Martinez de Hoz's policy of overvalning the peso

Senor Alfonsin: Trying to find the money.

foreign currency reserves gave birth to another uniquely Argentine expression of the times: plata dulce, or "sweet

Argentines dazzled by the sudden new purchasing power of their pesos and by their ability to buy cheap dollars began to take them out of the country in quantities the current Central Bank president. Seiter Enrique Garcia Vázquez has said were "unparalleled in modern times in any country of the world".

With practically no legal restrictions on how much currency any one citizen could buy from the Central Bank or how much he could take out of the country, the Government was forced to resort to huge new credits from the public sector to meet the demand for

When a string of bank closures early in 1980 set off a run on the Government's dollar down until a change in the ruling military junta removed Señor Martinez de Hez from office in 1981), expital flight

In testimony before congress earlier this year, Sedor Garcia Vázquez estimated that between 1979 and 1981, at least \$10.7 billion was taken out of the country in this way. Senor Schvarzer puts the figure at \$15 billion for the period of the Martinez de Hoz administration (1976-1981) "The state was selling dollars at half their true value - it had to go into debt to subsidize this capital

flight," Señor Schvarzer said. With their peso so sweet from 1978 to 1981, Argentines poured an estimated \$5.5 billion into air tickets and tourist agencies.

In those years, it was not on to see whole familsins included, struggling through the airport on their way back from a "shopping spree Europe, each Europe, each family member loaded down with a colour TV,

Now, with the dollar se 500 times more expensive in nominal terms, Argentines for the most part stay at home, wondering whether their newfound democracy will find a way to pay back the money spent under the military.

£ 9,000	£ 95·63	£18,000	£191·25	You can hold any amount from £2,000 up to £50,000 in multiples of £1,000. Each £1,000 of Income Bonds produces an average of £10.63 a month -£127.50 a year.	
£10,000	£106·25	£19,000	£201·88		

As you can see, an investment in National Savings Income Bonds can make a lot of difference to your income. Currently you'll get 12.75% pa interest on your Income Bonds. You'll get it paid monthly. And you'll get it in full, because we don't deduct tax.

Enjoy Life With A Monthly Income. The interest is sent direct to your home or your bank on the 5th of each month.

It means some extra money coming in regularly to help pay the bills or simply to spend enjoying life.

Your Savings Are Never Touched Your capital is completely safe-the cash you put in is the cash you'll get back. The rate paid may change from time to time, but it will be kept competitive.

Interest is calculated on a day-to-day basis and is subject to tax if you are a taxpayer.

Getting Your Money Out. From 1 October you need give only 3 months notice to have any Bond repaid. And there will be no loss of interest if you've held your Bond for a year or more.

(For repayment applications received before 1 October the terms are as stated in para 6 of the prospectus below.)

Invest here and now. You can be sure your investment will always provide a worthwhile income-month in, month out.

All you have to do is complete the coupon and send it with your cheque (payable to National Savings) to NSIB, Bonds and Stock Office, Blackpool, Lancs. FY3 9YP. Or ask for an application form at your Post Office.

It's probably the most enjoyable investment you'll ever make.

I occasionally get letters from people who think I still review jazz for *The Tunes*, even though I hung my type dancing shoes years ago. I was sent into a reverie by one such received last week from Geff Green, who runs Wednesday and Friday sessions in Munster Square, London NWI. At St Mary Magdalene Church, actually.

He presents the best in British jazz there and wonders why British audi-ences don't turn out in greater numbers to support the home product. He even wonders if there is any way I could mention the address and club sessions in print.

Well, no way, Geff. That wouldn't be right, somehow. But it wasn't this be right, somehow. But it wasn't this that started off the reverie; it was his mentioning that on October 3 and November I (and I'm only sorry I can't mention the dates in print) they are presenting two evenings of Django Reinhardt's music. And that got me thinking about a George Melly programme I had glimpsed recently on one of those evenings when all four one of those evenings when all four channels were featuring George Melly – even the gangsters in the old film were all George Melly, it seemed.

Because on the programme where he was actually singing, there was one song which grabbed my attention far more than any of the others. A wistful sort of song called *Nuages* written by Django more than 40 years ago and fitted out with words somewhere along the way. And what stood out about this song, I reveried, was that it actually had a good tune. The other songs he sang did use different notes as they progressed, but this was the only one with a really strong melody line.

Now, this sounds like prelude to a "they don't write tunes like that any more" complaint. Far from it. A lot of George's repertoire is far older than that, without necessarily involving stronger tunes. In fact, the blues, which is George Melly's home base, doesn't really have much of a tune at all. One or two blues songs, such as St Louis, have good and instantly recognizable melodies but most blues are marginal variants on one or two basic riffs. When people have to transcribe blues into piano albums, they have terrible trouble making them sound different from one another.

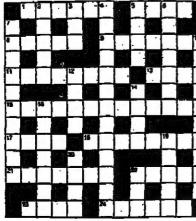

Yes, this article is a "they don't write tunes like that any more, and what's more they never did" article. Of course, the Gershwins, Kerns and Porters wrote fine tunes, but we conveniently remember the best and forget the rest. If you want to hear the rest, you should listen to Brian Rust's Mardi Gras, where every Sunday night he plays a wide range of pre-war jazz and dance music. It's lovely stuff, way off the beaten track, but it does tend to suggest that when you get off the track, there aren't many great forgotten melodies hiding in the undergrowth.

I don't hear many fine tunes in modern pop music, not even from my favourite songwriter Randy Newman. I don't hear them in modern musicals either. There's an old modern joke about the Lloyd Webber school of musical, that because of media exposure you go into that kind of musical already humming the tunes. In my experience you come out having already forgotten them.

What's different about music today, perhaps, is that the tune is no longer so important. With trend-setting groups, it's the style, image, dress and presentation that matter. Outside that area, pop music is heavily influenced by gospel, disco music and funk, which depend more on the sound, the beat, the style, than the melody line. When the occasional composers of real melodies, such as Stevie Wonder or Lennon-McCartney, come along, they stick out like a healthy thumb.

Good heavens, I'm sounding like an old reactionary. Better snap out of it. End of reverie. Back to normal tomorrow. Meanwhile, I'll just stick on this old Hoagy Carmichael tape.

Ronald Reagan is riding high as he aims for a second

term at the White House, despite his much-publicised gaffes. In this second report Trevor Fishlock reveals

how the President is always kept in a flattering limelight

Making the prime-time President

dent you do what you're good at. Ronald Reagan is very good on television. Obviously we run the campaign on TV and we restrict his contact with the press. Of course we do. We don't want him to screw

up."
In his blunt way Lyn Nofziger, a Reagan aide for many years, summarizes the simple strategy of the President's staff. Mr Reagan is both projected and gagged.
The first rule of politics is to win

and presentation being pre-eminent, the central objective for the White House image-shapers is to control the way the President appears on television, especially on the evening television news wat-ched by 100 million people. To Michael Deaver, image-mak-

er-in-chief, management of that minute or so of nationwide news covering the President's activities is crucial. Every morning he chairs meetings at which a "story of the day" is devised to show Mr Reagan in a positive light, to emphasize his leadership and buoyancy, his apparent command of the broad weep of issues.

Mr Deaver, who knows the President better than anyone other than Nancy Reagan, refers to his boss as "The Talent"... his tribute to a good performer. Mr Deaver is the chamberlain. He and Mrs Reagan are very close and they are the keepers of the inner gate. Mr Deaver runs the President's diary. ensures that her husband gets

A vital adjunct to image manage ment is the gaffe-control policy which limits Mr Reagan's informal contacts with reporters. The President lacks a command of the detail of issues and current events. His exaggerations, unwise remarks, mistakes and fibs (once described by an associate as parables). literally fill a volume on sale in bookshops. His advisers don't want him tripped. For one thing, it messes up

When he received an unexpected hard question recently and had trouble answering it. Larry Speakes. his press secretary disconnected the

Reporters in the press pool following the President are dropped or kept at a distance and the Secret Service has been used to snuff their questioning, intervening if they get too close. Reporters complain that when Mr Reagan walks to his In its obsessive way, the White House tried to suppress a picture of

his case to the people on the screen He does not work on the same wavelength as journalists and he does not need to meet the press and risk shooting himself in the foot and upsetting his minders.

choosing.
The campaign is only an

considerable influence with much independence. In King Ronald's time it has been pushed by powerful courtiers beyond the palace gates, crumbs and maundy, questions into the wind

The head of the President's coterie is James Baker, a tall Texan lawyer, aged 54, who has risen rapidly and is now Chief of Staff. the senior White House official. In the struggle between conservatives and moderates in the White House and the party he is thought by his critics to be too moderate.

Other leading members of the inner circle are Stuart Spencer, aged

an associate of the President since 1967, and Attorney-General designate has lost influence and has no significant role in the campaign. The White House men have the helm in the reelection effort. The

wears while relaxing in his plane. Cameras and the right scenery are enough: the President is taking

The key part of the strategy was achieved long ago, to make the press, and particularly television, deal in coin of the White House's

extension of the day-to-day man-agement of the presidency. The White House men were determined that they, not reporters and producers, would decide what images of the President would be seen by Americans. It is the White House which frames the agenda, keeps its grip on the information tap and rules on its own terms: anything else, the President's men maintain, would be intolerable.
Under the constitution and

through long practice the press occupies a fundamental role in American democracy. In other days, in other presidencies, it enjoyed access to the court and leading courtiers, and exercised its where it chales and waits for

57, a Californian political strategist and old Reagan hand; and MrDeaver, who is 46, has worked for
Mr Reagan for 18 years and is
almost one of the family.
Mr Edwin Meese, one of the
original Meese-Baker-Deaver troi-

is separate but essentially the engine room under their control. Its chairman is Senator Paul Laxalt, aged 62, a close friend of the President. "We're like brothers," he says of a friendship that grew when they were governors of neighbouring California and Nevada.

When Mr Laxalt was questioned

about a Las Vegas racketeer's contribution to his gubernatorial campaign, he said that man was a friend and he would not drop him.

The campaign director is Ed

weightlifter and shrewd political strategist. He heads more than 250 workers, busy as ants, in the comfortable campaign offices in Washington. This is where state coordinated. campaiens are speeches are written, the nation's newspapers monitored, the Reagan message beamed to radio stations and newspapers across the land. There are special sections handling ethnic voters, and also a Christian voters' cell, mobilizing churches to recruit Christians to the cause.

The campaign's inner circle members are hardened, well-in-

They have a broad knowledge of news management and presentation built on the foundation of what every political handler learnt in the election of Richard Nixon in 1968. when electoral stage-management reached a high level of expertise. In particular, they understand the dynamics of television and journafism as well as anyone in broadcast-

ing and newspaper.

Michael Deaver, the consummate public relations man, is expert in lighting, camera angles and photographic illusion, things that Mr Reagan, too, used to being directed professionally, understands.

Mr Deaver makes sure his boss is shown in the most favourable way. When he went to Korea to prepare for the President's trip there he chose and marked the places where the President should stand for the best TV shots. The White House is well aware of television's hunger for pictures above all, of its liking for the novel even in preference to the significant.

The President's rare prime-time press conferences, too, are carefully managed. The President has a scatting plan in front of him, identifying correspondents, and he picks them out and gives bland. rehearsed answers. The journalistic practice, common in the early part of his reign, of criticizing the President for his numerous factual errors and fudging has declined. It's stale news. The press is unpopular with many Americans, who are pleased to see it slapped down. If Mr Reagan's intuition had not told him how middle America feels, his pollsters, led by Richard

Wirthlin, certainly would.
The President's men are remarkably well-informed by the pollsters, whose close monitoring of opinion and computer projections enable inem to know the attitudes of Americans, day by day, region by region. Thus the President's own approach, and speeches, written by Kenneth Khachigian, can be tailored to mainstream thinking. He

says what people want to hear.

And what they want, the President and his men are firmly convinced, is good news. The commercials made by the President's £20m television advertising campaign are determinedly upbeat and optimistic, full of flags and smiles, highly patriotic and unaba-

with Pepsi and Meow Mix, known as "The Tuesday Team" (polling day is a Tuesday) and led by New York executive Jim Travis.

Many journalists feel manipulated by the White House, but there is nothing particularly sinister in that. It is for the journalists and broadcasters to adjust to the circumstances. Still, many journal-ists and politicians feel disturbed that the President is being so firmly fenced off from those who represent

the people.

They fret about lack of access, but, as a Washington political columnist said to me. Mr Reagan does not give good interviews. He simply doesn't have a lot to say. I've talked with him privately and he is the same off the record as on -... He is not interested in ideas or exploring issues. There's nothing deceptive about him, he's a nice man with simple goals who has been saying the same things for

Ronald Reagan's simplicity, of course, makes him easier to present United States is a version of monarch, embodying the people's ideas about themselves, an element in their self-respect.

When Mr Reagan arrived in office, this monarchy had been battered by the years of social unrest. Vietnam, the criminality of Nixon's years, the ineptness of Carter. In their present mood the people require that this singular representative should remain untarnished, even above criticism. He had distanced himself from government, and made a virtue of bungles. The buck has not stopped at his desk, others have taken the heat.

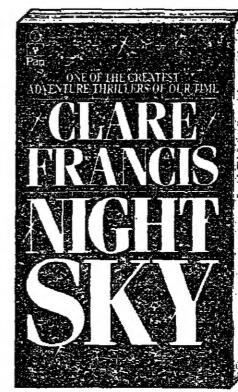

The President and his men believe their campaign is in tune with a broad feeling in the land: through Ronald Reagan Americans are enjoying a kind of restoration. A woman from Nevada remarked: "It's not a bad thing we have an actor for President. Only an actor knows how a president should behave.

Reagan's advisers don't want him tripped - for one thing, it messes up the script

9.52% TRUE ANNUAL RATE

If you want the biggest offer

In the last month, building societies have been showering offers upon investors. Now the Leicester brings you the offer that's been worth waiting for.

None of the other top ten societies matches our portfolio of instant access and longer term investments.

The new Leicestercard Gold Account offers 9.3% net. If you leave your interest in the account, that compounds to 9.52%.

And if you don't want to leave your money in the account you can have it back instantly. No seven day wait with the Leicester. All you need is a £500 minimum investment.

If you're able to invest your money for longer, look at the new Leicestercard Bond.

For three years, we promise to pay you an unusually high rate,

currently 10% net, with interest paid monthly if you wish. However, if you leave your interest in the account, that compounds to 10.25%.

But you can still get your money back if you should suddenly need it: after a year, you need give us only a month's notice. And, after deducting 90 days interest, we'll give you your money back.

At the time of going to press, none of the top ten is able to match our offer.

That is the received wisdom, (especially from the shops themselves) as new stores are spawned and

established names are born again. Like a mature woman discovering lip gloss, Richard Shops (now called Richards) are brightening up their ing woman from 25 - 40. It is really daisy chain of shops. Under a variety of short, sharp names - and under the spell of the successful Next - Solo, Ditto, Planet and Visuals stud our streets and stores.

On this page you can see how the

clothes. Even the shops themselves have an identikit, modular, Conrandesigned appearance.

There is something else that links all these clothes: their prices, which vary by hardly 1p from one shop to Next.

The high street war is supposed to be about bringing fashion to the discernabout money.

The clothes on this page - although I don't expect readers or retailers to agree with me - are ridiculously cheap. For all the marketing polish, prices from £12.99 for a sweater or £17.99 for

FASHION EDITOR'S COMMENT

a skirt - are rock bottom. The "new" high street image is a familiar old wine in a new bottle: the English woman's obsession with price as opposed to value, and quantity as opposed to

quality, in her wardrobe. I am not against cheap clothes. I am pleased that the fashion level in the high street has so dramatically improved. I think that mass-market clothes are value for money. But the "trading up" is in taste, not substance.

The average price of a mass-market skirt is £24.99 (see table below) and that is exactly half what I think you should be prepared to spend for a good

quality skirt for regular winter wear. My view is echoed in the price structure of the Continental clothes, imported from France, Italy, Scandinavia and, increasingly, Germany, who are taking over the middle fashion ground.

The focus of the high street is now on the women who have grown out of the teenage role and not yet re-defined a fashion image - the Sixties/seventies generation. It was at that time that the notion of cut, quality and finish was swept away on a thigh-high tide of mini skirts.

An entire generation - male and

selection of colours. The appeal: of Next is in the package deal to

take the pain out of shopping

the jacket that goes with the skirt, that goes with the skirt.

has come to maturity factories or back-up, complain that understanding everything about they cannot get their clothes made. Hardy Amies, that most British of designers, has turned to Italy for his ready-to-wear, if prices are held down artificially by the high street multiples, is it surprising that cost-cutting is endemic in fashion manufacturing and that clothes are made to a price, not a quality standard?

My fear is that the pressure from the high street will squeeze the middle market until the consumer is left with nothing between high street fashion at

£30 and designer labels at £300.

There will be nothing, that is, but the clothes imported from countries where women believe that, if you want more from fashion, why pay less?

Skirting

round the

price tag

The upward and downward

movement of skirts is charted not in heinlines, but in price tags. Within one shop or store the range is likely to be from 115 to 130. This doubling at

prices is a sensitive sales point.
But the gap widens even farther
by doubling again for the quality
labels like Jaeger (240-270) and
again for designer-label skirts
(280-120). The way that skirts
prices move is also an indication.

Marks and Spencer have 263 stores (and a new one opening in Bishop's Stortford in October). Even a giant needs a change of clothes and M & S are not immune to the current high

street fever.

More fashion, a younger target customer and greater accent on street styles like workwear are part of a new Marks and Spencer campaign. The re-vamp includes menswear, where pleated trousers and a wadded trench coat are surfacing among the sea of safe [

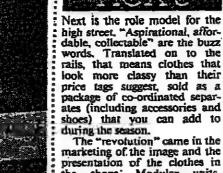

For fashion-conscious customers who live near the "selected" stores, these statements of style are a bonus; an Italian-look leather blouson for £95, a sleek and sophisticated cost dress. But these directional clothes will not be seen nationwide.

The strengths of Marks and Spencer are also their weakness. They refuse to compromise on quality and are therefore con-"expensive" by a generation that does not care about the performance of clothes.

Marks and Spencer were the first high street shop to respond 75 to affluence by trading up. 73. Those customers are still with them, but they are now 35 plus. To catch the 25-year-olds, M & S have now to respond to the

<u>Carrlones</u>-A classic label, so exclusive

Principles is the Burton group's answer to Next - and they say The first shop opened this month in Cardiff, followed by Cambridge, Wakeford, Epsom and Wood Green. By the end of this year there will be 31 shops in high streets from Bromley to Barnsley, Since they invite comparison with Next I would place the image as slightly more sophisticated, less sporty, with more evening wear (and including some lingerie), but otherwise

similar in style, and especially in price structure. The target customer is the ubiquitous 25-40 year old. (Does fashion life really end at 40?) The Principles shops are slightly more glamorous -apricol carpet, dried flowers in the individual fitting rooms.

Behind Principles is Burton Group chairman Ralph Haipern, who brought concession areas within Top Shop at the height of the boutique boom 15 years ago. He believes that there is still a gap in the market for women who want sophisticated clothes at realistic prices, even if : the image then outstrips the

Escada's dramatically co-ordinated package. Animal print mohair jacket approximately £260, leopard spot blouse £109, slim wool skirt £115, all from Harrods and Designer Room Dickins and Jones next mouth

On Saturday, the Harrods autumn Harvestfest comes to an The spearhead of this move-ment is Escada, a Munichend. The month-long promotion has been a public accolade for the rise and rise of German fashion. German manufacturers have invaded the suit and coat rooms, and increasingly the separates departments, of all the major London stores, and in the last decade have become an

based company set up in 1977, which also markets the slightly cheaper line Laurèl and the young sportwear Crisca label. In Germany, and this season in Harrods, Margaretha Ley (designer and founder with her husband Wolfgang) is also selling her own label range. The Escada deal is a package:

the separates are co-ordinated in groups of colour and style and put together that way not just for customers, but for the buyers, who are often just as bemused as the rest of us about putting looks together. From hats to shoes, and with high gloss brochures to show how it all works, the customer gets a

The other strength of the German ranges is their quality and delivery. Investment in highly automated factories, colour coding by computer, coupled with a national pride in efficency and order, produces the goods on the rail. That is where the Italians, with much more intrinsic style and taste,

often fail to deliver.

overwheiming "look".

The other big-selling German label is Mondi, another Munich firm with the same package of planning, computerized delivery, quality control and automate delivery for the buyers, and the same creative advertising and marketing for the customer. Mondi emphasises its work with the buyers, giving them ex-planatory teaching sessions.

I believe that the real success of the German companies lies not just with their technical efficiency, but with their pos-ition in the market place. Although Escada is expensive Laure, Mondi and the other fast-selling labels like Styleman

and Betty Barclay are pitched at just that price and quality level which is missing among British total, expensive and sometimes

Tom Rosenthal, I can reveal, is to quit as chairman of both Secker and Warburg and William Heinemann on Friday, His surprise resignation is to be publicly announced today. Rosenthal, who has no job to go to, refused to comment yesterday, saying only that as a "traditional book man and publisher" he was not in tune with BTR, the industrial conglomerate headed by Sir Owen Green which bought Secker and Heinemann last year. According to my sources. Rosenthal, who was appointed MD of Secker by Frederic Warburg 14 years ago, quit after he was offered an alternative job in the group's reorganization. Peter Gross, Secker's publishing director, starts as MD on Monday, and Rosenthal's chairmanships will be assumed by Charles Pick, currently MD of the Heinemann Group, Rosenthal, who masterminded the controversial The Pencourt File, will not, I suspect, be passing on to Pick the symbolic "torch" he was given by Warburg on his deathbed; the publisher's personal first edition copy of Animal Farm signed by George Orwell, a Warburg author.

Catching up

Television Centre is raging with rumours about a successor to Richard Somerset Ward, who has quit as BBC-TV's Head of Arts and Music. The troubled department has seen Tony Palmer's Mainstream pulled off after one season in 1980 and the revamped Omnibus go through three presenters in as many series. Now, I hear, the corporation is looking outside its ranks and has approached John Drummond, a direct the Edinburgh Festival. "The BBC talks to many people who have been long serving." he says modestly. But the elever money is on Melvyn Bragg, who started his career on the 1960s' Omnibus. "The rumours haven't reached me, but I've been away," says Bragg, editor and presenter of London Weekend's coveted South Bank Show.

Cash point

With recent assasination threats, you would think Arthur Scargill would be the most heavily protected man since Hugh Heffner. Not so. Bill Cash, Tory MP for Stafford, rang me excitedly yesterday to say he simply waltzed up to Scargill's platform unchallenged at the Stokeon-Trent miners' rally at the weekend. "I asked him to repudiate violence and intimidation on the picket line in his speech", said Cash. Scargill said I must be referring to police violence and intimidation" Cash was finally driven off the platform by a torrent of verbal

Kim and Ken

There are dangers in Frederick Forsyth's habit of using real people in his novels. Ken Livingstone, for example, is not at all pleased about references to himself in The Fourth Protocol and has shown them to his lawyers. He particularly objects, I understand, to a fictional Kim Philby describing him as nondescript, instantly forgettable little fellow with a nasal voice" whose ousting of GLC Labour leader Andrew McIntosh within hours of his 1981 election victory was "a truly brilliant coup of which Lenin himself would have been proud". Forsyth, surprised at I ivingstone's anger, says this "could hardly constitute a libel when considered against the habitual rough and tumble of contemporary politics. Livingsione's lawyers evidently agree. His spokeswoman announced yesterday that "the book is so silly ... fatuous ... asinine that we are not taking it any further."

Clifford Longley finds more than concern over the miners' strike

Why the Church is anti-Thatcher Demolish and be

edra denunciation of the Govern-ment's handling of the miners' strike, and of its economic policies in general, should have surprised no one, although it did. The whole mood of the Church at present is coldly hostile to Mrs Thatcher and her ministers, and there is not much affection in the other direction.

The situation was ripe, therefore, for someone a little more outspoken than the average churchman to say what most of them feel, and what they feel, in essence, is this: however vague and woolly their own ideas might be on the kind of society Britain ought to be, it is not the kind of society Thatcher is trying to build. The Church of England is absolutely committed to the centre

ground, the middle way, the via media in everything, to the extent of predestination. The sixteenth-century Elizabeth Settlement, which established the Church of England in the basic form which exists today, was a compromise for the good of the nation, and those who enjoyed the peace which it brought were able to watch religious warfare on the Continent with a certain satisfaction and relief. The average Anglican clergyman still thinks in that way, and his deepest wish for the nation is that it should mirror the Church, all tensions and disagreements being contained and controlled within the common embrace of harmony and mutual respect.

When the old centre ground of British politics was abandoned by both right and left after 1979, the Church was put in a political predicament. Until then, being 'non-political" meant not taking sides in the rivalry between two parties, each of which was committed to Keynesian economics and the management of a mixed economy, the so-called Butskellism. Being

non-political was easy. Just by standing still, politically, the Church of England has now found itself to the left of the Government, hankering after the consensus politics which Thatcher has scomed. There is no sophisticated political analysis behind this stance - it is instinct. There is a

"Samba, heel," With the finely

Jenkins (left): applauded for reflecting the views of his clergy. Habgood: seeing the Church as a moral binding force

natural sympathy, therefore, for what remains of centrist politics, Alliance, Every time an opinion poll has tried to measure the political persuasion of the clergy in the last five years, it has found the same thing. A considerable proportion of the clergy – some polls have found a clear majority – are pro-Alliance, The Church of England is now the

"SDP at prayer".

In the Church, they say, the laity read the Daily Telegraph, the bishops The Times and the clergy the Guardian, and whatever reader-ship surveys may actually show, this does sum up attitudes rather neatly. The new Bishop of Durham is a Guardian clergyman par excellence, It had to be the Bishop of

Durham who gave expression to the Church's unease. It was he who broke with the convention of discretion about doctrine, just after the announcement of his appointment, by saying what many bishops privately say, and what a generation of clergy have learnt in their theological colleges: that the Virgin birth and similar articles of the faith are not literally true.

It was also inevitable that he would discuss the miners' strike in his sermon last Friday. The clergy of the Government, as being the Durham and elsewhere in the guardian of private and public

North-east are to a man deeply alarmed at the effect the strike is pastoral care., Several senior churchmen wrote to The Times to say so. much earlier in the strike. The most politically reticent bishop would have had to say something: the most outspoken was likely to say exactly what Bishop Jenkins said, for it genuinely represents what the Church in Durham thinks. It is not therefore surprising that the solemn atmosphere of his enthronement last Friday was interrupted, as his sermon ended, by a round of applause - someting Anglicans usually regard as unseemly conduct.

There is another issue which goes deeper than this clash of political temperament, Mrs Thatcher has said on several occasions that one of the primary aims of her political life was to bring about a "moral revolution" in society; in other words, to alter basic ethical values.

At first, in the Church of England, they would smile and remark that "politicians do say such things from time to time". The message has now got through that she means it and this touches the Church on a very raw nerve. It understands itself, not

There has been a gradual reassertion, therefore, of the Church of England's role as a moral bonding force in society. If is, for instance, the repeated theme of the Archbishop of York, Dr John Habgood, most recently expounded in a lecture on local radio (given a wider audience in The Listener). The case is not, as cynics would say, that the Estabished Church is looking for something useful and important to do having lost ground as it has lost members. It is that societies fall inevitably into deeper and deeper conflict unless there is some general agreement about the moral groundrules. Thus marriages will collapse, unless there is general agreement that adultery is wrong, and indus-trial relations will collapse, unless there is general agreement in favour of give-and-take negotiated settle-

It may sound fairly obvious stuff; but Dr Habgood believes these universal truisms are under siege. He has not blamed Mrs Thatcher, and indeed seems to believe that it is a general threat associated with the marginalization of religion through-out society. What he never says, probably because he and all other churchmen would dismiss it as absurd, is that governments can provide a source of public morality in place of the Church.

The Bishop of Durham, in fact, goes one step further along the argument than this. The same sermon which attacked the Government contained an extremely blunt analysis of the Church of England's own standing in society. He seemed to be asking himself whether he really was "Bishop of Durham" in the old establishment sense, or whether he was just a leader of one. not tremendously significant, re-ligious group in that society.

Such thoughts suggest that the Church of England is some way off

from being able to lead the nation toward a moral consensus. In that case it makes sense, not to stand above the rough and tumble of political argument, but charge right into the middle of it.

kis and Zamoyskis on his mother's line, and although there are several younger Radziwills few have married outside the nobility. There have been only three such altiances recently, the most prosperous (it is said with some glee in the family) having been the marriage between Prince Stanislaw Radziwill and Caroline Lee Bouvier, the sister of Jacqueline Bouvier, whose mar-riages to Kennedy and Onassis were to take a rather different route.

Sad stories occur in the family saga - for example, the case of Princess Jolanta Radziwill, who was arrested for trying to smuggle out her own family jewels - but, in general, it is a story of great solidarity in the face of difficulties. For weddings, funerals and christen-ings the families, interlocked through a myriad of marriages, turn out in force. Prince Mikolaj's wedding produced a church full of counts and princes, with a good sprinkling of commoners. Both General Jaruzelski ("Good family" said one aristocrat, "good with figures, excellent estate managers") and his prices minister, Zdzisław Krasinski, are of noble stock, but

they tend not to advertise the fact. Perhaps if they did, their popularity would increase. There is considerable respect, and even pride, accorded to the hard-up nobility by the ordinary Poles. Every year there are cases of commoners claiming falsely that they are descended from one of the major clans. Engravers are kept busy with family crests, historians moonlight by constructing family trees and there is a general fascination with blue blood. This is neither more nor less than a respect for the long history of their country. As Prince Mikolaj recalls, the history teacher at his state school automatically gave him top marks, commenting: "After all, if a prince does not know

they live comfortably, slightly above the average, and although there are still a few rich nobles --notably in the Czartoryski family - the money comes from running successful private businesses rather than inherited wealth. Even so, the princes and princesses have to do their turn in the meat queue, cash in their ration coupons and struggle back to their housing estates with

Communist rule has, if anything, brought the major aristocratic families closer together. Young Prince Mikolaj has both Czartorys-

the story of his country, then nobody does."

Roger Scruton

praised

The intellectual case against modern architecture is acknowledged to be strong. The question is, what to do about it? How should we build, and what should we destroy? A few architects and critics are beginning to address themselves to the first of those questions. A few anti-archilects are therefore needed, to address themselves to the second. Modern buildings of peculiar and symbolic loathsomeness must be singled out for demolition, and the same publicity and resources devoted to their destruction as once were spent in crecting them.

When a building exists, however, thousand otherwise innocent people begin to acquire an interest in its survival. You could not now destroy Le Corbusier's Unite d'habi-tation in Marseilles without a storm of political and academic outrage. Not only will people be homeless (for these are people, it seems, who would rather live in Le Corbusier's building than under the stars); many more will be unable to complete their doctoral dissertations, or will be forced to re-write 20-year-old lectures on the theory of modern design. So how do we begin?

I believe that we must think ahead and plan the demolition of some buildings at the moment of their conception, so as to deprive the enemy of his longstanding strategy of fait accompli. It needs just one acclaimed modern building to be demolished on the morrow of its completion for the public to perceive that the problem can be solved. It will immediately become apparent that it wants only courage to set our civilization again on the path of righteousness.

And in fact the opportunity lies presently before us, devised by a figure who has already several times tipped the balance in favour of reactionary ideas: President Mitterrand. Being monarch in all but name, the French president must establish his republican virtue by some symbolic anti-monarchical esture. The tradition has therefore been established whereby each president, before leaving office, desecrates some part of royal Paris. For Paris is undeniably the greatest architectural representation of the glory of the crown.

President de Gaulle, in authoriz-ing the construction of La Defense, effectively curtailed the triumphal vista which leads from the Louvre in the general direction of America. Pompidou' was bolder, and placed his monument to vulgarity in the Marais, intimate stage of the grand siècle, and the heart of Europe. Mitterrand wishes to go further still, and to vandalize the Louvre itself, by placing a 60ft-high glass pyramid in the Cour Napoleon - the open court which dominates the Tuileries. By this means, he will effectively destroy at the root the imperial flourish which de Gaulle merely clipped at its extremity. The architect is to be I. M. Pei, better known for the extension to the Washington Art Gallery than for the soulless towers in Bleeker Street which oppress Greenwich Village.

The president's monarchical powers are displayed in the haste with which the project was begun. The commissioners for historic monuments (successors to an office held first by Prosper Merimee), were peremptorily summoned in January, and the plans unveiled before them in the course of an hour or two. Mr Pei spoke with the help of a translator, a few slides were shown. and a few bland official observations

The commissioners were flabbergasted at what they saw, a Babylonian fantasy, involving an underground culture-palace linking the wings of the Louvre, dominated by the glass pyramid, and embel-lished with all the vulgarities that come naturally to those who believe in "consumer sovereigniv" over art. Asked to vote then and there, the majority of the commissioners declared themselves against the scheme. It made no difference, however. Work began at once, and the presidential office launched a campaign of propaganda, designed to persuade the ordinary Parisian of the inestimable benefits to himself, to his city, to France and to mankind as a whole, that must inevitably ensue from the new machine à culture. We may therefore expect the Louvre to be desecrated by 1986, in time for the next presidential election.

But here is our chance. Let the Gaullists enter an electoral promise to undo Mr Pei's work, at whatever cost. Let them begin now their plans for the demolition, sign up the contractors for scrap, the restorers. the gardeners; let them undertake to leave everything exactly as it was. Not only would they be sure, then, to win the election. They would also have struck the first decisive blow against the madness of our times, by showing that what has been done, can, if we wish, be undone.

And if it can happen in architecture, it can happen also in politics. When the public realizes this, socialism, enlightenment, progress, equality, every shibboleth that has threatened French culture since the Revolution, will fall from its throne.

Phillip Whitehead

When persuasion must hold sway

What would be the instinct of any red-blooded man in this House, having put his family to all that inconvenience and near-misery, if he saw someone riding roughshod over his picket line. I know what my attitude would be. In fact, I should be worried if this were not the case." The speaker was the young Neil Kinnock, as his biographer Robert Harris reminds us, during the 1972 miners' strike. The words are as eloquent as that long list of maimed males in his genes, in a way which comfortable critics cannot under-

There is therefore a special irony that this Labour leader, of all men. goes to his annual conference under attack for alleged lukewarm support for the bitter battles of today. In the current New Socialist Jean Mc-Crindle, an academic who is at the heart of things with the Barnsley Miners' Wives Support Group, and Peter Hain, of the Labour left, take the parliamentary leadership to task. its role, they say, "must be to understand, explain, and sustain one and all". There has been too much carping over tactics and timing, while "leaders of the labour movement have allowed that obession with violence to muffle their support for the miners' cause'

At Blackpool Mr Scargill will be a towering presence. He will be asking for support - on his terms. Any talk of bailots, or counsel against violence, by Kinnock, will not be welcome: Yet he must say these things. Not because he will win the plaudits of the Tory press. No Labour leader who supports the miners' basic cause, in language no harsher than that of the Bishop of Durham, will avoid being the ogre of the leader writers. Nor must he do so to win nervous middle-class floaters. If it is criticism of the miners you want. Dr Owen's Social Thatcherism will always get there

He must soeak out for the labour movement itself. No other body in Britain, in the last analysis, depends so much on the power of the ballot to enforce change in the name of anonymous millions who are often invoked, but grudgingly consulted. And who stands to lose more, if unity through persuasion is replaced by division through coercion? The issue of ballots will stalk this conference. We are told that if Kinnock dares to commend an NUM ballot he will be "howled down". And his plans for a modest and hesitant extension of the party franchise now seem to be under threat from those perennial comedians of consultative democracy, the TGWU executive.

It is an issue which has bitterly divided the two authentic workingclass leaders who emerged to blunt Hugh Clayton the impact of the Heath government in the 1970s. Jimmy Reid and

Arthur Scargill, It divides a union which, if united, would by now have prevailed. No one should dismiss such concerns as a mere whingeing about tactics, or take comfort in Tory hypocrisy on the issue after the han on unions at GCHQ and the Paving Bill to abolish the GLC.

Similarly with the violence. The stamina and the burgeoning selfconfidence of the striking miners have inspired not just us old lefties. but a whole new generation. It is true that their radicalization has been accelerated by police violence in those areas which are now virtually under occupation. Why not leave it at that, and avert the eyes from the other violence.

"Rough tactics," say McCrindle and Hain, "may not be nice, but it hasn't been nice in the mining areas of Britain for some time now." But where the rough tactics, often used within the working class, put men in hospital, employ weapons that could kill, send children screaming home from school, is there not also a cost in staying silent?

Mr Kinnock will insist, as the TUC insisted, that the miners must not lose. I do not think for a moment that they will. But he would be unwise to be tied to the chariot wheels of anyone, however able or charismatic, who asked for blanket support regardless of means. Even in class wars there should be rules of engagement.

The first should be to unite, and not to divide, the trade union and working- class base which is still the bedrock of the Labour Party, and which would like to see the moral grandeur of a united union forcing the NCB to back off. So too might the majority of voters that is still to be won. It would be disastrous if the franchise, persuasion rather than coercion, the interdependence of ends and means, were to be seen (as one Labour activist described them to me) as "Tory issues." They are

Nor is it the case, as the party's parliamentary leaders may be told, that the electoral road is a write-off, and that the Government will somehow be brought down by industrial insurrection. Those who think they have arrived in Blackpool by the way of the Finland Station may believe it. The truth is that the odds are not hopelessly stacked against Kinnock, As Damon Runyon's Sam the Gonoph said when he put a bet on the Harvard crew. "I long ago came to the conclusion that all life is six to five against". Mr Kinnock's task at Blackpool will be to keep the odds at six to five against, by speaking as a miner's son who is a democrat, and a reasoner too.

The author was Labour MP for

nobility and communist rule

Roger Boyes on the uneasy detente between

The blue blood that helps keep Poland's pride alive

The Warsaw Ghetto, 1944: Prince Janusz Radziwill was arrested for trying to shelter victims of German revenge

from looting by the Russians in the the new ideology, having served his nick of time by a former member of the underground government, Stanislaw Lorenz, was declared the property of the National Museum. For a while, he and other aristocrats lived off the sale or barter of family

The nobility took humble jobs Ignacy Potocki started to make rucksacks, and then became a truck driver ("I was a good driver. I brought my first Ford in 1928, and the following year took part in a 10,000-mile African rally"), others took to farming, one became a waitress, another a manicurist. In the most bitter Stalinist period in the early 1950s, some of the the young generation had difficulties

getting into university.

The dark years have passed but the communist regime and the aristocracy are still uncomfortable travelling companions. One Radziwill - Krzystof - has managed to more or less come to terms with wartime imprisonment with German communists who became his friends. After the war he was even a member of parliament (although he was never a communist) and relatives tend to shake their heads when they talk about the "Red Prince". Family loyalty transcends politics, however, and they regard the old man sympathetically. One Radziwill joined the students'

equivalent of Solidarity. But on the whole the former and present rulers of Poland leave each other alone. The aristocrats have become dentists, doctors, and translators. Prince Mikolaj, who is 26, has proved himself a good administrator by organizing tours of Poland by the British faith healer Clive Harris. His father is connected with a publishing company; his grandmother, the much respected Princess Maria Radziwill (known as

the Iron Princess) translates technical texts from English and French. By the standards of ordinary Poles

Day of challenge for the rate-capped Tories

fun. The mumbo-jumbo behind it is comprehensible only to those versed in the darkest mysteries of local government finance. Its impact will be felt more through reductions in council services than through an

easing of rates. The saplings in the park will wilt from neglect and the municipal cleaning lady's mop be hung up for the last time before the citizen feels that the rates burden has been much lightened. But rate-capping could soon make an interesting spectator sport for students of political tactics.

The battle lines are clearly set. On one side stand ministers, several Conservative councillors and many business interests. They see ratecapping as the only way of curbing the high rates bills charged by some Labour-led urban councils. On the other side are the Labour councillors and their beneficiaries who see their task after a Labour general election defeat as using local authority powers to redistribute local rev-

Rate-capping simply means using legal powers to place a ceiling on the spending of councils considered by ministers to be the most extrava-PHS gant. It also means fixing a level above which they are not allowed to raise their rates to finance high spending.

be wrung on the sidelines by a collection of ex-ministers and Tories from the shires. They are alarmed at the way in which ministers heap up a collection of powers which quietly and remorselessly reduce the influence of locally elected politicians in local affairs. The rules of the battle are simple.

Each side must seek victory by outwitting the other. Mr Patrick Jenkin, Secretary of State for the Environment, needs to convince his supporters that he can force down the costs of high spending councils. His opponents in Labour councils need to turn the success he will claim in the spring into a palpable Piquancy is added to the contest

by the fact that neither camp is quite sure how far the other will go. Will Ken Livingstone of the Greater London Council really risk disqualification from office and even imprisonment if and when he defies the Government next year? is the Government really prepared to use the full weight of the law against Labour councillors in Liverpool who threatened to charge an illegal rate this year? Will the Government really go to the extent of enacting a new law to try to foil Labour councillors like Ted Knight, leader of Lambeth council in London? He and others say they will defy capping next year by refusing to levy rates at all. The proposed law would allow the Government to fix rates for. authorities in such cases. One of the unknown quantities

which will help to determine the outcome of the battle is the strength of Conservative distaste for the process of rate-capping. The Government has chosen 18 councils for next year. 16 of which are controlled by Labour. In a preliminary skirmish Jenkin has tried to persuade them to use the right of appeal that he inserted in the ratecapping law. They refused to do so because the law is so framed that a successful appeal triggers off heavy Government intervention in the affairs of a council.

The 16 Labour councils ear-

marked for rate-capping decided to boycott the appeals system. The Government, realizing that it was futile to try to crack the resolve of hardline councils in London. approached authorities outside the Thamesdown. includes Swindon in Wiltshire, is one of the councils which have been

quietly lobbied by ministers. A special council meeting to consider the Government's coaxing produced a solid Labour majority against an appeal with some opposition support. Most of the Conservative councillors abstained.

Another key test will take place today when Portsmouth City Council, the only Conservative-led council among the 18, holds a special meeting to decide whether to appeal Anything less than a strong majority for an appeal will make the Government's elaborate machinery look redundant.

There could be yet more embarrassment for ministers tomorrow when Basildon district council in Essex unveils a survey of itself. Basildon dubbed "Moscow down the Thames", was a certain target for rate-capping. It therefore invited the Audit Commission, a quango established by the present Government to monitor efficiency in local administration, to investigate. The cagerness of the town's Labour councillors to publicize the results of the survey suggests that it will not confirm Government views that the authority is spendthrift and carcless

with the ratepayers' money.

GIVING PEACE A CHANCE?

President Reagan should be well pleased with his current speechwriters. The text they provided for his use at the UN General Assembly vesterday could hardly have been better suited to its time and place, Without modifying the substance of his position on any point, or even soft-pedalling his general principles, Mr Reagan managed to strike the right note of respect for the independence of non-aligned states, combined with urgent conciliatoriness in his approach to the Soviet Union.

There was, it is true, still something of an admonitory tone in his reference to Nicaragua, which he called on "to abandon its policies of subversion and militarism ... and to establish democracy at home"; but so there was, and much more to most of the Assembly's taste, in what he said about South Africa, where the United States considers it "a meral imperative that ... racial policies evolve peacefully but decisively toward a system compatible with basic norms of justice, liberty, and human dignity."

Mr Reagan mentioned such controversial points as "periodic and genuine elections", and the right to form and join trade unions, to own property, to emigrate from and return to one's country, to enjoy freedom of opinion and expression, but he did so in words borrowed from the Universal Declaration el Human Rights and without mentioning any particular violators. In a rather curious aside, he suggested that "the treatment of peace groups may be a litmus

test of a government's true desire the Soviet leadership into a for peace" (is there any working international definition of a peace group?) but again without specifying which governments would fail the test. One can think of some on Mr Reagan's own side of the east-west divide.

He also mentioned "tyrants and murderers" who, "in the end ... always fall". But these too went unnamed, and the quotation was tactfully fathered on Mahatma Gandhi – a gesture to an important non-aligned nation whose ties with the Soviet Union are friendlier than most.

In short, there was nothing to give offence to any Soviet statesman who was not actively looking for it. Not even Dr Sakharov was mentioned by name, let alone the "evil empire". That is as it should be, not so much because the election is only six weeks away as because Mr Gromyko is expected in the White House on Friday, and because Mr Reagan must hope for the beginnings of a genuine discussion with him on some other items in the speech.

America approaches that discussion in confidence that it has "repaired its strength", as Mr Reagan put it. The strategic defence programme may not provide a foolproof defence of the civilian population, as Mr Reagan seemed to imply in his "star wars" speech, but it does threaten to impose an unbearable strain on Soviet resources if it is to be effectively countered.

That being so, America can afford to be generous. She is also well-advised to be, since the world has no interest in backing

corner from which it might seek to break out by desperate regional adventures. Hence the proposals for "periodic consultation at policy level about regional problems, and also for a new overall machinery of US-Soviet cooperation, including regular ministerial or cabinetlevel meetings which might, if they get somewhere, provide "the kind of progress" that would make a summit worthwhile - when the Soviet side has found a leader capable of representing it at that level.

Courteously, Mr Reagan gave credit to the Soviet side for proposing new talks in Vienna. Ever so gently, he expressed his disappointment that those talks did not start "on the date originally proposed by the Soviet Union" and reiterated the essential American sticking-point; demilitarisation of space, ves, but offensive weapons must be discussed as well and the aim must be "substantially lower levels of nuclear arms" on both sides,

Smarring from their defeat over the "Euromissiles", the Soviet leaders have not yet been willing to accept that. Yet they must know by now that there is no chance of getting a freeze only when and where there is an imbalance in their favour. There are some signs that they are looking for a way out which will not be too obviously a climbdown. If that is the spirit in which Mr Gromyko goes to Washington, yesterday's speech suggests that he should find Mr Reagan in a helpful frame of

A NEW LOOK AT CLAUSE FOUR

"A society in which a higher percentage of productive capacity is owned by the state is unlikely to be highly efficient or truly free." The words are not, on this occasion, from Mr John Gummer or Dr David Owen, but from Mr Roy Hattersley, deputy leader of the Labour Party warming up for the conference. Lest it be concluded that the new consensus has dawned over a landscape of Mrs Thatcher's choosing, mark what Mr Hattersley went on to say. He was discussing public ownership. He wants more, but he wants it different: an increase in "social ownership", not an extension of nationalization along Morrisonian lines - the difference is ciathed as being that the birst diffuses wealth and influence while the second concentrates them in the hands of ministers and civil servants.

The Labour Party re-examines its policy for public ownership once in every decade according to Mr Hattersley. One certainly recalls the re-examination of 1959-60 when Gaitskell opened the subject after his party's third successive defeat in a general election. He too affirmed that "the extension of the public sector will not necessarily take the form of what people call oldstyle nationalization - the setting. up of fruge state monopolies by Act of Parhament." But Gaitskell fouled up his mitiative by

impugning clause 4 of the party scripture; so 25 years later it is still necessary for Mr Hattersley to begin where Gaitskell had begun, by weaning his party away from that model of nationalization.

Social ownership is the preferred Hattersley term. A place is conceded for the continuation of old-style nationalization in the case of public utilities. "Basic industries on which the whole economy depends" ought to remain under the control of central government, though neither they nor the forms of control are specified. "Strategiwithin them a nationally controlled company. For the rest Mr Hattersley looks to the creation of "autonomous socially owned companies". These might be by single-firm nationalization ostensibly to inject competition into oligopolies (banking, brewing, building materials are mentioned); or by local authority sponsored companies of the kind the government is about to put a stop to when it winds up the metropolitan counties and their enterprise boards; or by workers' cooperatives.

It is about the last of these that Mr Hattersley has most to say, believing that they will supply a missing stimulus to efficiency by reason of the more obvious than

usual stake of the workforce in the success of the enterprise they work in. All these extensions of social ownership into manufacturing industry will be expected to operate with competitive efficiency.

All this leaves the Labour Party with plenty to bite on in the way of public or social ownership, as is appropriate. The emphasis on efficiency and competition ("we cannot afford, politically or economically, to use the public sector as the casualty clearing station of the free enterprise battleground") gives the old nostrum an up-tocally sensitive industries", like date look. Workers cooperatives oil and airlines, should have ought to find a place in the future of presently nationalized industries. What is more Mr Hattersley is pushing at a creaking door.

The ideas he has developed were present in a weaker form in his party's notorious 1983 manifesto, and have reappeared in the executive's document "A future that works" to be debated at the conference next week. Their most immediate and contentious application is to the extent of Labour's out-of-office commitment to renationalize what Mrs Thatcher has been and will be so smartly denationalizing. The Hattersley logic is that the commitment should be selective and sparing. That is the point at which the left will attack him.

DISINFORMATION AND EDUCATION

All education is a battle to capture the minds of the young. The essential question, therefore, is what those minds are to be captured for. In the Soviet Union, education exists to impart knowledge and skills in a manner designed to condition the minds of the next generation to accept the communist system. as the only society lit to be leved in, damning all others. That there could be alternative views about that system is inconceiv-

In the United Kingdom, however, as in the democratic West generally, the nurpose of education is to bring out the best in each individual, to impart knowledge and as much wisdom. as is possible, and to win the minds of the young to sustain a society that is free and responsible, operating a democracy through parliament. The supreme but necessary paradox of such a society is that it freely admits the right to argue against it and in layour of systems that would destroy it. It is the inculcation of such intellectual freedom that is the most precious feature of Western education, but it is also the aspect of it that is most vulnerable to exploitation.

Open argument against the democratic system is easy enough to deal with. What is much harder to handle is the covert inductrination of children, between the lines of their formal instruction, against the society in which they live, on the grounds that it is violent, greedy, selfish, inhumane and warlike. Nowhere is this conditioning

more blatant than in what are do not. The political system called "peace studies" in which political indoctrination masquerades as education and free discussion. A report just published, "Peace Studies" in our Schools: Propaganda for Defencelessness, by Dr John Marks, is an invaluable account of the methodology of "peace studies", its political motivation, the organizations which promote it, and not least its vocabulary.

The peace educators have their foothold not only in schools, but in the universities where the educators are educated. The Bradford School of Peace Studies, which runs both postgraduate and undergraduate courses, is perhaps the most conspicuous example but there are others also involved in teacher training. A number of local education authorities have made it their business to promote "peace education" and the ground is well covered by such organizations as Teachers for Peace, with its special school peace-packs, which comes under the umbrella of CND, and exists to promote unilateralist and pacifist thinking in schools.

A wholly new vocabulary of "peace education" has been contrived. Thus violence becomes "structural violence" which can cover anything from bad housing, poor educational provision and unemployment to imperialism. the arms race and the international monetary system. Studies of areas of conflict are highly selective; Northern Ireland and South America qualify for inclusion: Alghanistan and Poland conventionally

within the Soviet Union, its nature and institutions, and its implications for the rest of the world clearly do not merit serious discussion. Certainly there would be no possibility that any pupil would learn from this kind of teaching that the Soviet Union (as Russian dissidents themselves have testified) value the "peace movement" in the West precisely because its objective is to disarm democ-

With an emotional emphasis on the horrors of a nuclear war, peace educators seek to delude their captive audience that only the existence of Nato nuclear defences are an obstacle to peace. No attempt is made to explain that the object of Nato and its nuclear defences is to preserve peace against Soviet expansionism. No attempt is made to discuss what, in the light of Soviet theory and practice, the Kremlin would do if the West disarmed unilaterally

What is to be done about the subversion in the classroom is far from clear, not least because far too often there are no witnesses to its practice. But at least the facts are beginning to come out, and to form a basis for discussion. Those who value the attachment of the next generation to democracy and to its defence, whether they are politicians, parents or teachers, have been warned and should be wary. The next generation is at the receiving end of a malign disinformation campaign, and it would be the height of folly to assume, for the sake of a quiet life, that this does not matter.

The same party which delights in

Polish clergymen and trades union-

NORMAN SMITHERS.

From Mr Norman Smithers

From Lord Hailsham of St Marylehone, CH, FRS Sir, The Bishop of Durham is

reported as saying that the Chairman of the National Coal Board should be denied employment inter alia because he was alleged to be an imported American".
Discrimination in such matters

on grounds of national or racial origin and incitement to racial hatred are supposed to be against the law of this country.

I have an interest in this matter.

My mother, like the late Sir Winston Churchill's and the mother of the present Earl of Stockton, was also an "imported American" and I am proud of this fact.

I do not know how the Bishop of Durham would defend his language were he brought before the race relations authorities or the courts, or whether he would have used similar expressions had he believed that Mr MacGregor (who is in fact a native Scot returning to his native land) had been "imported", with a dark skin from Asia or Africa.

But it is possible to hazard a guess as to what the founder of the Christian religion, who did not approve of double standards on the part of ecclesiastical authorities. would have said about the Bishop of Durham.

Yours etc. HAILSHAM, House of Lords.

From Mr R. W. Mott

Sir. Why the fuss about the Bishop of Durham's sermon?

In the light of the Gospel message the bishop examined the behaviour of all concerned in the dispute - Mr MacGregor, Mr Scargill, ministers, the pickets. All were weighed in the balance and found wanting all were exhorted to mend their ways.

What is wrong with that? It is the duty of a bishop to call sinners to repentance. How else does Mr Fairbairn think he can save their souls? Yours faithfully,

R. W. MOTT. 136 Lakenheath, Southgate, N14.

From Dr David W. Felce

Sir, The squeals of outrage coming from some Conservative members of Parliament at the remarks made by the Bishop of Durham on the miners' dispute during his enthronement service betray an interesting ambivalence to clerical intervention in politics.

Community loyalty

From the Bishop of Warwick

Sir, David Walker's article (September 18) starts well by unpacking some of the ambiguities of that tortured concept we call "com-munity". I remember a sociologist offering to provide 90 definitions to choose from. But he goes too far and leaves us with a bleak prospect of seifishness.

Maybe its vagueness "must make community a fragile basis of public policy", but must it also mean that politicians can no longer expect people to "sacrifice themselves for the sake of their residential community", as he states? If so, the whole all-too-fragile basis of our society (another easily parodied concept) is doomed.

Failure to understand community lovalties has much to do with the miners' strike. Failure to cherish the same roots

of community is turning thousands Coventry, West Midlands. Licensed to drill

From Professor A. D. G. Smart Sir. I am surprised that none of your readers has commented on the Energy for oil exploration in four estuaries close to the shore. (The Times, September 7).

One of these is the Solent, an area of national, even international importance for recreation and wildlife, and, of course, a busy shipping lane. The West Solent coasts of both Hampshire and the Isle of Wight are designated as areas of outstanding natural beauty.

As I understand it, the local authorities responsible for landward planning in that area first beard of the decision to grant licences virtually from press reports. Considering the care with which another Government department, the Department of the Environment. has been handling the question of oil licences in the adjoining New Forest - after a public hearing they decided that there should be a presumption against exploration in future - it is very disconcerting to find that an entirely different view prevails in the Department of Energy both on the principle and on procedures. At the very least there should have been consultation with local authorities, preferably after an opportunity for the public to

mment on all aspects of the national and local interests involved. Very little seems to be known

locally about what impact exploration might have on these inshore waters, and as someone who is familiar with the Solent and some of the other estuaries where the licences take effect, I am most apprehensive about the risks that Liberation theology

From Mr Des Keenan

curing them, both by laying on hands with faith or, more humbly, pouring on the wine and the oil. The

Sir, Dr Black's letter (September 15) neatly encapsulates the strengths and weaknesses of the approach. Jesus was concerned with the

poor and the sick, but his mission was not to eliminate either poverty or disease. If it were, the Father would have sent more than 12 legions of relevant experts. No. his selective miracles were expressly stated to be "signs" (semeia) or other-wordly supernatural realities. The poor and the sick would be always with us. but Christians were to show forth in their bodies the

power of the spirit until the end of

time by tending the sick and even

Christian ministry of healing is therefore both an effect of possession of the spirit of Jesus and a sign of our supernatural destiny.

For the Marxist, however, war against poverty and ill-health is intended to show something entirely different, namely that through class solidarity and class struggle the inefficient and exploitative relations in society which cause poverty and ill-health can be overthrown, and the primitive paradise re-established

on this earth. This part of Marxist eschatology seems to be derived from Jewish sources (rather than from Christian

For and against the Bishop of Durham Cautious approach to active defence

From Lord Chalfort

LETTERS TO THE EDITOR

Sir, Professor Lawrence Freedman's intemperate assault (September 21) on your leading article (September 19) is not an especially distinguished contribution to the "serious debate in this country on the Strategic Defense Initiative" which he claims to be seeking. Among the fraternity of strategic thinkers and military scientists to which you refer in your article Professor Freedman is well known to be a persistent critic of the concept of active defence. It would be a pity if over-passionate advocacy led him to become the Tam Daiyell of "star wars". Professor Freedman bases his

argument on the premise that the article, as identified by him, are false. On the contrary, your assertion that the American pro-gramme is at an early and vulnerable stage is in no way invalidated by Professor Freedman's comments. (The successful test in June this year referred to in his letter was an anti-missile test, without direct relevance to research into lasers, charged-particle theams, space-based platforms and other technologies related to anti-satellite or ASAT systems.)

The active defence research programme is under constant attack from the Soviet Union and although this does not of itself demonstrate its desirability, it does justify your conclusion that it is too soon to discuss these matters with the Soviet Union, whose principal aim in all arms control negotiations is 10 maximise its own advantages and to inhibit the United States from any research or development which might provide more effective deterrence or defence against Soviet

The second proposition to which Professor Freedman directs bis criticism concerns a matter of considerably more substance. Although his suggestion that you were, in your leading article, wrongly preoccupied with the interceptor itself" seems to me unjustified, he is right to point out that effective strategic defence is largely a matter of the number of interceptors, their invulnerability to counter-attack and their capacity to achieve successfully a large number of complicated interceptions. However, he goes on to do precisely what. he accuses you of doing, namely, to skirt around the issue. What Professor Freedman neglects to point out is that it is precisely these problems which the current research programme is attempting to solve, not entirely without success.

A "layered" defence system including space-based platforms and multiple interceptors designed to knock out attacking missiles at any stage in their trajectory from launch.

through boost, mid-course and terminal phases, and capable of

destroying 99 per cent of an attack is theoretically attainable and it would clearly increase the effectiveness of defence and therefore the credibility of deterrence. It is, indeed, strange that some of the most strident opposition to the Strategic Defense Initiative comes from those who have been loudest in their condemnation of a deterrent posture based entirely on the threat of suicidal retaliation. Much of it, too, arises from a mistaken belief that the deployment of ballistic missile defences is being proposed, rather than a programme of research designed to assess their potential

You are, therefore, right to insist that the arguments against the Strategic Defense Initiative, however sincerely they may be held by some of its critics, should be treated with reserve until the research programme has demonstrated what possible. The experience of the last twenty-five years should have convinced us all of the folly of predicting confidently what will or will not be technically possible in five or 10 years' time, It is surely common prudence to determine, through a programme of serious scientific enquiry, whether it is possible to shift the balance of advantage between offensive and defensive systems and so move away from the crude calculus of "mutual assured destruction".

There is convincing evidence both in its programmes and in its strategic doctrine that the Soviet Union devotes substantial resources to the operation and modernisation of defensive systems, both active and passive. It has, indeed, already tested a ground-based anti-satellite system. There is, on the other hand, no evidence that if the United States were to refrain from developing comprehensive ballistic missile or anti-satellite defence systems the Soviet Union would do likewise; and those who advance the emotive argument that ballistic missile defence would provide an umbrella for the superpowers, while leaving Europe undefended, should reflect on the probability that one of the first applications of active defence might well be against intermediaterange missiles.

President Reagan would be abdicating his responsibility not only to the citizens of his own country but to those of the West as a whole if he were now to be deflected from the course he outlined in the Strategie Defense Initiative. Yours sincerely.

Liverpool's 'agony'

From the Secretary, SAVE Britain's

Heritage Sir. Mr Peter Wood's letter (September 18) is less than fair to SAVE Britain's Heritage. Our recent report on Georgian Liverpool was intended problems affecting historic buildings in the city. It was not intended as an attack on the city council, except in so far as that body is failing in its duties as guardian of Liverpool's

Our criticisms of some of the council's policies which inevitably affect historic buildings were accurately reported in your columns. To date, there has been virtually no response from the council to these

Had our purpose been to publish a general survey of architectural conservation in Liverpool, the achievements of the county council would have received honourable mention. In Merseyside - and indeed in Greater Manchester, the

West Midlands and Tyne and Wear the metropolitan counties have come to play a vital role in conservation.

SAVE has made known to the Government its serious concern about the consequences for the heritage of the abolition of these authorities, in terms both of funding and of the threat to established and expert planning teams. The Government has said little to allay our fears.

The logical conclusion must be that politicians of all parties (with a honourable exceptions) place little importance on the architectural heritage or indeed on the "environment" in general. Liverpool, however, provides a prime example of the influence of architecture on our lives and the consequences of the illadvised and destructive policies of the recent past. Yours sincerely. KEN POWELL, Secretary. SAVE Britain's Heritage. 68 Battersea High Street, SW11.

September 19.

'True' interest rate

From Mr T. R. Elliott Sir. On September 13 you reported a warning from Mr Michael Bridge-man. Chief Registrar of Friendly Societies, that the practice of some building societies of quoting in their building societies will cease to be exempt from the advertising reguadvertisements " "true annual rates" of interest, a rate known as APR' could mislead investors and that he preferred the quotation of the

contractual rates of interest. The Consumer Credit Act 1974, enforced by some 1.500 Institute of Trading Standards Administration members employed by local authorities, has a primary aim of establishing and maintaining truth in lending". The corner stone of this policy is the adoption and statement n advertisements, documents, quotations etc of a universally compar-able rate of interest, the APR. This concept, the annual percentage rate of charge, provides a standard measure to help consumers compare one type of credit with another and one trader's terms with another.

When the Consumer Credit (Advertisements) Regulations 1980 were introduced building societies were exempted from their provisions and it became apparent that because the building societies' advertised mortgage rates were calculated on a different basis than that leading to an APR, other

129 Bluebird Walk,

This is the nub of the question of

mortgage granters, such as the banks, whose advertisements were controlled, were suffering a commercial disadvantage since their rates, based on the APR, appeared higher. This situation will be remedied on ptember 1, 1985, when the

Since it is to be hoped and expected that the APR will become increasingly familiar as time passes it seems logical to extend its use into

whilst it is true that confusion will reign where one society quotes solely a contractual rate and another solely an APR surely the one essential rate for the investor is the true rate of interest which he will receive and that is the APR. Yours faithfully,

T. R. ELLIOTT, Chairman Fair Trading Standards Committee, Institute of Trading Standards Backford Hall. Cheshire. September 14.

Penny-pinching

From Mr Philip S. Newell

Sir. In the spate of correspondence about the decimal system and its inadequacies, no one has yet pointed out to you, Sir, that it has led The Times into ungenerosity - indeed meanness - that would have been unthinkable had we wisely adhered to our duo-decimal system.

When the daily Portfolio prize of £2,000 has to be divided between three players, you tell us that each has received only £666.66. What Sir, are you doing with the twopence you save? For a few months you could still at least give each a further halfpenny, but in the days of empire you could have kept your bargain Yours etc.

PHILIP'S. NEWELL. The Athenaeum, Pail Mall, SWI.

How molecules bridge the communication gap

One of the most difficult large and more easily manipu-questions which biologists are lated. trying to answer concerns the way the cells of a newly used in the experiments did fertilized embrye develope. not develop normally,

How do cells know which part ing that important infe

Various approaches have been adopted by research teams. A group of two British and one American scientist has produced suspicion that cells in the early embryo communicate in a coded equivalent to a biochemical language. The information they er is vital to the later development of the embryo into

The idea for some form of communication emerged when images obtained from electron microscope analysis of cells revealed filaments providing a bridge-like connexion between them. Further research showed that these bridges, known as gap junctions, allowed an exchange of small molecules between the two sides.

a mature individual.

The purpose behind the exchange of molecules is sug-gested in the results obtained by Dr Anne Warner and Dr Serah Guthrie, of University College, London, and Dr Norton Gilnia of the Baylor College of Medicine, Houston, Texas.

Their explanation comes from experiments in which they found a way of switching off gap junctions. The work was done with frog cell embryos, which are a frequent choice for laboratory work because the cells are unusually

Tadpoles from embryos of the person or animal they are regulating normal develop-intended to develop into? ment had been prevented from being transmitted between cells.

Dr Warner and her colleagues identified a way of first culturing an antibody sub-stance that would attack the protein from which gap junc-turns are formed. The antibody was then injected into one particular cell of an embryo when that embryo consisted of only eight cells. Later, one of the daughter cells of the first

one was injected with a yellow

The test was to observe whether the daughter cell transferred the dye to neighbouring cells, which it would have done had the parent not been given antibody. Transfer of the dye did not

occur, and this interference with the gap junction stopped the transmission of other molecules. As the embryos continued to

grow, it was clear that tissue from the original cell injected with antibody was abnormal. Detailed analysis demon strated that neighbouring cells derived from a different parent line were also affected. What remains unanswered

is precisely what the cells are "saying" to each other via their biochemical code. Source: Nature vol 311 pp. 127-131, 1984,

"massive", embracing as it does it may be considered for him the whole drama of creation. His parents had migrated to the USA many years before his birth; but his mother always returned to Bears for the birth of her surviving Charles forced with the surviving Charles for the surviving Charles for

mythical figure of Orpheus and Emmanuel spent three early the real one of the German goet years in his parents' adopted country, but he returned to the care of his material grandmother in Gan, and thereafter to that of his uncle, a teacher at a Catholic school in Lyon which Emmanuel attended. He had mother to the party in Gan and study Holderlin: he is a Christ who remained very much a victim of Nazi-like atrocities, which apptinued to haunt Emmanuel

But his very varied and self-tormented works, always experi-mental although uninflationed by fashionable movement, did wanted to stay in Gan and study Latin, but, he recalled, was "uprooted and condemned to become an engineer" in a society which he found excessional and particular matters and particular matters. oy assuemante movements did not always get their full the: This was not because at times he lapsed into a frigid or diffuse rhetoric (as he himself acknow-ledged) but because, having been a fellow-traveller with the ively puritanical and narrow, When he visited his father in America he found him a Communists during the 1940s, stranger, and returned to Prance he decisively rejected Commu-to become a teacher. he decisively rejected Commu-nism soon afterwards, By 1958 he had become a Gaullist and stranger, and returned to France artistic life was his meeting with such a writer as Louis Aragon rejected not only the man, for his alleged apostasy, but also the Catholic poet and novelist Pierre Jean Jouve. He destroyed most of his poems after this meeting and in 1938 began publishing new ones. his works.
Emmanuel worked for

French radio from 1945, and became a celebrated cultural After a first volume, Elègies (1940), he published a collecentrepreneur and, latterly, a spokesman for what may be described as the anti-commu-nist, liberal and humane point of view. He also lectured extensively all over America fame, Tonibeau d'Orphèe (1941). By the time of his death he had written over forty more books, poetry, essays, lectures, his remarkable autobiography and in many other parts of the world.

Qui est cet homme? (1947), translated into English in 1951 as The Universal Singular, and Emmanuel received the grand prix de poésie of the Académie Française in 1953. During the war he was renowned as one of the great was a member of the Academic Francaise, an honorary Doctor of the University of Oxford and poets of the Resistance. He had been bombed out of his house at Pontoise in 1940 and, with

MR JAMES FAURE end he had to think about

Sir David Opt writes: The death of Mr James Carnelis Adriasn Fause, aged 85, after a short illness at his home at Aldbury, near Tring. Herts, on September 15 recalls the difficult days of feeding the nation in wartime and the important part he played in it. Jimmy Faure was born in Holland where his father, British (South African) subject was a Protestant minister. He. came to London at the age of 17 in the Fitst World War to join his brother's tirm of oils and

tion which catapulted him into

one novel,

fats brokers and remained with the company, H. M. F. Faure & Co, until the start of the Second World War, when the the buying of commodities was taken over by the government and food rationing began.
On his own initiative, he

formed a wartime association of National Association of Seedcrushers, to ensure that they worked in the nation's interests with the Ministry of Food.

Later in the war, as a colonel in the Dutch military, he was asked by the Dutch Government in exile in London to prepare plans for setting up civilian/military administration commuted between London and Holland by private military

restarting his career as a city broker but instead accepted an offer to join Unilever as head of its Oils & Pats Buying Depart-ment to organize and prepare for the decontrol of commodity buying by the government. He remained with Unilever for 18 years, during which time be travelled the world to buy vegetable oils and fats for the group's soap and margarine

known and respected in his profession. A special characteristic was the charm and courtesy he brought to all his personal relationships. His expertise in his field was readily given to various trade associations in both the UK and

Faure had a special interest in the therapeutic value of sport to the disabled. He made a valuable contribution to this as chairman of the Board of Management of the Paraplegic Sports Endowment Fund and was instrumental in the development of the international games for paraplegics in each region of Holland as it at Stoke Mandeville in the late was liberated by the advancing 1950s and early 60s. As Fund Allied armies. At that time he chairman he accompanied Britain's 57 competitors to the first Commonwealth Paraplexic lane. games at Perth, Australia, in As the war was coming to an November 1962.

SIR DENIS BLUNDELL

GCVO, KBE, OBE, QSO, who died yesterday in Australia where he was on holiday, at the age of 77, was Governor-General of New Zealand from 1972 to 1977, and was a former New Zealand High Commissioner in London. He was also one of the foremost members of the legal profession in New Zealand. Edward Denis Blundell was

born in Wellington in 1907 and educated at Waitaki Boys' High School, Oamaru, South Island; and Trinity Hall, Cambridge. A distinguished cricketer he gained his Blue for the University in 1928 and 1929 and he was later to represent New Zealand in 1936-37. After the war he was prominent in cricket administration as president of the New Zealand Council, 1957-He was called to the Bar by

Gray's Inn in 1929 and in that year, too, he was admitted barrister and solicitor of the Supreme Court of New Zealand as a member of a prominent Wellington legal firm where he became senior partner. During the Second World War he enlisted as a private in

Sir Denis Blundell, GCMG, the New Zealand Army and was sent to Europe with the 2nd New Zealand Division. Here he distinguished himself in service during the campaigns in Greece Crete, the Middle East and Italy rising to lieutenant-Colonel and commanding the division's 23rd - Battalion. He was appointed OBE (mil) in 1944.

After the war he continued with his legal career, being president of the New Zealand Law Society from 1962 to 1968 and when in the latter year he was appointed New Zealand High Commissioner in London it was the first time that this from outside the ranks of politicians. During his period in London Blundell was active in trying to mobilize British public opinion in an attempt to stiffen the British Government's resolve in the direction of protecting New Zealand's position in the negotiations to join the EEC. At the end of his time in

London he was appointed Governor-General of New Zealand. He had been created GCMG in 1972 and GCVO in 1974. He was also appointed a Companion of the Queen's Service Order of New Zealand.

LORD GRANVILLE-WEST Lord Granville-West, who

died on September 23 at the age of 80, was Labour MP for Pontypool from 1946 to 1958, when he was created a Life Peer. Daniel Granville West was born on March 17, 1904, the

son of a miner, and was educated at the University College of South Wales, where he read law and won first prize in the law examinations. He was admitted a solicitor in 1929, and practised at Newbridge. He was a member of the Abercarn Urban Districts Council 1934-38, and of the Monmouthshire County Coun-cil 1938-47. During the Second

World War he served in the RAFVR.

He was first elected MP for Pontypool at a by-election in 1946, and held the seat until his elevation to the peerage. He became senior partner in the solicitors' firm of D. Granville West, Chivers and Morgan.

He married in 1937 Vera Hopkins, and they had a son and a daughter.

Correction

In the obituary of Mr Roger Fleming published on Sepincorrectly given as Mr John Fleming.

New World Wines: Thursday, 27 and Friday, 28 September at 1 p.m. each day, King Street: This is our first sale entirely devoted to 'New World' (as opposed to European) wines. Many of the lots will be offered without reserve, thus providing an unprecedented opportunity to purchase inexpensive wines for everyday drinking as well as some of the

great New World classics. Covering some 210 different wines/ vintages from 70 different wineries in California, Australia, New Zealand and South Africa prices are expected to range from under £2 a bottle to around £15 for rarities. Avery's of Bristol, the sale's principal vendor, have for many years fostered an interest in New World wines. John Avery, that well-known judge at wine fairs and competitions in Australia and New Zealand, selected personally on the spot during his visits to those countries, to California and to the Cape and these are included. Three other firms, two of whom also specialize in Californian and/or Australian wines, are also presenting wines for tasting and sale. Entry by application. Studio Sale: Harry Bush (1883-1957) and Noel

Laura Nisbet (1887-1956): Friday, 28 September at Il a.m., King Street: Next in a line of Studio sales stretching back to Gainsborough and Reynolds will be the 186 lots from the studios of the late Harry Bush and his wife, Noel Laura Nisbet. Together and separately they exhibited regularly in Glasgow, Bournemouth, Liverpool, Southport, Bristol, Brighton, Derby and other galleries. Their difference of temperament was reflected in their work and in their approach to iz. Noel-extrovert and with boundless energy, first coming to prominence in the First World War when she illustrated five books of fairy tales, legends and stories from the classics. Harry's work reflected his retiring personality, quietly observing what was around him in south-west London and noting the skies, sea and trees of his holiday haunts in the

West Country. The Phelps Collection of Worcester Porcelain: Monday, 1 October at 10.30 a.m., King Street:

Brigadier Douglas Phelps has had a long association with Christie's. Working in the Ministry of Defence during the war he lived for much of the time a few yards from our premises in St. James's, and was active in helping us salvage what we could from our burning premises in the early hours of April 17, 1941, when we suffered a direct hit. Forty years later he has returned and saked us to sell his collection of Worcester which we will do next Monday. In the interim, Brig. Phelps has concentrated his collection on the coloured wares of the middle period (1765-75) and in so doing formed a representative selection of over 200

pieces. Wares decorated in the atelier of James Giles were later additions and include a femilie-de-choux' plate in the Sevres. style, a bowl painted with exotic birds and a mottled puceground coffee cup and saucer. Other decorated pieces include an extremely rare tapering oviform vase painted with a bird on a tree dating from about 1760 (est. £1,500 to £2,000). A mixed property sale of English Porcelain and pottery will be held at 2.30 p.m. Entries for next sale close 8 October

19th and 20th Century Illustrations: Monday, 1 October at 5 p.m., South Kensington: Due to the success of the first sale devoted to the work of 19th and 20th century trators on 4 June, 1984, Christie's South Kensington are to hold another similar sale. The sale will contain works by such artists as E. H. Shepherd (the illustrator of A. A. Milne's Winnie the Pooh' series) and Kay Nixon (illustrator of children's books) with a collection of watercolours. There are also some designs for 'Seaside Postcards' by the delightfully ribald artist Donald McGill and an interesting collection of pen and ink drawings by John Byam Liston Shaw, the majority of which are illustrations from 'The Pearl Maiden'. Other artists featured in this sale include René Bull, Harry B. Nielsen, William Russell Flint, Archibald Webb, Frank Reynolds, George Belcher, Fongasse, Edmund J. Sullivan, Louis Wain and

Sale on the Premises

Mary Gold.

Castle Hill, Englefield Green, Nr. Egham, Surrey: Monday, 1 October at Il a.m.: Nearly 600 lots make up this sale of furniture, objects of art, carpets, pictures, ceramics, books and household furnishings. Highlight of the furniture section is a George III mahogany library bookcase (est. £6,000 to £10,000). Other Georgian pieces include a set of twelve mahogany dining chairs of Chippendale design and a mahogany architect's table. Objects of art include a charming bronze of a putto, signed Henry Dasson as well as a pair of French bronze groups after Clodion. The picture section includes exchings, lithographs, watercolours and oils by Thomas Bush Hardy, Benjamin Williams Leader, R.A., and Thomas Miles Richardson among others. The ceramics feature English, Continental and Oriental types and there are of course the general items that one expects. to find in a country house sale.

For further information on these and other September October sales please contact 01-839 9060 for King Street or 01-581 7611 for South Kensington.

Imaginary landscapes between painting and sculpture

Overtones of surrealistic vision in Nick de Ville's Northern Latitudes No 1

Classical skills as a draughtsman: Wyndham Lewis's Woman with Red Tam O'Shanter

Heinz-Dieter Pietsch Paton

Nick de Ville/ Graham Ashton Fischer Fine Art

Jean-Marc Prouveur **Edward Totah**

Henry Moore Marlborough Fine Art

Wyndham Lewis Anthony d'Offay

Not so long ago, it was reasonably easy to distinguish between painting and sculpture. There were some artists who did both, but they usually kept the two activities quite distinct and the borderline cases of painted sculpture or dimensional painting were few and far between. If the present era in art has any one distinguishing feature, it is a constant blurring of distinctions; we are never quite sure whether what we are seeing is fringe theatre or performance art, basic television or nrtist's video, a poster poem or a sculpture, so why should we imagine that such an elementary distinction as that between painting and

sculpture should be preserved?

And, sure enough, it very often is not. The hazy borderline can be more readily observed than defined in the work of a number of very London. How, for instance, would you describe, let alone define, the work of Heinz-Dieter Pietsch, at the Paton Gallery until the end of the week? His chosen medium is usually paper pulp, with or without paint or supports or anything else, made in such a way that the pieces can hang on walls. Sometimes in his cartier work the painting on the paper was very elaborate, in a trompe-l'ocil fashion, so that one really could not tell how many of the bumps and declivities and apparent changes of level were actually there.

His newer works, in this show, move further over towards sculpture: one of the pieces, Sails (two rough blackened triangles with metal supports), stands directly on the floor and Stretchers, four sections aping hospital stretchers that have been through fire, flood and battle, leans nonchalantly against a wall. Other works are more like paintings and the sketches for them are undoubtedly drawings and most expressive drawings at that. Whatexpressive drawings at that, what-ever they are, the message is in the medium and, even with the possibility of more human, emotional content (the artist, apparently, sees the Stretchers as conceivably "warriors gesturing skywards"), finally the fascination of these pieces for, make no mistake, they are fascinating - comes from wonder at the way Pietsch has tormented paper into looking like rusted metal or tattered fabric, into, indeed, doing anything he wants it to do.

The show of Nick de Ville at Fischer Fine Art until October 5 is at least firmly called "Recent Paintings", while that of Graham Ashton Watercolours". Both descriptions are true, and yet the sculptural element in both cases is very pronounced, Ashton, after all, is perhaps better known as a sculptor, and the two themes celebrated in these watercolours are tools and the development of the concept for the waterless paddling pool at the Liverpool Gardens Festival. As it happens. Ashton is a very ac-complished watercolourist, and even the ideas for the sculpture take on a the ideas for the sculpture take on a quite independent air (as they roll along the promenade, of course) of what Paul Nash saw in Swanage, seaside surrealism, Toddlers' Playground, for instance, is perhaps closest to the project as carried out, and we its clearly applied washes and yet its elegantly applied washes make it simultaneously the most

painterly of paintings.

Nick de Ville is a more complicated case. For one thing, his habit of embedding wire in the rather glutinous surface of his panel paintings already takes them some of the way towards sculpture, and in a different sense the paintings themselves often seem to be not so much sketches for sculpture as detailed depictions of some already existent sculpture in an imaginary landscape. Sometimes one can see overtones, here too, of a surrealistic vision: in Northern Latitudes No 1, where mysterious wooden constructions, some equipped with winders, scatter a morne plaine, one may sense the (probably malign) spirit of de Chirico breathing down the artist's neck. In others the construc-

tions seem larger, as in Wayside, where letters and other shapes are held aloft on plinths, or Leaning Arch, where a giant colonnade goes slightly askew. The obvious next question is, having developed these imaginary sculptures and abstract buildings, will de Ville go ahead and actually construct them? Surely the urge must be there, somewhere in his artistic system?

The works in Jean-Marc Prouveur's show War Memorial (Edward Totah Gallery, to the end of the week) would also no doubt have qualified as sculptures by the somewhat elastic criteria of last ware. Hayward-and-Scrpentine sculpture show. They are large photographic pieces, generally in several sections, which comment on war mainly in terms of the First World War and the memorials it inspired. The constituents are of sections of some famous and less famous memorials, and posed live tableaux involving banners and oddments of militaria with a nude (usually male) placed in the centre. This is, of course, a variation on the range of imagery familiar from Prouveur's previous show, Altar Picces, but here it has a curious relevance: it is as though Prouveur were setting out to gloss (though I do not think he is) Paul Fussell's brilliant book The Great War and Modern Memory, with its slow-building insistence on the inextricability of trench experience and homo-eroticism. Prouveur's work ought to be camp, but somehow, because of this occult appositeness it achieves a quite straight impress-

rough Fine Art we come at last upon a real sculptor - they do not come any more real than Henry Moore keeping his hand in with work which is admittedly marginal to his main usually laconic inscriptions, images artistic concerns, cannot be separated from them, yet has an obstinate, unquenchable life of its own. The show, which is on until October 19, consists of nearly 60 drawings done between 1979 and 1983. There are detailed studies of his favourite animals, sheep. There are sheets of tiny ideas for sculpture that could not be anyone's but his. There are what look like stage designs, domestic sketches (some with the obsessive motif of mother and child), hands... There are also some rather strange drawings of people looking at rocks; two ladies in sensible hats, artists drawing, a sculptor (perhaps the sculptor) making a close examination of rock formations. There is little that takes Moore or us into new territory (though he has seldom treated the

before), but much to give deep pleasure even to those who do not know enough to be touched by this extraordinary example of inspiration refusing to be quieted even well into the artist's eighties.

Wyndham Lewis was never, as far-as I know, a practising sculptor, but on the evidence of many of the drawings in the resplendent exhiottom of his work during the Twenties at Anthony d'Offay (until October 12) he really should have tried it. A suprising number de the drawings could be designs for sculpture such as Lewis's Vorticist associate Epstein might have pro-duced had he followed the experi-mental line of Rock Drill instead of retreating into more conventional forms. This is true of most of the Abstract Figure Studies and Abstract Designs: the complex totems, planted in bare surroundings which give them dimensionality, suggest all the qualities of sculpture, and at the same time imply the possibility of

we fail to recognize (except perhaps somewhere in the collective unconscious) would converse in a language of the spheres.

Other, portrait drawings, either of the known, like Osbert and Sacheve-rell Sitwell and Ezra Pound, or of unknowns like the Woman with Red Tain O'Shanter, offer eloquent testimony to Lewis's more classical skills as a draughtsman, and there are complicated but decipherable scenes like the informal sporting series such as Boxing at Juan-ics-Pins and Wrestling (of the Highland variety presumably, to judge by the witty way Lewis has of suggesting tartan) which are painterly through and through. As usual, the personality which emerges from the show is antipathelic, but there is no denying Lewis his own sort of genius, and one of the most genuinely modern as well as highly individual sensibilities in the whole of twentieth-century

London debuts What's in

a name? The group Four Composers exists to promote the music of its own members, but only one of their number, Peter Thompson, plays as well as writes. Curiously he is also the only one of the four to have, on the evidence of those of his works heard in this concert, absolutely nothing to say. And he says it in a tonal, derivative but nevertheless stylistically uncertain way His Elegaic Ballad for solo

cello, played not very well by himself, meandered to no effect while the interest in three piano by himself, lay only in their titles: "Russian Fragment", "One Page Najad Music" (what?) and "Boling Hill"

Thankfully his colleagues

produced more compelling material. Donald Bousted's Alone and Three Miniatures. both for solo clarinet, are beautifully wrought, unam-bitious works tailored exquisitely to their essential decorat-ive purpose. Rodney Smith played them exceedingly well. Nigel Benson showed himself capable of similar concentration in his Cadenza for trumpet and piano and his Fantasia on "Spiritus Domini" for clarinet. trumpet, cello and piano, The latter work was an attractive processional crowned with a violent *Pli selon pli-*like gesture that abruptly stirs the music from the mysteries of religious ritual to wakeful stark reality. Boulez again was evoked in Andrew Newton's Trumpet Sonatina, in which a plethora of highly varied ideas and jerky fits and starts came together to

To judge from the American pianist Roger Press's nervous, snatched reading of Beethoven's Sonata Op 109, one might have thought him to have chosen an over-ambitious programme. But underlying his playing even here was a power and an intensity that he allowed to come to the fore in Rachmani-nov's Corelli Variations, Op 42. And Prokofiev's Seventh Sonata, with its obsessive moto perpetuo finale, was quite breathtaking, with Mr Press willing to take risks and still emerging very much the master of this formidable work.

form a piece of compelling

logic.

The Aranjuez Guitar Trio confess to feeling irony in the fact that between them Spain's three great Romantic composers - Albeniz, Granados and de Falla - wrote only one piece of guitar music. To correct the imbalance, one of the players. Alexander MacDonald, has transcribed a selection of keyboard works by the three for guitar trio. The versions are admirably idiomatic and the fact that there are three players does go some way towards alleviating the characteristic thinness of the guitar's sound. The playing in this recital was exceptionally well polished, and there was an almost uncanny sense of ensemble. Music clubs

need not hesitate. Stephen Pettitt

FINANCE AND INDUSTRY

Executive Editor Kenneth Fleet

Germans lead while other central banks dither

IMF meetings have a track record for exchange rate crises. As all eyes focus on the collar and the Deutsche Mark, finance ministers in Washington are becoming increasingly Delphic on the matter of intervention policy. The code phrases are 'disorderly markets" and "smoothing".

this required for

A Section of the section of manager of the last the first the

. NI HOLAS TRADERS

PART PRINTING ABIET

Priviles

These I Ing the circumstances in which, according to the communiques of successive economic summits, central banks responsible for the worlds leading currencies will intervene in the foreign exchange markets.

Some governments, however, have itchier fingers than others. The Bundesbank sold dollars again yesterday. Other central banks remained muted and uneasy as to whether yesterday's market could legitimately be described as "disorderly", and whether they considered intervention

to be justified. The Bundebank has put them all in a bit of a fix. The Federal Reserve Board plainly does not want to intervene more than it can help. On Friday the markets let. the Fed off the hook, taking the dollar down a peg before New York opened. Yesterday too, the Bundesbank's action was enough to depress the dollar in European markets. But the dollar is still an unpredictable commodity - and inter-vention is less convincing if it is not

The Bank of England is staying as much as possible in the shadow The Fed cannot. It wishes to avoid an open disagreement with the Bundesbank, but that is not easy! Herr Karl Otto Poehl has made increasingly plain the German view that the dollar now can and should be turned. Everybody is still insisting that their policy onintervention has not changed, but a changing world is throwing their differences in interpretation into sharp

If all the flutter in the currency markets made you think we now live in a free floating world, take a look at the IMF's annual report. This shows that of 147 member governments, only eight have currencies which are neither pegged for managed according to a declared exchange-rate policy. Can you name the eight? If you can instantly recall more than three, you are one up on the managing director of the IMF. They areZ; Australia, Canada, Japan, Lebanon, South Africa, Britain, United States and Uruguay.

The threat of the big institutions

Mr David Walker, a director of the Bank of England, yesterday pointed a perceptive finger at significant changes in emphasis in decision-making among company directors and leading investors. Speaking at a gathering organized by Deloitte Haskins & Sells and the London Business School, he said that the rate of return companies required to justify a new venture was probably rising, at a time when investment decisions, by companies and investing institutions alike, are being taken "with a shortening focus."

"Many boards which distinguised themselves as cost-cutters, and as survivors, may neither sufficiently perceive the change in their situation nor be capable of steering their way to take advantage of it. They may be biased, if they take any initiative, in the direction of acquisition of an existing business rather than embarking on a wholly new product line of their own." Having noted that accountants seemed to think in a similar

vein, he went on: "Moreover, most boards are, or at least believe themselves to be, under strong pressures to produce good short-term earnings and dividend performance." This risks introducing a bias against R & D and in favour of capital projects yielding a

to bear on retailing.

nothing as much as an unwanted takeover bid. The fund managers, particularly those of the 20 investing institutions which each have an average per cent of the equity, are seen to have almost the power of life and death in their freedom to hold or sell in a bid. Like the companies themselves the fund managers are being pressured into shorter term views, "Risk aversion" has driven them to pursue short-term performance even though their liabilities are long-term. And as Mr Walker noted, changes taking place in the securities business are likely to bring horizons even closer. If dealing costs do come down and opportunities for block trading increase, interest in the faster buck will grow

Mr Walker, who is closely involved in the City revolution shares the now fashionable regret that too many of our resources are now being thrown into financial services, which are "remote from the production of goods and services and generate high private rewards disproportionate to their social productivity, He just feels that Britain has no choice if it

He is more positive on the conflicts inherent in the short-term market assessment of company performance. The suggestion is "some form of contact with the board, above all with the chairman", where the "effective husbandry" of the investment calls for it.

Probably the most important role that the proprietor can play in this respect is in signalling his interest in the overall composition of the board, including a sufficient leavening of good non-execu-

The Bank of England has taken up the cause of the non-executive director, or to be more accurate, the good non-executive director. There are plenty of the former, few of the latter in British boardrooms. Even the best of them can be stifled by lack of information. Mr Walker was right to stress yesterday the role management accountants can play in strengthening the non-executive's hand with detached and professional advice.

Options trading looks more attractive

Now that they rather staid New York Stock Exchange is to introduce options trading it is perhaps time again for London to look at how it might stimulate business in this increasingly popular investment medium.

New York will begin trading options on individual shares - not just the new-fangled stock market indices - before the end of the year. London started trading options on the new FTSE-100 index earlier in the year to coincide with the launch of the index futures contract on the London International Financial Futures Exchange. The volume of business has not been impressive. The challenge posed earlier by the successful European Options Exchange in Amserdam was not met. largely, it was claimed, because of adverse

tax rulines.
Two background considerations may mean that the chances for equity options trading in London have improved. One is the lobbying by the commodity industry, lead by the London Commodity Exchange, to have capital gains on futures transactions, treated a capital gains, not as income. There is a strong analogy with the tax problems encountered by options.

The second factor that investors are increasingly attracted to options. The idea that you make only a down payment withou the risks of horrific margin calls the concept of high gearing - is much better understood than it was. Even corporate treasurers, long suspicions of currency futures, have taken to currency

STOCK MARKET REPORT

De Zoete set to predict Enterprise still haunted by £1bn profits for ICL flotation fiasco and RTZ

By Derek Pain

De Zoete and Bevan, the will sell Ho-Jo to its American be free of problems, particularly broker, may be on the verge of joining the Imperial £1 billion club. Many leading brokers have already come to the that Imperial conclusion Chemical Industries, regarded as an indicator of Britain's

billion in profits this year. But not the team at de Zoete. It has resolutely held its forecast just below £3 billion. The last published prediction was

economic health, will top the £1

£990m. However, the broker has been peering into ICI's traditionally mexciting third quarter. Trading, it is concluded, has been going well, suggesting that the long expected downturn will not now occur until well into next

De Zoete has yet to formally apprade its profits forecast but it now believes that estimates below £1 billion are "slightly conservative",

In its last full year ICI produced profits of £619m. At the interim stage this year profits were £532m. The expected de Zoete

upgrading - modest, but signifi-cant - failed to have any impact on the ICI shares yesterday, which have been strong recently on persistent American buying. They drifted, in a dull, lacklustre market, falling 2p to

At the close the FT 30-share index was 8 points lower at 863.4. The threat of an all-out pit shutdown overshadowed the calmer pound and the move towards lower transatiantic

The FT-SE 100 share index was also lower, falling 4.9 points to 1,122.1 points.

P & O was again a weak market. On Fridy Panmure Gordon, the broker, tried and failed to place 1.5 million shares. Until the line is cleared dealers expect the price to remain hesitant. Yestrday the shares fell 4p to 284p, Another FT 30 index con-

stituent, Imperial Group, was back in form, hitting a peak of

Imps started the day with a 3p rise, then drifted before gathering pace just before the close. There was some suggestion of American buying inspired by hopes that the group had agreed the sale of its Howard Johnson catering and hotel group. Talk is that Imps that "the current year will not

management.

If the deal goes through at about the expected price it would eliminate Imps' borrow-

Foseco Minsep, the specialist chemical and mining group, edged forward 1p to 179p. A dramatic advance in interim profits is expected. Government stocks closed

with gains of up to £14 with some of their earlier enthusiasm eroded by the failure of sterling to maintain its strong performance on Friday. Manor National, the garage group, held at 11p after C. D.

ramail, the ambitious Ford Main dealer which came to the market four years ago, revealed it had held takeover talks with the company.

The Irish oil twins, Bryson and Eglinton, have developed into a trio with the arrival on the 163 (3) market of Osceola, which is rum by Eglinton managing director, Mr Enimoti O'Connell. and like the others has a stake in the Colombian exploration. All three shares moved up yesterday on word that the latest drilling there is going well. Bryson announced a small profit for 1983 and a one-for-10 scrip issue to be followed by a split of cach 20p share into two of 10p. Eglinton is the most exposed to Colombia, while Bryson has the better spread of other interests.

The discussions have now been ended, but Bramall says it is holding on to its 5.7 per cent Manor National shareholding purely as an investment".

in recent years, Manor National, created from a merger of Manchester Garages and Oliver Rix, has had a difficult time. A £1.2m profit in 1979 has since been replaced by losses totaling just over £1 m. In the first half of this year the company lost £23.000.

On the other hand, Bramali has remained well in profits, achieving £2.1m last year. S. W. Wood continued to reflect last week's sharp trading

AGB Research ws unchanged at 302p, despite the chairman's warning in the annual report

turn round, rising a further 5p

as the lead time for some major projects, in international markets, is long". He adds that the year has, however, started

satisfactorily.
Shares of Anchor Chemical ings and leave the group sitting Group closed 9p down at 156p. after a fire early yesterday morning at one of its warehouses. "I would have thought this was an over-reaction," said an Anchor spokesman. Although the warehouse and contents were badly damaged, the main production plants were still intact, he said. Sun Alliance, the insurers, estimate the damage to

be worth £1.8m. The spokeman added that the company did not expect any disruption of supplies to its customers. Anchor has plants in Italy and the US which should be able to make up for stocks destroyed in the fire.

terms of the flotation of the shares in the Wates City Properties are to be announced today. The broker Rowe & Pitman, acting for Wates say about 40 million shares will be offered for sale with the expectation of raising £35m to £45m. The discount to net asset value will be below the sector average of 23 per cent reflecting the strength of the portfolio which comprises office developments and investment in the City of London.

Chubb, the security group, remained a nervous market falling 4p to 264p. The unwanted Racal Electronics' bid still hovers and the failure, so far, of a white knight to appear could mean that Racal has merely to add a few coppers to

House of Fraser, the stores group, jumped 8p to 276p on suggestions that Seagram Co., the Canadian group which ranks as the world's biggest wine and spirit group, is about to enter this City soap opera. Cash-rich Seagram could, it is argued, buy the Lonrho stake and then bid for the rest without the slightest strain on its resources.

Interim losses cut Hestair, 3p to 49p, but Superdrug gained 5p to 33p on its 28.5 per cent profits gain.

Equity turnover on Friday was valued at £289,753m with bargains listed at 16,357. Gilt transactions were 2.686. Total number of UK and Irish shares traded was 152.1m.

TEMPUS

from Enterprise Oil were the first as a private company and with no comparable trading period for last year it is tempting to ignore the figures. Perhaps more than any other company the key to Enterprise lies not in what is has done but what it intends to do in the future.

When the company was privatized, one of the main thrusts of the Enterprise story was that the nature of its operations was set to change substantially. So, while the interim figures were generally pleasing net profits were £23.3m, it is the future strategy which is of more interest.

So far there has been no great move forward in terms of exploration and development or an extension of its overseas interests. A meagre £300,000 of exploration spending in the first half, with the consequent increase in the tax charge,

illustrates this.

The last thing which Enter-prise should do is react to external pressures to speed up its development programme. There are tremendous opporfunities to throw away money in the US which should be carefully avoided. However, the company cannot rest too long on its laurels.

Perhaps the most likely course of action is that Enterprise will make its move by way of an acquisition with the target being one of the independents. London and Scottish Marine Oil could be a potential partner.

Until the specific direction that Enterprise is taking emerg-es, there is little likelihood of the shares doing too much. The City is still very conscious of the floration fiasco and RTZ's uncomfortable presence underpins the company. An acquisition, using paper, would dilute this holding which must make it an attractive proposition to Enterprise's manage-

This reluctance towards Enterprise was demonstrated yesterday when its illiares slipped 2p to 199p. Some would say that yesterday's results warranted an uplift in coming.

the price but was not forth-There were technical arguments for a rise. The profits were broadly in line with expectations and the first half

was not too distorted by the

dollar strength. In the second half, the company will see the benefit of improved production which is ahead of forecasts and will make even further gains on the dollar With cash flow also shead of forecast, there seems little to worry about apart from the crucial question of what Enterprise will do with the money.

Freemans

The fortunes of Freemans, the mail order group, are improv-ing. After trimming its network of agents by 15,000 last year, in response to poor trade the company is building up numbers again and there should be more than 600,000 agents by the end of the year.

The increase in agent has allowed Freemans to recapture some of the sales volume it lost last year. At the interim stage, turnover was up to £176.8m. an increase of nearly 9 per centl of which half was due to volume improvement, This helped taxable profits, which

rose to £9,2m. There was also an improvement in margins, but this was due to an unexpected change in sales mix, brought on by a surge of spending on womens' fashionwear, rather than as a result of cost cutting or

productivity.

After the hammering which Freemans' bad debt provisions received during the recession. the levels have stabilized. The benefit which the company saw last year through a reductriion in the amounts which has to paid and provided on bad debts will not therefore be repeated this time.

Neither is it likely that last year's drop in stock write-offs will feature this time. However, the company

should be able to make about £19m in the full year. This is expected in the share price. unchanged yesterday at 130p after a brief surge to 128p. There is little to go for in the

Boase Massimi

Pollitt

Boase Massimi Pollitt, the advertising agency that came to the market in May 1983, continues to thrive on steadily rising spending on advertising, particularly television advertising which accounts for up to 70

per cent of BMP's revenue. The company is, however, doing better than the industry

The Advertising Association expects a 15 per cent rise in spending this year, but BMP has just reported a 46 per cent increase in turnover in the six months to June 1984 and a sparkling 81 per cent rise in pretax profit to £1.09m.

New accounts won this year are worth £16m on an annualized basis - including the Greater London Council's presumably short-term business - against lost accounts worth £4m.

Trading magins are being maintained at 3.5 per cent against an industry average of 1.5 per cent, putting the company on course for taxable profits of £2.2m this year, 33 per cent up on 1983. Tax is falling thanks to the Budget, and on a 47.25 per cent charge the prospective p/e ratio is 23 on shares up 5p at 520p.

The shares hit a new high a 530p against a launch striking price of 315p. BMP is on a premium rating but its per-formance so far has amply justified it.

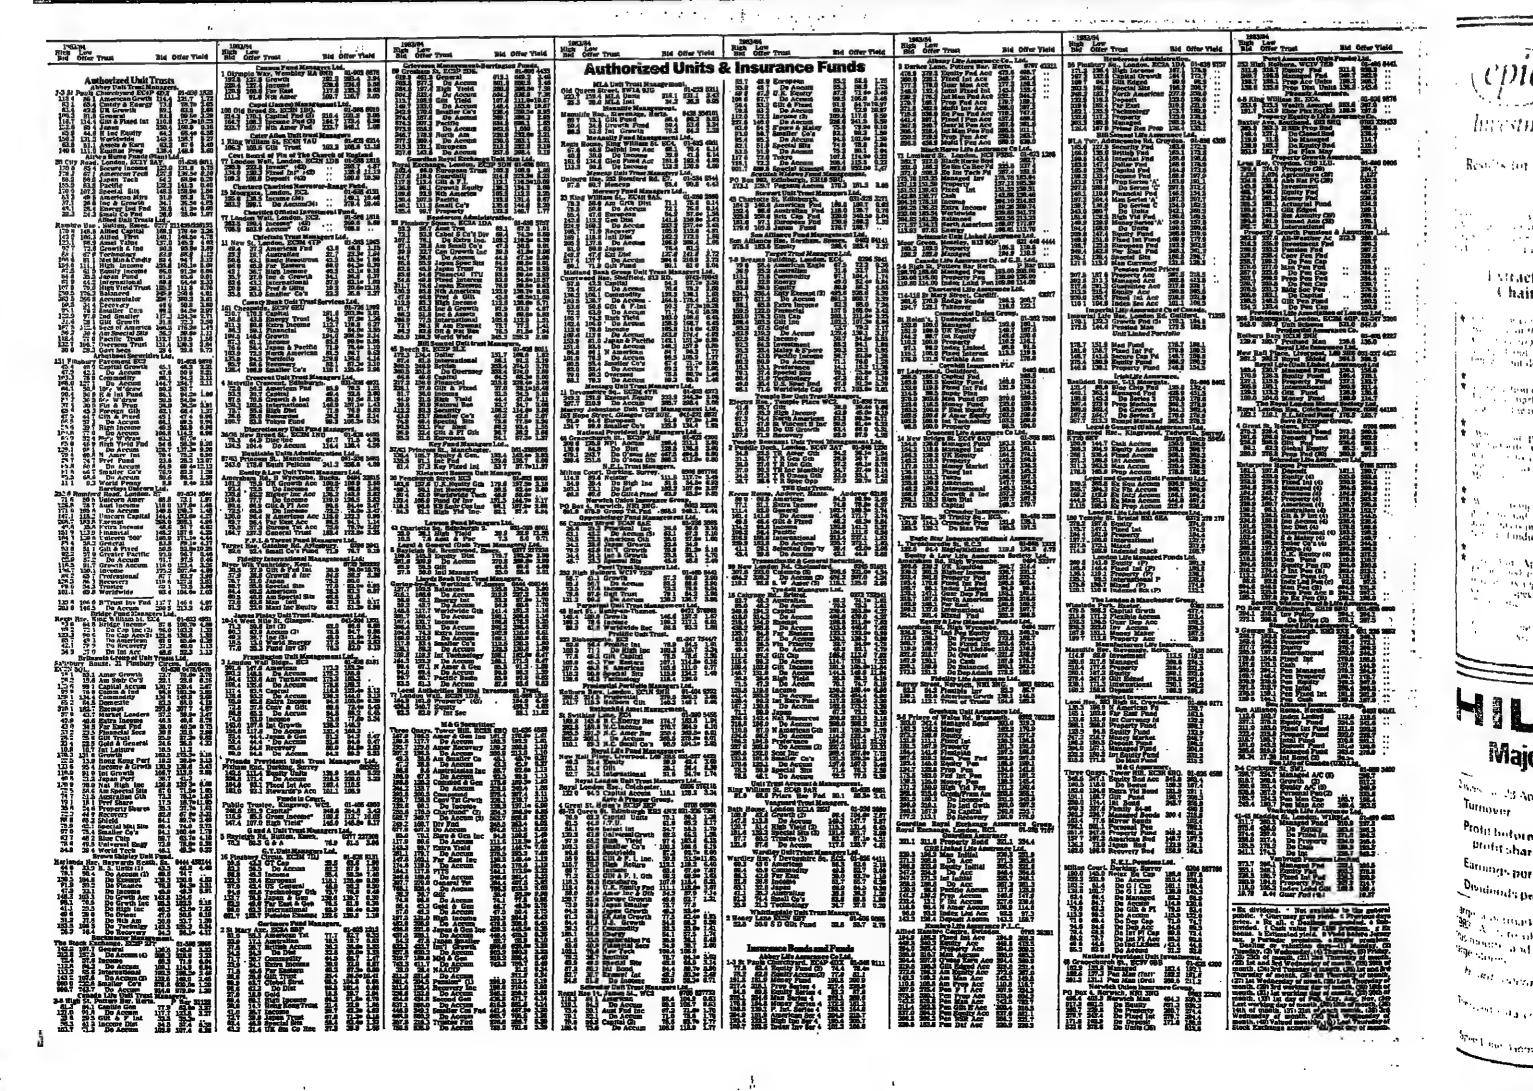

Hestair

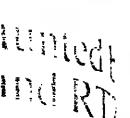

The market was sufficiently surprised by Hestair's news of a shock half-year loss to knock the shares down from 52p to 44p at one time. But it turns out that the City was right to be sceptical of last year's takeover Duple, the coachbuilder. What some people sensed then, and the Hestair board admits now, is that a range of material information, from stock levels to projected orders, was overstated significantly.

The upshot for Hestair has

been a loss of £101,000, compared with a £1.3m profit at this stage previously. Share-holders will take heart from the decision to maintain the interim dividend. The total payment is still uncertain, but we are assured that there will be a return to profit at the year-

More worrying than the Duple horror is the collapse of African and Middle Eastern buyers for the Dennis special purpose trucks. Even though the group's employment bureaux and toys are said to be doing well, trading in the shares is destined to be nervous for the next year at least.

Nathan helps Parker Knoll to £3.2m for year

depend on lower morigae rates

Parker Knoll. after three to £1.5m after lower sales in a (now only one remains from ears' struggle, has made a market which worsened. profit from Nathan Furniture, the cabinet maker it acquired for £655,000 in 1981.

Nathan cut its loss last year from £764,000 to £104,000 and showed a profit of £7,000 in the

The improvement at Nathan helped Parker turn in full-year profits yesterday of £3.2m, against £3.1m, but the results from the other four main divisions were down.

This year the textile companies are expected to continue to show the improvement which appeared in the second half. Nathan should remain profitable and Mercia Weavers. the carpet company, should return to profits after last year's

Extracts from the statement by the Chairman, Mr L. C. T. Cottrell

- The year was one of further increased activity, and controlled expansion of the investment portfolio. We have very little unlet accommodation and since the year end, we have completed the letting of our scheme at Leeds and have virtually completed letting of our development at the Lawnhurst Estate, Stockport.
- Construction of the Camberwell Shopping Centre is under way. The Supermarket is prelet and we are in discussion with retailers regarding the remaining space.
- Whilst our portfolio throughout the country has performed satisfactorily, we have continued our policy of giving increased weighting to our holdings in the South of England and have contracted to purchase a site for industrial development in
- We are taking opportunities to raise the standard of our existing portfolio and the relurbishment of office premises in Glasgow and Leeds is proceeding. Similar opportunities are being taken in respect of industrial premises.

At 30th April last, the overall portfolio was valued at £50,407,000 to give a net asset value of 190p per share. This outcome is regarded as very satisfactory and further increases can be expected from the completion of our development programme.

FINANCIAL SERVICES

How to build public confidence in buying shares over the counter

By Robin Hodgson

Practitioners and customers have parts to play in putting flesh on a framework for self-regulation

The Business Expansion Scheme, which permits taxpayers to offset against their personal income tax the costs of investments in companies whose shares are not listed on the Stock Exchange or traded on the Unlisted Securities Market was the spark that lit interest in the development in Britain of an Over-The-Counter market.

At the same time, the changes promised in the Stock Exchange, including the phasing out of single capacity and the development of a new quotation system (SEAQ) closely modelled on the National Association of Securities Dealers' system for Ameriemerging in Britain.

This prospect has in turn focused attention on the reguconcerned, this is far from the house sponsoring a listing on commission rates, settlement

cation of proper codes of investors in the market, is vital.

whether, given the relatively small size of the market, such a self-regulatory system needs to be part of a much broader framework. The Granville Over-The-Counter market. which is the largest in Britain in terms of market capitalization. now trades in the shares of 25 companies which are capitalized together at about £180m.

The volume of trading arising out of such a market would not be sufficient to justify an claborate externally-imposed system of regulation. What is required is an internally-imposed self-regulatory system, whose details and methods of operation are publicly available,

Granville's self-regulatory system is in four main sections. First, there is the information provided by companies at the time of listing. Much of this is thought of similar markets laid down in the prospectus provisions of the various Companies Acts. Our practice is to ensure that the initial flotations of public companies latory position of existing flotations of public companies British OTC markets. The general assumption is that because no claborate supervisory structure exists, no regu. Companies Act, and which is lation is taking place. Certainly therefore in no sense inferior to as far as my company is that provided by an issuing and provides information on

mation to be provided by the company during the period in which a market is made in its conduct to safeguard both shares. Clearly it is important companies traded OTC and that investors and potential investors alike should be provided promptly with all the What still has to be decided is necessary information to enable them to make an informed judgment about the prospects

> Proper codes of conduct to safeguard both companies and investors are vital

There is also the need to ensure that certain restrictions with insider dealing. Granville has developed a comprehensive undertaking which, backed by specific undertakings given by the directors of the company seeking the listing. provides an effective regulatory Thirdly, there is the need for

potential investors to understand clearly the terms on which the OTC market maker pro-vides his service. We have produced a simple booklet explaining the advantages (and the disadvantages) of investing through the OTC market. Part of the booklet deals with

the standard terms of trading

potential investors in advance

of their first dealing. Fourthly there is the need to ensure that the position of the market is clear at all times. Not only does this require the maintenance of first class records of all trading activities. but also the establishment of codes of conduct governing the activities of the market maker's staff. For example, Granville has an absolute prohibition on members of staff dealing in any of the company's OTC shares.

As the OTC market expands and particularly, as bigger players take part, can a system of the kind I have described hope to be sufficient? Our general view is that it cannot, Accordingly, we have been cooperating with the National Association of Security Dealers and Investment Managers (NASDIM) in the efforts of that body to establish rules and procedures for NASDIM members who wish to create Over-The-Counter markets.

Much of what Granville has done independently will be subsumed into a future NAS-DIM system. NASDIM will thus wish to examine and possibly pre-vet, prospectuses of initial offerings to the public. It will certainly wish to lay down rules as 10 the contents of such prospectuses and of circulars relevant to the secondary

the Stock Exchange or the dates, procedures for delivering which will be extended.

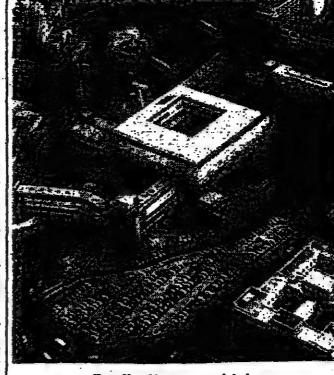

Unlisted Securities Market. and receiving securities and widened and changed as circulated and changed as circulated as circulat certificates. It is sent to all cumstances require. NASDIM clearly to clients the terms under which services are pro-

The most significant development could come in the fourth area, since NASDIM is likely to want to maintain centralized dealing records. Accordingly, NASDIM members will pro-vide to the NASDIM secretariat a record of all transactions undertaken in shares for which they are maintaining an Over-The-Counter market, both by date and time of day at which

the trade occurs. This will provide the raw material for NASDIM investigators to unravel any sequence of events which may indicate that NASDIM's code of behaviour has been infringed, it will be in addition to the spot check to which every NASDIM member, is already exposed.

The moral must then be that members of the public who wish to use Over-The-Counter markets should find out whether the market maker they intend to use is a member of NASDIM and whether the firm has already adopted rules to meet NASDIM's requirements. If the answers to both questions is yes then dangers from malpractice should be negli-

The author is managing director of Granville & Company and The Granville general under-taking will disappear into a Association of Security Dealers NASDIM general undertaking and Investment Managers.

'That's the difference'

When it comes to developing a new overseas market, few things can save as much time as the right introduction to the right person.

And offering you that, is just part of the Standard Chartered difference.

We're part of the economic life of over 60 countries; so we can be unusually helpful in spotting business opportunities, as well as guiding you through the problems.

And once you've got the business, the difference continues to be just as useful. With 1,900 branches

With fast communications, we can make effective cash management a reality. With 18 currency dealing centres covering the world 24 hours a day, we can offer you some remarkably professional and competitive dealing.

And with the rest of our services, developed over 130 years' specialisation in financing international trade, we can offer you a practical and profit-orientated approach to overseas business that

will match your own. Discover the difference. Call any Standard Chartered Bank branch for details.

worldwide, we can speed payments very substantially. Standard 3 Chartered

Balloon goes up on the software

From Chris Rowley New York

When the American magazine Personal Software folded this summer its publisher Robert Lydon said "one reason is that in the spring of 1983 there were about 4,000 companies advertising software products. That number is now less than 1,000". Indeed the US microcom-

puter software market this year s like some kind of real life Dragon's Lair. Venture capital balloons have exploded wholesale leaving customers bereft and magazines unpaid for a lot of advertising space.

A shakeout in software had been predicted for months. It was inevitable, especially since a good 80 per cent of the now vanished concerns were pursu-ing the IBM PC pot of gold with yet another integrated spreadsheet and word processor packag

Software developers have also spread out in the hunt for the next chart topper. A lot of firms have recognized that there's good money to be made in more specialized software,

in more specialized software, retailing to fewer customers than the chart toppers, but selling at prices of £5,000 to £10,000 rather than £400.

Good examples of this trend are programs like "Prophet", a financial management program sold by Union Planters Bank of Memphis. For £6,500 customers buying the asset liability management model receive service agement model receive service and fraining on an ongoing basis, besides the program itself.

"Prophet" runs on the IBM PC XT and some IBM compatibles. In addition there are modules specifically designed for five-year planning (£2,300), rate risk analysis (£900) and budget planning (£1500). According to one happy customer "Prophet takes the place of five or six people sitting in a room doing the same thing. Saving in salaries is enormous".
Then there is Executive of

California's packages like "Property Management Sys-tem" which for £6,000 takes on the burdensome aspects of being a landlord, or "Construction Information System" for builders at the same price.

These are examples of sophis-ticated 'vertical market software packages. By one estimate there are at least 10,000 vertical markets capable of receiving a distinct software package of its own. Some vertical markets are so big they are already fractur ing into sub-markets. American farmers are expected to spend almost half a billion dollars for computing power and software in the next three years. Nat-urally programs tailored for Southern Californian orchard owners will not be so useful to hog farmers in Illinois.

Another rapidly growing area in US software development is so called 'expert software'. The market leader is Human Edge which pioneered with a series of knowledge-based packages that for a few hundred dollars provide a distillation of advice and reasoning, plus some diagnostic power, to take the raw data on a problem, be it a complex union management Continued next page

It is almost two months since British Telecom bacame a public limited company and its licence conditions began to take effect. That interval has done little to allay the fears of many about the power of the group - due to be privatized in November - and the influence that it will have on the information technology industry.

The recent announcements that IBM and British Telecom will be partners in setting up an electronic point of sale network linking the Clearing Banks and the retailers and that they will also be going into partnership to form a data management appears to born a data management. ment network have reminded even the most docile of the power of the

Hundreds of delegates attended a wo-day seminar in a London hotel last week organized by Oyez Scientific and Technical Services to relieve some "confusion as well as variations in interpretation" of the British Telecom licence.

Speakers from the Department of Trade and Industry, Oftel, ICL, de Zoete & Bevan, Air Call and others outlined their experiences and their interpretations. The Deputy Director of Oftel, Bill Wigglesworth, relieved the delegates a little by reminding them that his office could take civil action to enforce an order, and that action to enforce an order, and that:
"Penalties for non-compliance could therefore include damages for breach of duty, following an order, or the possibility of licence revocation, civil enforcement or even criminal proceedings where appropriate".

Such promises did not precipitate thunderous applause. Did the delegates not hear or did they not believe? There are still too many

British Telecom under fire: the case for competition

dominance. -

مكذا من الملصل

Wigglesworth cited the Director General's promise. Professor Bryan Carsberg took over Oftel two months ago. He pledged: "My intention is to be evenhanded but vigilant. I intend to be active in looking for indicators of compliance with the licence conditions rather than passively waiting for problems to become visible. I hope that British Telecom – and others – will work hard to establish systems at an early date to demonstrate that they are not behaving in a manner which is anticompetitive; I shall press them to do

Quite rightly many at the conference and in the IT industry have reservations. The group's latest announcement that it is going to sell computer games direct to the high street is symptomatic of its expansionism. It is because of the Garnestar cable network - part of BT's ambitions in cable television - that the group has been exposed to computer games. Cable expansion is slow, so BT has moved into the high street with the products. The strategy is sensible but the diversification frightens the corporation's competi-

Cable television, microcomputers, pabxs, Prestel and many more in the

portfolio are giving the group unfair influence. The market telecommuni-cations in the UK has not been liberalized despite the political prom-ises to the contrary. One carrier -Mercury - is the only competitor to BT and the corporation is still the

primary supplier of equipment.

Delegates at the conference were reminded by Victor Krueger from Dataquest of the dominant position of AT & T in the US, despite the divestiture of the group and the "open skies" policy of the Federal Communications Commission. The group retained long distance traffic, its manufacturing arm, its laboratories

THE WEEK

By Bill Johnstone

and its unregulated business activi-ties. The 22 Bell Operating Com-panies – seven regional companies – which run the local telephone services have been sold,

But the "big bucks" are in long-distance traffic. Even with five principal carriers to compete with the AT & T, the biggest competitor can claim only about 4 per cent market share. AT & T still dominates with over 90 per cent (see table).

Even with that competition, the US market is not liberated. What hope is there in the UK? A recent study on government policy on telecommunications by the London-based Adam Smith Institute – a proponent of free competition – has forecast that British Telecom will still be the principal carrier in 1987 and the major equipment supplier. By then BT will have 97 per cent of the international telecommunications network revenue
- the most lucrative. It will also have
96 per cent of the Inland Trunk
market - worth about £2,700m. By
1987 the group will sell about 60 per
cent of the supplied equipment which
is worth to BT just over £1,000m.

Chris Roy-Grainger managing

Chris Box-Grainger, managing director of Telephone Rentals, emphasized the need for competition. He spoke as "a major supplier". He said:
"I want to make the point that, to major suppliers, the privatization of BT is almost irrelevant to our daily businesses - who owns BT is more of interest to the City, to investors, to analysts and the financial press. What is vitally important to our industry and users is that liberalization of all supply and maintenance of terminal systems and apparatus should be accelerated to be seen to be effective in the market place before the end of 1985 - and that this BT licence permits free and fair competition without the pressures and inbalance we have experienced during the past

we have experienced during the past two years.

"The deficiency which concerns us most of all is that the licence fails to demand separation of BT's national network and apparatus supply busi-ness... It is significant that BT's manufacturing and production activi-ties are required to be organized quite

separately".

The truth is that competition and liberalization is being feigned. The size of BT and the influence it will exercise on the computer and telecommunications industries in Britain must be seriously monitored. It should have been stripped of its right to sell equipment and made guardian of the network with a legal obligation to supply all circuits on request. Resale to third parties would be allowed, ensuring that every service – including cable television – was a value added service. Companies would compete freely in the supply of equipment and in the provision of services, without BT interference.

That is how the BT licence should have read. It is still not too late. **ESTIMATED US REVENUES**

What can we do with all those £1,000 white elephant micros?

"Computer for sale, mint condition, cost £10,000 - snip at £1,000." So might have read a small advertisement in the computer press - but who is the seller? In this case, a finance house ridding itself of an unwanted repossession.

Leasing is an established method of financing the purchase of computer equipment and software. However a disturbing trend is emerging which may cause finance houses and leasing companies to reconsider their policies towards the financing of computer deals especially at the micro end.

One major leasing company commented: "Our front parlours are becoming filled with repossessed white elephant micros and we don't know what to do with them."

How has it come about? some of whom have their own begins. leasing companies. The local leasing manager assesses the deal, considering the standing of the purchaser and the reputation of the supplier. He rarely considers the suitability of the equipment and its software for the tasks for which they were purchased. The leasing contract s signed and the equipment and software delivered and

The problems begin when the computer system fails to match the business objectives orig-

inally set for it.

Regardless of whether this is
the result of the purchasers' own ill-disciplined appraisal of the requirements and selection procedures or a failure in the duty of care incumbent upon the supplier, the result is often

chaotic. Should these problems prove insoluble then the buyer may break the leasing contract Typically a purchaser ap-proaches the leasing company The leasing company repos-directly or sided by the supplier, sesses and the legal argument

> The difference between leasing computer systems and other leasings such as motor cars is that the leasing manager and often the buyer as well, have no means of assessing the fitness for purpose of the equipment and software. Such a computer system might come from suppliers of the highest reputation and work excellently for other customers but bear no relation to the specific needs of the leasing manager's own

The leasing company which is of course the legal owner of the equipment, and software if leased, may have to defend its position should litigation loom and the plaintiff customer involve both supplier and

leasing company in a joint The ground swell of discontent among failed computer

users is now reaching the courts. Members of the Association of Professional Computer Consultants are involved in more that thirty such cases. Computer litigation is an increasing source of business for

the legal profession and expert witnesses are much in demand. there is talk within the com-puter industry of a consumers association to protect users. The proposition has raised consider-

The leasing companies appear to have a choice. Either to move out of this once lucrative sphere of activity or to protect themselves against the unsuitability of the systems they in effect sell. Such protection may come from the contractua guarantees of fitness for purpose entrenched in the customer-/supplier contract or in a more echnical assessment before the

easing document is signed. Even the most rudimentary checks, perhaps taking only a few hours, might save the subsequent embarrassments of repossession and financial loss. For example the examination of the paper work trail from statement of requirements, suppliers proposals, and con-tract would give a firm indication of the disciplined approach of the parties concerned.
At the very least there is an essential requirement for the technical filtering of leasing applications to reduce the risk of failure and to supplement the protective measures taken with regard to supplier and customer

The present high rate of computer failures has presented whose horns are sharp abandon the business or take pre-

business reputations.

cautions.

You beast, let me get

on you By Philippa Toomey

my hands

Perhaps I'm in a compute game, I thought, as I struggled through the rush hour in pouring rain (ZAPP! Splat!) on my way to the Personal Computer World show.

One of the least endearing things about personal computers is the noise they make, bleeping, honking, ticking, sapping zooming and chattering away On the ground level the biggles, on the second business, and on the third the Book Marketing Council (BMC) and games games, games.

Determined to get a "hand

on" experience, which is not quite as dubious as it sounds, I examined a spare keyboard which said "Press Button B to begin". Typical, of course, that I couldn't find Button B.

The Sinclair QL on the

BMC's stand was more user friendly, though programmed to say the same thing over and over again - an elegant sleek black beast, the handsomest thing there, and that included me and my trade press col-leagues, many of whom seemed to have got out of the cradle that

Two games of "Gumshoe" featured little men ranning up and down ladders, along corri-dors, and zapping each other with guns at frequent intervals. No end seemed to be in sight. Could one arm the hamsters and the white mice with Hunca Munca sized machine guns and encourage them to fight it out for real through the exercise

On to "Dark Star" (no relation to the film) where a helpful young man attempted to show me how to play a game in which I was, apparently, encouraged to save the world. No good. was attacked by meanies, ran out of fuel, and as the screen said, terribly "You have been KILLED. You have liberated NO PLANETS". I left, feeling that the words "I AM A FAILURE" were flashing Slinking on my way out, I was

nesmerized by the command "Stand by your beast, player!"
A small blue came! was walking steadily from left to right of the screen in "Revenge of the Changing Mutant Camel". colour occasionally, it was attacked by all kinds of frightfulnesses, including a bombardment of hostile CND badges while crossing a nuclear free zone, and uttered electronic cries of pain (Ouch!). I left it

Out of Olympia (ZAP!) into a bus (POW!) going only a quarter of the way back to Greek for lunch (OUCH!) meet by accident friend in car (SURPRISE!) am driven by mistake to Charlotte Street (Press Button B) and find myself at lunch.

Lower prices, more choice in portables

It's been almost four years since Adam Osborne gave the world its first popular transportable computer, but several business lifetimes have passed since

then.
After an initial two years of meteoric success, which spawned a host of imitators, Osborne's old sewing-machine style eight-bit Osborne 1 port-able micro fell afoul of its bythen middle-aged technology and ran into financial troubles. The original Osborne design did not allow for the arrival of the microcomputer quasi-standard set by IBM with the introduction of its PC in 1981, and when the majority of software started coming out for the PC. Osborne's old machine couldn't

Like many pioneers, Osborne opened the territory for others who watched and learned from his mistakes. The most successful of these was Compaq, which in 1982 introduced a portable, well luggable, computer-whichwas run all the software and PC, while offering a built-in 80-column display, full IBM-style keyboard, two disk drives and

256K of ram memory.
If Osborne's machine opened. up the portable computer market, Compaq can be said to have circled the chuckwagons and prepared to take on all comers who said that the portable PC wasn't here to stay. In it's second year the company did more than \$111 million worth of business and established the growing demand for an IBM with a handle.

Fifteen months on from Compaq's original portable machine launch, the market is seeing the arrival of a flood of

Despite all predictions that IBM's entry into the portable market would kill off the fortunes of independent portable IBM imitators, there are now more portable PCs to choose from than ever - and Compag's original portable is reportedly outselling the 1BM offering in US shops by as much

And competition will continue to get stiffer, meaning lower prices and more choice for the portable PC purchaser. Some recent IBM PC-workalike portable arrivals include: Olivetti's M21 - offers two disk drives, built-in display, a variety of add-on interfaces and

BM software compatibility. Otrona's 2001 - this 21 pound (that's weight, not price an important consideration in a machine you have to lug around) PC clone is dis-tinguished by its 'pop-up'

tiltable screen. The Commodore PC - this machine hasn't even been released yet, although it's more less an adaption of the Canadian Hyperion IBM portable first released in 1983. This short list of newcomers

is by no means complete and doesn't include the vast number of non-IBM compatible portables being developed by brave independently-minded hardware manufacturers who have flouted IBM's 'standard', por does it include the growing (or should I say shrinking) number of smaller desk-top machines that can be carried about. The former group is represented by Act's Apricot portable, Apple's IIC micro and the Hewlett Packards HP-110 machine, while the latter in-

A new life ahead for Lisa

By Maggie McLening Apple's revolutionary Lisa nicro may be given a new lease of life courtesy of arch-rival IBM, Following IBM's choice of Xenix for the PC/AT, British software house Logica has released a low-cost version of the operating system for the PC/XT and for the Lisa, turning both machines into multi-user hosts.

If IBM's endorsement does for Xenix in the multi-user market what it did for PC-DOS in the single-user sector, Apple can rest assured that there will be a flood of applications available for Lisa 2. Industry sources estimate that there are about 1,700 PC-DOS and MS-DOS packages on sale in the UK alone,

Although heavily hailed as a techincal leader when it appeared two years ago, Lisa was overpriced and could not shake off the "specialist graphics" label inspired by its innovative screen features of windows and icons, and mouse cursor con-

Gary Smith: "Quickest way"

trol. Even a £2,000 price cut did not persuade the business world to buy Lisas in any great quantity, but Xenix 3.0 and the ability to support three users each running three tasks simulaneously have already achieved some success in the US, where the new operating system has been available since April.

Gary Smith, a dealer sales manager at Logica, commented: Lisa proved to have the best price performance ratio, and Xenix for the Lisa is selling as well as the PC/XT in the States. There are a lot of dormant Lisas out in the field at the moment and this will give companies the chance to link them into a busines environment. It is the first time Apple has been compatible with IBM and we believe that many suppliers will see buying Xenix as the quickest way to become IBM compatible."

Hector Hart, the commercial manager Microsoft, estimates that there are already 63,000 PC/XTs in Europe, with 72,000 more expected by July 1984 and he claims that the new release of Xenix will sell as a "multi-user PC-DOS".

One of the reasons for Unix's popularity is the wealth of program development tools it offers but until now non-technical end-users have had to pay for these, although they may never be used. Xenix 3.0 brings the price down to £595 for the PC/XT (£795 for Lisa) by splitting the operating system into three parts and making development aids and advanced text processing into optional extras. The basic Xenix 3.0 package has a menu-driven shell visually very similar to PC-DOS.

A survey of languages for the BBC. A chance to win an ACT Apricot FI business system worth over £2,200.

And a look at a program that will

uncover your personality. All in October's Practical Computing.

Front runners in a choice field

By Catherine Arnst Boston: The bottest concept in office automation today is the multi-user computer, a system that allows anyone with a personal computer to share files and information with from two to 100 co-workers.

The big names in the industry
- IBM, American Telephone and Telegraph (AT & T), and Digital Equipment - plus Hewlett-Packard and a number of others have entered the fray.

Between them they offer an array of hardware and software that promises to turn a personal computer into a social machine.

"If a company is serious about office automation, it will have to have 'connectivity' available", said Craig Symons, an analyst with Gartner Group.

But industry analysts expect that only those who can provide full range of automated office systems, including both multi-user systems and local area networks, will survive in this

IBM offers the fullest range of systems. The computer giant is likely to remain the front runner in the multi-user market while small companies fall by the wayside or are relegated to very narrow market niches.

IBM's closest challenger in terms of size and product line is AT & T. But AT & T, dominant in the communications field. entered the computer industry only this year and its inexperience is expected to be a severe

Tom Willmot, director of user research for the consulting firm IDC, believe the best multi-user solution for a large corporation is one based on a minicomputer. with many personal computers hooked into it in a "star" configuration (with the mini as the centre star).

Hewlett-Packard introduced such a system recently. Its HP 300 series 37 microcomputer can support up to 28 personal computers users at once and share information with even larger computers.

But Willmott said it will probably take at least 18 months before a significant market for such systems emerges because of their high price-the HP 37 starts at £16,000.

An alternative is a less powerful personal computer that can support several users the PC/AT. Although this type of system is less versatile than the star model, it is also less expensive. The top price for the PC/AT is less than £5,000.

software houses who started are into the tens of thousands, writing business software for Turnover and profits have Willmott thinks departmental the Commodore Pet, as long doubled or tripled year after ago as 1979-80, when far- year. heads of corporations would rather buy a less powerful PC/AT than turn over the sighted people were beginning to realise that micros were not largely to a strange quirk in the decision to buy a more expensto a central purchasing departbut also might be useful for ment, "It's the nature of the business. corporate beast.

He expects that multi-user systems will slowly start taking over. But in the meantime, he said, in view of the huge number of microcomputers alreay installed in offices, "I suspect that if people want to share information they will just trade their

Tapping in to a whole new telephone system

How often have you telephoned munications networks in Brisome organization to find out tain have been in two main something only to wait what seems an eternity while the person called searches for the switched telephone network; or information you require?

This common cause of high blood pressure and high telephone bills will, shortly, according to British Telecom, become a thing of the past.

At the end of this year BI plans to open the first phase of a new national telephone network mainly for business users which will among other things, enable the person called to access information on a database and view it on a terminal screen while talking to the caller - over the same telephone link.

The new network, called ISDN (Integrated Services Digital Network), will provide each subscriber with two communications channels, over the same pair of telephone lines. One will be a high speed channel able to carry voice and data traffic at 64 kilobits/sec, and the other a lower speed data channel operating at 8 kilobits/sec.

ISDN represents a major development in telecommunications in Britain. Even BT, which is noted for its extreme cautiousness in making state-ments, describes ISDN as: "a network of such power and flexibility that it will profoundly over the next 10 years."

categories simple but abiquitous, such as the public sophisticated but limited in scope, such as the Packet Switch Stream network for certain types of data traffic. In addition, many organizations have created extensive private networks using circuits leased from BT. All these networks have been

designed for specific purposes. For some time now a single network has been needed which has all the qualities of existing networks, and can meet the needs of the future. This multifunction role is fulfilled by ISDN

The ISDN is tomorrow's version of the public switched telephone network designed to be more powerful and more flexible so that sophisticated services can be economically incorporated.

Central to ISDN is BT's System X range of digital telephone exchanges. These will eventually replace existing analogue exchanges throughout the country as part of BT's long-term multi-billion pound modernization programme which is unlikely to be completed before the turn of the

with the coordinates Al - a "cell" in Supercalc jargon - we put in a name for the graph, say
"Home accounts". On the next Game sales line down, running horizontally, we type in the months of the year, ending with an annual total.

The computer games industry is still buoyant, but in a state of change, according to David Ward, managing director of Ocean Software (writes Frank He was commenting on the recent demise of various companies in the industry, notably the Liverpool company Imagine which was recently wound up with debts of £300,000.

The industry's turnover, which was about £130m last year on more than 20 million tapes, is still likely to increase 50 per cent this year, he claims, the average price of games having risen to around £7 or

At present, the top 10 of the 250 or so companies in the industry, do 70 per cent of the

"The winners in computer games will be the companies that recognize the subtleties of the computer retail market, and the changes in market demand, and in technology generally,

"For example, studies have buy home computers primarily use them for games for the first months and then, if they are bitten by the computing bug, use them for other things such as education, homefinance and word processing,

"The schoolboy whiz kids no longer rule the roost. Games are now generally devised by teams of professionals."

How a spreadsheet can help to spread the load

The spreadsheet is meant to have sold more personal computers than any other program. and that must be a tribute to the persistence of the average

You can come to terms with word processing by comparing what you are doing with using a typewriter. You can even summon up a conventional comparison for the average database, a phone book, say, or a register of mail order cus-

But with the spreadsheet you enter uncharted territory. Its origins may be in those humble sheets of graph paper which we used to use for tables at school, but if the program is to be used to the full it will require a considerable degree of original computer applications thought, much more, to be frank, than the advertisements hint al

I learnt the ropes with Supercale 3, the latest version of one of the earliest spreadsheets and still one of the most popular. Like all spreadsheets. Supercale began life as an electronic imitation of a sheet of graph paper. Load the program and you will see in front of you an empty table, the horizontal coordinates marked in letters, the vertical ones in numbers.

Financial records

A simple home accounting example will show you what this kind of basic program can do. In the part of the screen We then turn our attention to

the first vertical column and insert in separate cells our sources of income and our sources of income and our outgoings, adding sub-totals, setting different sums against each other where we wish. In the part of the screen those calculations are reached – for instance, add up all the cells from B6 to B15. The machine is then clever enough to realize that we might want to replicate that formula, adjusted month for month, for each sub-total throughout the year and, if we give it the sign, will do so.

For the home user it may be a financial records in a way which provides you with running totals. But it is not startling enough to warrant a couple of hundred pounds, which is what most spreadsheets will cost you.

unless you want to do some.

Still that is a minor gripe.

of business projections. Let us calc program, will be popular imagine, for example, that you enough to spawn a whole shelf are thinking of starting a new of user textbooks. The only magazine. list of circulation figures for the magazine, and then make the next show a formula which adds up all income and sets it against instantly where your breakeven circulation will be for a particular production cost, and by playing around with the elements of producing tha magazine you can see where economies, or investments, might be made to good advantage. The same calculations on pen and paper would take hours.

The better programs also carry quite complex financial calculations such as that of interest on a sum at differing intervals over a period of years, in the form of simple ontries.

Once your projection is complete, you need to convince the bank manager or the managing director of its worth and that is where Supercale 3's third function, graphics, comes in. Using a graphics extension program, it offers the ability to the animhers but manifestional program, it oners the ability to turn numbers into professional looking pie charts, stacked bar charts and line graphs to same but a few. The possibilities seems virtually endless, and there are right different character fonts to label thous. THE OLIVETTI FAMILY OF PERSONAL COMPUTERS

FRIENDLY AND COMPATIBLE.

The new range of Olivetti personal computers have all been designed to be user friendly and totally compatible. So you'll get on better with them, and they'll even get on with their biggest rivals.

The M24 desk top computer, for example, is operationally compatible with the industry standard.

This fact alone gives you access to the widest range of software on the market today, including all the most popular packages.

It also offers you many unique features including a high esolution screen with 16 colours or shades of grey and a superbly designed modular format for greater expandability.

Both the M24 and the M20 are powerful 16 bit personal computers for faster processing and both can be upgraded, step by step, into a fully integrated network system.

They also have in-built communication facilities so they can ntegrate with other office machines and help take your business into ull office automation.

But the new Olivetti range doesn't stop at desk top computers. There are also two portables, the M10 and the M21.

The M10 is so compact thatit fits easily into a briefcase and can be fully operational wherever you are. It can also be linked, via a telephone, to other office machines and bigger computers.

The M21 is a true 16 bit transportable with all the power, information storage capacity and presentation capabilities of today's most advanced personal computers. And it too is operationally compatible with the industry standard.

Backed by the service and support of the leading European data processing manufacturer, the new Olivetti personal computers represent one of the most complete ranges available today.

If you want to get better acquainted with the Olivetti range, just fill out the coupon.

jobs to be found by pursuing a in buying "off the shelf"

the computing industry do not internal mysteries of computers large numbers of computer

Within most commercial organizations there are now a

JOB SCENE

number of pressures which are leading to changes in the ways ch computers are being used. Many commercial organications are just not getting the performance they require from their data processing departments. Systems take years to build and are often impossible to alter easily.

Many non-computer staff are now becoming more sophisti-cated in their use of computers. They bypass their departments

To fight this trend, old-style Because it just is not so. The DP departments are desperately long-term future requirements of trying to find ways whereby they the computing industry do not can improve their productivity. encompass the necessity for These pressures are squeezing out the old-style computer programmer. Package software requires little or no programming support, and old style programming is horrenddonsly inefficient. It is being replaced by the use of high level application generators. The use of such tools needs staff with

very few programming skills. These trends are becoming clearer all the time. In many cases, the only important factor preventing the disappearance of programming staff, is the lack of appreciation by board-level management of the inefficient way in which their DP department is run.

However, as more board level nanagement start to realise the new methods that can be used to build computer systems without programmers, so the demand for traditional programming skills will start to decline.

So, the plea to the teaching profession must be not to encourage your charges to think that there is a never ending source of employment to be found in the field of computer

In five or 10 years' time, there will be few jobs indeed for programmers who do not possess a very high level of ablility. They should, for example,

urrange for their hudding typists to try a word processor; to use computer graphics in their chemistry and geography classes; to use computers as simple odelling tools in mathematics and economics; to use them occasionally as a dictionary in French lessons, as a thesaurus in school libraries, even to encourage their weaker pupils to play "space invaders", if they think it will enable them to see how computers will form the basis of even their entertainment in years to come.

Above all, they should re-member that those they are training for industry will find that most of their tools will be really will be a "computerized society", they will have failed them as surely as if they had to express themselves adequately in written English.

How big shots win accounts

Small accountancy practices are in danger of losing out to their larger competitors, who, aided by increased computer base automation, are beginning to attract the smaller client. traditionally served by the small

This warning is given in a report published by the Technical Change Centre, on the adoption and impact of information technology in accountancy. Major practices able to invest heavily in comprehensive computerisation are able to hold down costs and attract smaller systems would not have previously been worthwhile.

Productivity, says the report, is being boosted, but only at the cost of an increasing polarization of skills between qualified and experienced professionals, and

OFTWARE TO ACCOUNT O

Inatever your accounting needs, we've got software to VV suit you. Peachtree accounting software is available at all levels—we'll help you choose the right one for your business.

For starters there's MacAccounting, based on a simple cash book concept. It's the simplest of the range (you can learn it in under 30 minutes), runs on the Apple Macintosh and was designed with small companies in mind.

Our Premier Accounting System (PPAS) is more sophisticated and runs on most popular business micros. It's ideal for the businessman who wants a more detailed analysis of his accounts and includes 5 modules; sales ledger, purchase ledger, general ledger, sales invoicing and stock control. Each costs £240 separately or £210 if all five are bought together. You can even take away a demonstration copy of PPAS to try before you buy. At the top of the range is our Business Management System (PBMS)—it deals with almost every accounting requirement and provides detailed management reporting. Whatever Peachtree product suits your needs, you'll

find it easy to use and easy to understand. We provide full training and if any problems crop up you can count on our nationwide dealer network to solve them.

For more information about our accounting software send off the coupon today.

BOXING

Canadian to

make life

difficult for

Bruno

By Srikumar Sea

Boxing Correspondent

If Ken Lakusta, of Canada, is as

If Ken Lakusta, of Canada, is as good an opposent for Frank Brand as reports say he is, it could be a tough year far the Wandsworth heavyweight as he tries to pull himself together after that resounding tentis-cound knockout by Booscrusher Smith last May.

Bonecrasher Smith last May.

It could be an even tougher year for Scuno's matchenakers crying to find opponents as good as Lakasta to follow. Though the Cuandian has made it clear that he has not come here all the way from Alberta to help restore Bruno to his former glory, he looks, from all accounts, to be just the man to help Bruno's rehabilitation along.

Lakusta is a ragged little fighter, not too strong on skill but ready to have a go. Solld enough to make life difficult for Bruno, he is small

enough not to pose a real threat the British boxer.

He knows all about Bruno's surching power and does not seem westrack at the thought of meeting

awestruck at the thought of meeting the big man at Vembley tonight. "I watched him on television when he fought Bonecrusher," Lakusta said, "because I thought I might have to fight Bruno one day. I have never met a heavyweight who does not hit hard, if you let him."

Lakusta promised to make things interesting as he relaxed at the Holiday Inu Edgware Road, where he had arrived just in time for Canada Week. "Standing around with Bruno would clearly be a crazy proposition," he said. "I have learnt to live with big men. I have been chief sparring partner to Gerry Cooney and last August in Las Vegas I sparred with Pinklon Thomas. I learnt that even the big men make mistakes."

men make mistakes."
"I don't want to blow on my horn
I'm a proven entertaining fighter.
I'm 2121b but as strong as a 2401b
fighter." "And fit," his manager.
Joe Daskiewicz, said. "He can
outrun a welterweight."

It all points to Brune baring a difficult time pinning him down. Lakusta certainly made it tough for the world-ranked heavyweight.

IN BRIEF

White City

gives up

bout in South Korea.

men make mistakes."

Bell among four newcomers for England

Only three members of the England team which took the ield agaisnt South Africa in the second international in June survive in the side which will play the Rugby Football Union president's XV at Twickenham in Saturday. The team named esterday includes four players new to the senior England side.

Though no caps will be awarded for the game, it is obvious that good performances against such a quality world team will stand players in good season proper begins against. Australia in November. Two of he newcomers are backs, Lozowski, the Wasps centre, and Barnes, the Bristol stand-off half, and the other two are the props. Stuart, the younger of Leicester's Redfern borthers on the loose head and Bell, of West Harlepool, at tight head.

The game also restores after a year out of his rugby career, though this time at No 8

rather than blind-side flanker, Underwood and Carleton returns as wings after being forced. to miss the summer tour to South Africa and Stringer gets the chance to paly for his country in his correct position, full back, after winning his three:

will perform. In so many positions the selectors have been limited in their options because of injuries and unavail-ability, they did not, for instance, consider. Youngs, Butcher, and Winterbottom because they returned from South Africa only last Tuesday, while Dodge is not yet fully fit.

In some positions there will be grumbling, particularly from those clubs with contenders for the centre positions. Nonetheless there is an imaginative touch which pairs Woodward and Lozowski, even if Wood**England team**

N C Sarioger (Wasps); J Carleton (Creil), C R Woodward (Leicester), R Lozowski (Wasps), R Underwood (Leicester), S Barnen (Bristol), R Hill (Bath); S Radtern (Leicester), S G F Mills (Goucester), E Bell (West Hartlepool), J P Hell (Bath), J P Scott (Cardill, Captain), J P Sydden (Waterloo), G W Rees (Nottingham), N C Jerroots (Mossiey).

each time against an overseas (Mosaley).

Replacements G H Davies (Wasps), C R Andrews (Modestrough ans Cambridge University, R Harding (Bristof), M Preedy (Gloucaster), A W predict how this England team will perform. In so

ward's form over the last three years has seldom lived up to the bright. intuitive promise of 1980 and 1981. Lozowsky is, as it were, Woodward's "minder", the role that Dodge has occupied in so many games.

Lozowski, 24 in November, came of age during England's under-23 tour of Spain in May. He is also sufficiently large not to be easily brushed aside by hard runners such as Gerber and Ackerman, the president's centres. He has good hands and times a pass well, which so few

midfield players seem able to do, so Underwood and Carleton should not lack for opportunity. The half backs are the one

area of the side that most pundits got right: Hill was one of the few genuine successes in South Africa, his main virtues deriving from constant hard work. He has the 90 per cent of perspiration which is said to make up genius, and he has Barnes outside him to help with the 10 per cent inspiration.

There is an element of

crossed fingers about the selection at prop forward, which is not to say that the players chosen will not do well. Bell, a police sergeant in Seaham whose brother. John a miner, steps into the West Hartlepool side when Eddie is away - was a useful footballer and athlete in his younger days and did not start playing rugby until he was 23. He joined West Hartlepool from Durham City five years ago and made his first county appearance that same year, against Aitken, now Scotland's grand slam captain.

scrummager in the north and his play might have been acknowledged last season but for the fact that he was sent off comparatively early. Now 33, be retains considerable speed and, in terms of physique, should go well with Mills and Stuart Redfern, another who promised to break into the rop level last season but was held back, this time through injury.

The locks almost picked themselves, with Scott retaining the captaincy, but the back row has an interesting combination of height, physical presence and speed about the field. If Jeavons can settle as an international No 8, this trio may have the balance for which England have sought so long. In this respect it should be noted that the selectors have gone outside their initial squad by calling on Hesford, of Bristol, as a replacement, while Andrew, the Cambridge University standoff, appears in this company for

Draw does little clubs no favours

All the first-class clubs involved At the interest closs those involved in the second round of the John Player Special Cup—to be played on December 1—received home ties when the draw was made in London yesterday, with the exception of Wakefield (David Hands writes). They travel to Nuneaton but must still entertain strong hopes of reaching the third round.

Rosslyn Park entertain North Walsham, the Eastern Counties Cup holders from Norfolk who are captained by Tony Hadley, brother of Adrian, the Wales wing. Blackheath receive Sutton and Epsom, while Hartlepool Rovers play Aspatria with due regard for the Carlisle club's defeat on Saturday of Birkenhead Park.

Bedford will know of Barker's Butts' reputation in Coventry sugby circles, while the last of the senior sides, Redruth, will offer Crawley a bracing reception. The second round remains regionalized, eight clubs appearing in the North and Midlanda group and 12 in the London and South-West group.

DELETE Morth and Middlends group: Numerica who will react the temporal september of the control of the contro

Barnes goes back and takes a step forward

There was limited consolation for Rose, the Harlequins full back, yesterday when after being overlooked by England for the side to play a world XV on Saturday, he was included in the Barbarians team to play Newport at Rodney Parade on October 2 (David Hands writes). He is joined by his club colleague, Salmon, and both will realize that there is still much to play for in representative terms this season.

representative terms this season.

The Barbarians have included three uncapped players, two of them Scots Fraser, of London Scottish, is at light-head prop and Jeffrey, the Kelso player who made an excellent impression in this match last season, plays on the blind-side flank. The third is Barnes, who daily edges nearer a first cap for England. Newport was Barnes's first club, before his move to Bristol, and when the two clubs met this month there was an unhappy incident when

Barnes was punched by a Newport player. Likewise, Ackerman played for Newport before joining London Welsh when he moved to London The Spanish national side, which is making a short tour to Wales in April, pays a visit to England next month, for three matches around the time of England's game with Australia. They meet a North London side at Hendon on October

28, a City of London side, to be captained by Ripley, the former England No 8, at the Honourable Artillery Company ground on October 30, and a Harlequins side on November 3. on November 3. On November 3.

BARBARIANIS (v Newport, October 2): W M M Rose (Hartequine), M N Titley (Bridgend), R A Activemen (London Weish), J L B Salmon (Hartequine), R Underwood (Lacester); S Bernee (Bristol), J C Robbie (Transvast): I Stephene (Bristol), J C Robbie (Transvast): I Stephene (Bristol), J C Robbie (Transvast): I Stephene (Carlogend) (S Mary's College), J A Fraser (London Scottish); J Jethrey (Kalso), T Shee (Cardiff), D G Leoten (Cort, Constitution), G Rees (Nottingham), M C Jeavons (Moseley).

the world-ranked beavyweight, Trevor Berbick, when they met 12 months ago, "He stopped me in the tenth. But I wasn't fully fit. But even then I backed this dude up." Lakusta also lost on a split decision against Stefan Tangstad, the Norwegian beavyweight who sent Bugner into retirement. If the Canadian can stay out range of Bruno's long arms and then manages to get inside, Bruno could see some awkward moments. But by the middle of the contest Bruno should get his man. More boxing, page 30

MOTOR RACING

Michelin to pull out of grand prix

Michelin have announced their withdrawl from grand prix racing from the end of this season, but will continue their involvement in all other aspects of motor mort as a means of furthering their develop-ment of radial tyre technoloty.

This season Michelin have serviced the Brabham, Ligier, McLaren, Renault and Toleman teams and have been associated with 57 grand prix victories since their entry into Formula One in 1977, including 12 of the 14 races run so far this year. They have also heiped to secure three world championships.

Their withdrawl means that next

season the tyre battle will be a straight fight between Goodyear and Pirelli, who recently announced that they had signed a contract with Brabham in order to speed the development of their own Formula One tyre programme.

At present, Goodyear are contracted to Ferrari, IPS, Lotus, Williams, Arrows and Alfa Romeo, while Pirelli supply their tyres to the Osella, ATS, RAM and Spirit teams.

CRICKET: Gehan Mendis, fined

and disciplined by Sussex for turning up late during a champion-ship game, is to sign a three-year contract with the county, Sussex are hoping that Imran Khan, the Pakistan all-rounder, will agree terms this week.

Privileged members extend cricket season

Cross Arrows stir memories at Lord's

It was incongruous, being at Lord's this week. Nothing stirred on the great ground save Old Father Time eerily turning with the wind. The square had been churned uptaiready the groundsman's thoughts had turned to next spring. Mellow fruitfulness hung in the air. The season was over.

Today, all Cross Arrows' matches are played at Lord's, and since 1963

season was over.

And yet was it? There was activity
on the practice ground, that expanse
at the Nursery End which is forlorn even in June. A smartering of bystanders and MCC members, huddled together, and 22 others and two unspires were extending the sammer. For, every September, Lord's is the home of the Cross

Arrows.

The club's members are privileged to be playing there, if only at the Nursery End. But then they are privileged anyway, for they belong to Lord's, Cross Arrows was founded more than a hundred years ago by MCC and Middlesex staff, who, past and present still make up the bulk of its membership. It is a club table to rediction and anexpect rich in tradition and anecdotes.

Prior to 1880 the Lord's staff, an

amalgam of the secretary of MCC, accountants, ground staff, painters and others, played against clubs in the locality. They called themselves "St Johns Wood Ramblers" before discovering there was another side of the same name. Much discussion eed as to a change of title. It was provied ultimately, in an untikely

A man who was turning out for the Lord's staff the following day at Northwood, asked for directions. "It's cross 'arrow way." was the reply, meaning the parish lay beyond the district of Harrow.
"That's it." said Jim Fennell, an essistant tennis marker et Lord's. We'll call ourselves Cross Ar-

The name stuck, and the club's reputation went before it in more ways than one. Although by now there were varied means of ort. Cross Arrows stuck to a tip-cart pulled by Jumbo, the horse

Today, all Cross Arrows' matches are played at Lord's, and since 1963 on the practice ground, owing to the need to prepare the square for the following season as soon as the last first-class pitch is completed. However, the pitches suffer nothing by comparison since they are tended by the groundstaff themselves.

There are 400 members, ranging from MCC young cricketers to elderly MCC members. It is, says the secretary, Ron Cook, "one of the most exclusive of cricket clubs." Theirs is a high standard. Gubby Allen. Gary Sobers, Jim Laker, Mike Brearley (who, according to Cook, now plays for nobody) and Ian Botham have all turned out, against such sides as Incogniti, Frogs and The Stage. The outstanding performance in Cross Arrows' 104-year history was that by Fred Titunus in history was that by Fred Titmus in 1946. At the age of 16, having played once for Middlesex, he scored 660 runs in 11 innings at an

Mostly, though, their sides include just one or two first-cricketers of the day. They will often be captained by one of MCC's secretariat. Billy Griffith, when he was secretary of MCC, was president of Cross Arrows. At a dinner held in the Long Room to mark his retirement, he became so engrossed in his speech that he put his notes into the candelabrum.

average of 94-on the main gro

History does not record whether he signed off then: no one would have minded , anyway. For the keystone of Cross Arrows' cricket is its benevolence. Jack Bailey, Griffith's successor as MCC secretary and Cross Arrows president says it is "the friendliest time

Computer Appointments

UNIVERSITY COLLEGE LONDON **DEPARTMENT OF COMPUTER SCIENCE**

Computer Networking Distributed Computing

The Department has a large research group (20+) in the computer networks and distributed computing area, Due to the recent award The Department has a large research group (20+) in the computer networks and distributed computing area, Due to the recent award of several large research contracts, and normal staff temover, we have a number of vacancies for Research Assistants and a UNIX programmer Vacancies for research assistants exist to work in one or more of the following areas; computer mail (especially X.400 implementation and directory problems), network management and monitoring, distributed databases, Inter-networking and interoperability, distributed applications (especially workstation) based) measurement and simulation, high speed (magabit) wide area networking. In addition we are looking for a UNIX programmer to provide support and system development to the research group. For research the Department uses 3 11/44s and a VAX/750, all running UNIX, and several smaller computers for real time systems. We have 3 Cambridge Rings and are installing an Ethernet. We have direct access to JANET PSS, ARPANET and other higher speed networks. During the last 10 years we have developed a sophisticated communications research environment. Selaries in the range £8,376 to £12.801 (under review) according to age and experience. Applicants should possess a good degree, experience in one of the above areas would be an advantage, as would experience with UNIX and C. Applications (including a detailed CV and two referees) or requests for further information, should be sent to: The Secretary, Department of Computer Science, University College London, Gower Street, London WC1E 6BT, quoting ref 2.

SYSTEMS ANALYST/ PROJECT MANAGER

EXCELLENT FIVE-PIGURE SALARY. EAST SUSSEX

Our ellent, Life Technologies, Inc., is a major force involved in the research and production of Clinical Dismostic Products, They are at the forefront of assisting the medical profession in diagnosing wirel and other infections in a fraction of the time used with coverage of the contractions.

Life Technologies is seeking to initiate a software department within its organization to develop its product range further, and, initially the amcessful appointee will be expected to contribute to all aspects of setting up this operation including:

Programming: ideally innoviedge of Pascal on Oce Micro's,
Analysis and Design: Preferably obtained in a
methemethen environment.
Under Liaison: Must be able to converse freely with
research scientists, marketing staff and users. This appointment is seen as a stapping stone to a senior management position within the organisation and allows the appointee to establish their own ideas is a "Greenfield" situation with "State of the Art" technology.

The candidates should be able to express themselves clearly and concisely both verbally and in writing, and have a genuine interest in microbiology and micro computer technology. A substantial benefits package is offered including pension scheme and full relocation to this beautiful part of the country. For additional information and a detailed job specification/please telephone 61-222 1547 or 8742 738471 — Daylines; or 898-876 658 — Evenings.

Mullery sticks to his guns as he goes to face top marksmen

Given that the two legs of the Milk Cup second round provide the smaller clubs with a better chance of making a little and less chance of making a lot, the little fellows had their cake and ate it last season, when seeding was introduced for the first time. Five first division sides were gobbled up by greedy little mouths in this round and Walsall and Oxford United led the queue for extra belpings.

Tonight sees the bulk of the clubs

in action, with 22 ties and even more first division sides face a frightening first night than last year. Among those who are not in the best shape to withstand a critical examination are Queen's Park Rangers (at York), Luton Town (at Orient), Coventry City (at Walsall)

Orient). Coventry City (at Waisail) and Norwich City (at Preston).

Though Rangers showed their ability a week ago to deal with icelandic small fity they may find that York City are not so easily caught, particularly at Bootham Crescent. If Rangers have any misgivings about their defence, they can be sure that York will share them.

division in which they are the leading scorers and unbeaten in eight competitive matches, with 21 goals scored. Walwyn, their joint leading scorer with five goals, missed training yesterday with a chill, but one is tempted to suggested that he will polay and pass these symptoms on to be seen to be suggested.

Alan Mullery, the Rangers manager, had become a fan of video nasties, or so it would appear.

Molby fills Danish breach

Sweden lacked both Stromberg and Corneliusson when they recently lost a World Cnp game at home to Portugal, who were without Chalana and Jordão. They will be closely watched in Milan by Franz Beckenhauer, whose uneasy West Germany side are in a special training camp this week at the Hennef sports school, preparing for the World Cnp match with Sweden on October 17.

home defeat by Argentina, Becken-bauer called the Bundesliga clubs together in Frankfurt. There, he used his prestige to persuade the clubs to let him have their players.

insisting that West Germany's success was ultimately their own.

Karl-Heinz Rummenigge, unfit for the Argentinh game and Beckenhauer's close friend, has sent

beckenhager geode trend, has sent him a message of good cheer and promised to be there on October 17. But Beckenhaner has been well advised to make his peace humbly with Verona's Briegal, whom he left

out against Argentina. Briegal kuffily said he was not interested in

Beckenbauer or his team, but Beckenbauer subsequently tele-phoned to mollify him.

Pavin steps in for the injured Zoeller

By Mitchell Platts

Corey Pavin, of the United States has accepted an eleventh-hou invitation to replace his injure mpatriot, Fuzzy Zoeller, in the world match-play championship, sponsored by Suntory, which starts at Wentworth on Thursday.

Pavin, aged 24, who captured the German Open on the European tour last season, has won the Houston Open and more than \$225,000 on the United States circuit this season.

Zociler, the No 4 seed, was forced to withdraw because of the recurrence of a back injury. Bernhard Langer, of West Germany, now becomes the fourth seed, thus receiving a bye into the second round and Pavin will face Howard Clark in the first round.

2 Denis Watson of South Africa.

© Denis Watson, of South Africa, won his third tournament of the season, with a firth round 68 in the Las Vegas invitational on Sunday, Watson's 90-hole total of 341 was 15 shots under per, it brought him \$162,000 to increase his winnings for the year to \$405,924 - second only to Tom Watson, who has won \$471,185.

The two Watsons are the only professionals who have won three times in this season's United States tour. Tom Watson did not play in

Las Vegas. Denis Watson has a chance of

Women are blown off course

By John Hennessy A fierce, wind transformed the

first round of the Sands Inter-national women's professional tournament, sponsored by Brend Hotels, into something of a lonery, if not farce, at Saunton yesterday. The conditions are unplayable, was one plaintive cry between green and tee, and it came not from a and tee, and it came not from a floundering also-ran but from Muriel Thomson, who was then the tournament leader. Miss Thomson, a former Curtis Cup player, struggled home in 43, to be joined by Side Allison on 81 and surpassed to Carter Dishard of Australia on Corinne Dibnah, of Australia, on Par for the course is nominally 74, but yesterday's conditions were such that for Miss Dibnah her

round "felt like a 67".

The day produced little cameos of despair. The feigned breaking of a putter as a signal from one fairway dispersed a signal from one fairway and the start and to another of mounting disaster, a sprint across the green to mark ball before a gust of wind brought further damage. the relieved exclamation "It's all-yours" as one player replaced the flag on the 18th and left further anguish to her partner. The mere grounding of a outter invited retribution.

hiss Dibnah is playing in only her third professional tournament, having delayed her transfer to the paid ranks out of loyalty to her country and her state, Queensland. She had been, she says, "scared stiff" on her first appearance, in the European Open at The Belfry.

SHOW JUMPING

Skelton leads the assault on Everest By Jenny MacArthur

Nick Skelton, the winner of last year's Everest Double Glazing Championship, heads a powerful contingent of riders from the sponsor's own stable competing at the three-day Everest meeting, which starts today at the Park Farm Equestrian Centre in Norwood. The meeting now in its fourteenth year, is traditionally used by nders to warm up for the Horse of the year Show the following week, although, with £22,000 prize money

at stake, the competition at Park Form is no less fierce.

Skelton, who has returned recently from a successful European trip, rides Apollo and St James in Thursday's championship. Liz Edgar partners Everest Forever, and Geoff Lucker, who joined the Edgars' yard in November, rides Soft Touch and Arabesque. The latter was bought by Ted Edgar from Arabid Winsher the 1956 1956 1956 Astrid Winklet, the wife of the 1956 Olympic gold medal winner, Hans

day of the meeting.
A new face at this show is that of the Edgars' 13-year-old daughter, Marie has qualified for the young riders' class. According to her father, Marie was "hopeless on ponies" but

Winkler, last summer and gave Skellon a good win on the second

has progressed in leaps and bounds since graduating to horses.

David Broome and Malcolm Perah, who helped win the Nations Cup at Liege in Belgium earlier this month, are among the professional riders who have qualified for Thursday's championship, which £2.600 to the winner. They will have to contend with several top amateurs, including the Olympic team silver medal winners. John and Michael Whitaker and Steven

Michael Seely's selection: 3.30 Man in Grey.

Porchester relinquishes post

Lord Porchester, widely regarded as the inspiration behind the introduction of pattern racing in Britain, is to retire at the end of the year after 17 years as chairman of the Jockey Club's Flat race

He will be succeeded by Tim Holland-Martin, who was a member of the Jockey Club's race planning committee for four years from 1978 and has been a member of the Flat race pattern committee since 1980. The new members of the Flat race pattern committee for 1985 will include Peter Willett, Andrew Wates and

Leicester

from four possible runners, Henry Cecil has decided to run Vertige (above) in Saturday's Royal Lodge Stakes at Ascot, a race he has won twice in the last five years. Cecil's other entries are Royal Coach, who had originally been spoken Khozaam, trained by Peter Walwyn, will be of as the stable representative, Llanfranco and attempting to consolidate his position as a long-Pacific Mail, but a spokesman said yesterday that Vertige would be the stable's only runner and that Steve Canthen would ride.

Fabré and **Fustok** to part company

31

From Desmood Stoneham,

André Fabré will cease to train for his main patron, Mahmoud Fustok, at the end of the season. The 3S-year-old Frenchman was asked to become private trainer to Fustok but he declined the offer to remain faithful to his other owners. Yesterday, at Maisons-Laffitte, Fabre said: "It was a very difficult decision to make but I have other very loyal owners to think of and Mr Fustok and I have parted on the

Mr Fustok and I have parted on the very best of terms."

Fabre has trained 17 group race winners this season and the Fustok horses have enjoyed their fair share of success. In April, Siberian Express won the Poule d'Essai des Poulains (French 2,000 Guineas) and in June, Crystal Glitters took the Prix d'Isoaphan for the secund the Prix d'Ispahan for the second consecutive year.

consecutive year.

Fabre has also trained Magwal to win the Prix Jean Prat and Grand Prix d'Evry for Fustok, Even without the Fustok horses, the Frenchman will still have 160 animals under his care.

Proskona, trained by François Boulin was an acts a number of

Proskona, trained by Franco's Boutin, was an easy winner of vesterday's Prix de Saint-ct-Osie at Maisons-Laffitte where the ground was extremely holding. The neat daughter of Mr Prospector feat Parioti by five lengths with Forzando a neck away third.

Forzando made some late progress but had to pull out all the stops to hold third place from Robert Sangater's L'Orangerie.

Smarten Up's rare feat

Greville Starkey passed his haifcentury for the season with a double on La Tuerta and Brightner at Bath yesterday. However, he had to share the honours with an elderly broodmare called Smarten Up, whose feat was much more rare— she bred both the winners that put Starbur on the 51 mark.

Starkey on the 51 mark.

Smarten Up was a very good sprinter and her mating with Sparkler should have produced another tast horse. However, Brightner huntped 9st 7th in the Sherston Stakes and was never Shersion Stakes and was never headed throughout the one mile and five furlongs and crossed the line with his 12 rivals struggling a long way in his wake.

Starkey, who had been looking round over one shoulder then the other with two furlongs still to go, reported to the assistant trainer. Geoff Lawson, that the further Brightner goes, the better he is.

TENNIS

Mottram emerges from the shadows

By Rex Bellamy Tennis Correspondent

Chris Bradnam and Buster final, have been seeded to lose in the quarter-finals of the men's singles in the Refuge Assurance national championships to be played at Telford from October 1 to 7 Bradnam was leading 3-1 in the 1983 final when Motiram retired because of a painfully inflamed

Mottram has much to prove partly because of that retirement, partly because his withdrawal from the grand prin circuit has raised doubts about his present competidoubts about his present competi-tive level, and partly because he has been dropped from Britain's Davis Cup team. But Mottram was Britain's No 1 from 1978 to 1983, had a more consistently successful Davis Cup career than any British player since Fred Perry, and is still on the lively side of 30.

year's championships because of a damaged forearm, has been seeded to beat Colin Dowdeswell in the final. The seedings suggested that the pairings in the last eight will be Lloyd (1) v Bradnam (8). Stephen Shaw (3) v Jeremy Bates (5), Mottram (6) v Jonathan Smith (4), and Stuart Bale (7) v Dowdeswell

Jo Durie has been seeded to beat Jo Durie has been seeded to beat Anne Hobbs in the women's final. Last year Miss Hobbs, who was serving for a 4-1 lead in the third set, was beaten by Virgin Wade in a semi-final that, according to the seedings, should happen again next week. Miss Durie will be spared another challenge from Sue Barker, who, like Miss, Hobbs, was serving for a 4-1 lead in the third set of a semi-final, Miss Barker is nursing semi-final. Miss Barker is nursing an injury and will complete only in

The seedings predict the following quarter-finals: Miss Durie (1) v Fina Einy (7), Annabel Croft (3) v Amanda Brown (5), Sara Gomer (8) Miss Wade (4) and Julie Salmon
 (a) v Miss Hobbs (2). If it comes to passs, the first of those matches will have unusual features. For one thing Miss Durie is nine inches the taller. For another she and Miss Etny have the same coach and, consquently, have spent a lot of time together on the practice court. Their coach, Alan longs, must, somethow, solve, the Jones, must somehow solve the problem of dividend loyalties. He is rumoured to be making provisonal arrangements to play golf on the day of the quarter-finals.

McEnroe adds to his record

John McEnroe, the top seed, survived lapses of concentration to beat his fellow American, Brad Gilbert, 6-4, 6-4, in the final of the Transamerican grand prix tourna ment, in San Francisco, yesterday.
In winning his twelfth tourn ment this year. McEnroe took his carnings this season to \$1.2m.

During the championship McEnree criticized the amount of money being carned by women tennis players. "They are a zillion levels helow us in ability and they don't play five-set matches."

One person unlikely to agree is

Martina Navratilova, who needed only 38 minutes to best the 17-yearold American Michelle Torres, 6-1, 6-0, in the final of Virginia Slims tournament, in Fort Lauderdale or Sunday, to take her winnings for the year to more than \$2m.

• LEL AVIV: Israel were yesterday continuing their efforts to obtain five of the visas they require for the three-day Davis Cup European zone group "A" final which starts in the Soviet Union on Saturday (AFP reports).

ICE SKATING

First steps towards Calgary

By Dennis Bird

In the first important event of the new season, 43 skaters from 13 new season. 43 skaters from 13 countries are this week competing in the three day St Ivel international at Richmond Ice Rink. There are events in all four disciplines: men's and women's singles, pair skating and tee dancing. The compulsory figure skating starts at 7.30 this morning and the competition ends with figure dancing and men's from with free dancing and men's free skating on Thursday evening.

Skating runs in a four-year cycle, culminating in the Winter Olympic Games, after which most of the rames, after which most of the leading contenders retire or turn professional. Most of the skaters at Richmond therefore belong to a new generation whose eyes are on the 1988 Games in Calgary.

Some of the competitors' names are already familiar. There is, for example, the United States Pacific Coast men's champion. Brian Boitano, fifth in the Sarajevo Games and a likely medal winner in the world championships in Tokyonevi March. At Richmond the 20 vear-old Californian meets chal-lengers from Canada. Poland Britain, East and West Germany, as well as the world junior champion Victor Petrenko, from Odessa, ages 15. The two home representatives -

hoth from Blackpool - are Paul Robinson, who was in the last Olympics, and Stephen Pickavance. The women's singles entry includes the former world junior champion Simone Koch (East should also have a chance. They are Susan Jackson, ranked twelfth in the world, and her predecessor as British champion, Karen Wood. From across the Atlantic comes Kathryn Adams (United States) and Cynthia Coull, from Canada - a rairs skater of world class who is also a good solo competitor. Russian. Yugoslav. Swiss and West German girls complete the entry.

There are only four pairs - one each from Russia, Canada, the United States and a brother and sister from Billingham. Neil and Lisz Cushley.

The ice dance event could well go to Canada. The British holders, Nicholas Slater and Karen Barber, are not defending, and in their absence Robert McCall of Nova Scotia and Tracy Wilson from Vancouver, look likely successors.

Legal Appointments

Assistant Solicitor

Property Department

A young solicitor with up to two years' post-admission experience is sought for this firm's busy Property Department. The Department handles a wide ranging and expanding caseload of demanding property work.

Applications, together with full CV should be sent to:

LEGAL ADVISER

PLUS COMPANY CAR-

The present Head of the Legal Department, Mrs Margaret Rudge, is retiring in March 1985. Applications for the post are invited from solicitors or barristers with at least ten years' experience preferably in commerce or industry. The work of the Department is very varied and covers, in particular trusts, company. commercial, employment and consumer protection law, some conveyancing and crime. conveyancing and crime.
The John Lewis Partnership is a growing retail business of nearly 30,000 employees, with 21 department stories, over 70 supermarkets and a number of production units. Annual sales exceed £1,000 million. The Partnership is established by Trust and conducted on unique co-operative principles.

co-operative principles.

The Head of the Department is responsible to the Chairman. There are two qualified senior legal assistants in the Department, which is situated in Oxford Street.

Pay will be not less than \$30,000 per annum and will take account of experience. Other benefits include a company car, a non-contributory pension scheme and shopping discount in our Department Stores and Weitrose supermarkets. After provision for the future development of the business the whole of the profit is shared among those who work in the business. Enquiries should be sent with trief personal details to: Director of Personnel John Lewis Partnership 4 Old Cavendish Street London WIA 1EX.

John Lewis Partnership

Commercial Advisor (Contracts)

London

c.£22,000

Local Communications Services is the largest division of the new British Telecom p.i.c., concerned with the marketing of telecommunications and computing products throughout the U.K. With the onset of privatisation, the devising and deployment of commercial contracts have assumed paramount importance, creating the need for this key appointment within the Marketing Department.

In essence the brief will be to develop and interpret a contractual framework which is internally consistent and meets legal requirements, while allowing the freedom of manoeuvre necessary to meet variable market requirements. Having established a central structure, the Commercial Adviser will help each district contracts function to operate according to local commercial conditions.

Successful performance in the role will demand previous contracts experience, gained in a commercial department within a medium to large organisation. A legal qualification is preferred but whatever their educational background, candidates must have a marketing rather than narrowly legalistic perspective. Personal qualities must include the ability to communicate effectively at all levels.

Applications please, quoting Ref. 106/1ST, to S. C. Mackey, Charles Barker Management Selection International Ltd., 30 Farringdon Street, London EC4A 4EA Telephone 01-634 1142

CHOICE

 Four years ago, I enthusiastically recommended Geoffrey Haydon's film about the seasonal faces of the Fens, A SENSE OF PLACE. Why it has taken the BBC four years to decide to show it again, I cannot imagine. But here it comes at last imagine. But here it comes at last (BBC1, 2.00pm), and if you missed it the first time around, you are in for a treat, it has no commentary. Does a rainbow need words? Or a sunset? Or a snowfall on Christmas Eve? Until Man finds images to surpass Nature's, he had better keep quiet, as Mr Haydon's little gem of a film does.

Radio 4

Barry Hines's appailing nuclear war film Timeads, screened last Sunday night, was ambitiously realized in terms of actors and

resources. But, with only two characters and a single setting, Raymond Briggs's WHEN THE WIND BLOWS affected me much more profoundly when it was broadcast on BBC Radio last year.

That same production, memorably co-starring Brenda Bruce and Peter Sallis as the doomed couple, is now available as one of the BBC's Plays on Tape (ZCF499). Other cassettes in the BBC's enterprising venture include Gielgud in Alan Bennett's Forty Years On; Robert Powell and Dinsdale Landen as Holmes and Watson in A Study in Scarlet, a double-bill of Giles Cooper comedies, Under the Loofah Tree,

Dissolution of Dominic Boot.

and The Disagreeable Oyster, and a Tom Stoppard double-bill, The Dog it Was that Died, and The

Undaunted bishop resumes offensive

Continued from page 1

in to violence. But I am equally clear that we must understand why ordinary, decent, family-centred working men get involved in violence.

"The God who is revealed in Jesus Christ is in favour of people, and a leader of the Church of Christ has to take the risk of getting involved in actual disputes for the sake of people and the future of our society, 1 cannot claim to be right in detailed practical suggestions, but I do claim to be asking some of the right questions in the name of God, and I shall continue to make specific but contentious points because we have to get down to practical actions and real hope."

After the issuing of the statement yesterday morning, the new bishop showed that he was just as adept as both sides involved in the coal dispute at organizing the media to exact full dissemination of their

views. First television and radio crews were invited to question the bishop in the rose garden of the official residence. Half an hour later, newspaper journalists and photographers were invited into the library where Bishop Jenkins was seated beside the fire with his wife, Molly, and their daughter, Rebecca, watching from nearby

Bishop Jenkins was asked about his attitude towards iolence on the picket line on a day when police clashed with 5,000 striking miners in a violent confrontation outside Maltby Colliery in South Yorkshire. He again con-demned violence but said it was necessary to understand why decent men were driven to it. "The first reason is a feeling of real desperation. There is a

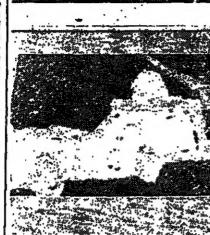

in some mining communities and then you feel you must rush Bishop Jenkins attacked the liscal policies of Mrs Thatcher

dreadful feeling of helplessness

and her Cabinet. In his letter to the bishop vesterday, Mr Walker went to the defence of Mr MacGregor and, in effect, told the bishop that he had made a wrong

judgment of the man. In part, the letter said: "If I had considered that Mr Mac-Gregor was a man who had either been instructed or personally was intent on destroying the mining industry or that he was contemptuous of miners or their communities. I would, of course, have dismissed him

Children's art goes on show

Ian Macdonald, aged five, with his painting entitled Police Car and Emma O'Donaghue, aged six, with "The Machine is Making Bread", both of Mulgrave Infants School, Woolwich, south London, two of the exhibitors in the Cadbury's National Exhibition of Children's Art which opens today at the Mail Galleries, London, where it remains until October 13. The 800 exhibits will then travel to Leeds, Aberdeen. Bristol, Norwich and Welver-

hampton, finishing in Bolton

not be officially known until Friday but indications of voting patterns show a determination by the traditionally moderate members of the union to take industrial action.

However, Coalboard officials are optimistic that any vote for strike action - which has to be agreed by a 66 per cent majority of the union's 17,000 members will be used as a bargaining counter in the argument over payment of supervisors who refuse to cross NUM picket lines. be enough coal to supply power strike which would close down production of coal in areas where dissident NUM members

Last night's talks at Congress House came on the eve of a High Court action brought by two Yorkshire miners who are seeking a ruling that the NUM should hold a national ballot on whether or not the strike should be continued. That action could supported yesterday by Mr Eric Hammond, leaders of the Electrical Electronic Telecomplay a crucial role in the future direction of the strike

Leaders of the NUM have already said that they will hamshire miners continued ignore any High Court rulings working normally there would on the strike

Constructive negotiations proposed by Reagan

Continued from page 1 minute address was directed at the left-wing Government in Nicaragua, which he urged to abandon its policy of subversion and militarism. Mr Reagan said that although

differences would remain between the US and the Soviet Union There is not a great distance between us . . . there is every reason why we should do all that is possible to shorten that distance. That is why we

are here."

Referring to his proposal for regular ministerial and Cabinetlevel meeting he said it was necessary to extend the arms control process, to build a bigger umbrella under which it can operate".

If progress was temporarily

halted in one set of talks, this newly-established framework for arms control could take up the slack at other negotiations. he said.

One idea for discussion would be a proposal for US and Soviet experts to visit each other's nuclear test sites to measure the yields of nuclear tests. Mr Reagan hoped they could have such arrangements in place by next spring.

Other subjects for discussion could include the exchange of

outlines of five-year military plans for weapons development and procurement and the exchange of observers at mili-

tary exercises.

The President also noted the recent progress that had been made on a number of bilateral matters, such as improving the hotline between Washington and Moscow, extending economic and consular accords and

ome and consular accords and increasing American grain sales to the Soviet Union.

He was less forthcoming about the possibility of a summit between himself and President Chemenko.

He retierated his well-known position that such a meeting.

position that such a meeting should be well prepared and have a reasonable chance of success. Officials said, however, that the United States would consider holding an early summit if the Soviet Union proposed one.

The President said he was

committed to redoubling efforts to negotiate reductions of conventional weapons. The United States would continue to work for a complete ban on chemical weapons and for "real reduction - to lower and equal levels" in the Vienna talks on mutual and balanced force reductions. Letter from Hyderabad

Sacrifice to the god of communal rift

Nearly 30 people have been killed and several hundred injured in clashes between Hindus and Muslims in the south Indian city of Hyderabad. The clashes and the accompanying curiews have continued virtually every day since a Hindu procession would through town. Michael Hamlyn, our South Asia correspondent rode in the procession.

perhaps halfway along the Muslims too. long narrow route through the Immediate passed St George's Church and were heading for the post office. The bright yellow lorry was decorated with saffron flags and palm leaves. In the back was an 11ft high statue of Ganesh, the elephant-headed son of Lord Shiva and god of leaves with saffron The lorry gathered speed, son of Lord Shiva and god of The lorry gathered speed, plenty with gargantuan appetite. His hands, all six of them, his trunk and his age to the foreign observer quickles.

green lunghi.

Devotees of the god packed into the lorry, which had set well heeled businessman's slum dwellers. suburb of Gyanbagh colony. No one sta They were saffron coloured seemed to kr fore-and-aft-caps whose white version is more usually sported by Congress Party members, and threw coloured powder at each other, at passers-by, at me and at other devotees in other lorries along

the way.

Everybody rapidly became covered in multi-coloured smears of red, and yellow, and green and purple, but mostly

This day there were several thousand such lorries - the organizers said there were 10,000 images of Ganesh in the procession - and there were as many as two million. Hindu devotees celebrating the birth of their god by this madcap procession seven miles through the town centre. past the densely packed Muslim shops and houses in

the old city.

Loud hailers shrieked deafcoud hailers shrieked dear-ening songs. Men with micro-phones whipped up the crowd with shouts of "Hindu, Hindu, bhai-bhai" - "All Hindus are brothers" - and "Gau hatya, bund karo" - "Cow slaughter, stop it now." Ragged drum-mers kept up an insistent racket.

"We make this procession every year, "said my com-panion on the roof of the cab. Mr. Prasan Bhandari, a smooth enough young businessman from a finance company. "The idea is to demonstrate Hindu unity: for Hindus all over the country worship Lord Ganesh , .. yes.

The lorry I was riding on was the idea is to intimidate the

Immediately there was the centre of town when the sound of smashing glass. A fighting began. We had just knot of saffron-capped young passed St George's Church men armed with latis started

his trunk and his ears were from the scene. But as we bright pink. His skin was a slowed down again and came silvery yellow. He wore a close to the object of the pilgrimage, a huge tank or artificial lake in the centre of town, smoke rose black and out that morning from the thick from an encampment of

No one standing around seemed to know what his crime had been, but a knot of Muslim families, among the Mustim families, among the poorest of the poor, stood helplessly by while saffron caps bobbed around one man's home which was blazing fiercely. What little the man had was devoured by the fames of communications. flames of communal intoler-

Now, as the smoke from the shanty rose into the sky smoke from other pyres elesewhere in the city rose to join it. The joy of smashing Muislim glass became something of a free for all, and jewellers and shops with loot that was possible to carry away were broken open and put to the torch.

By mid-afternoon when a curfew was imposed and the town returned to quiet once more more than 100 shops had been burned. Eleven people died as a result of the fighting and in police fire on rioters. More than 100 were

Hyderabad has developed history of friction between the two communities. After very slight provocation men with knives and torches will burn and kill in each other's areas Several people died in riots earlier this year. The city's population is about 40 per cent Muslim.

When they appeared likely to win a majority of seats on the city council the town was linked in a joint adminis-tration with neighbouring Secunderabad to restore the

Migrating geese

Wildlife experts are appealing to members of the public to help them with their scientific study into the migratory patiern of Barnacle Geese. Thousands of these endangered geesc are expected to fly to their wintering ground at Caerlave-rock in Solway Firth. Any sightings of large flocks of black and white geeese over Britain in the next few days, especially over the East Coast, should be reported to the Wild Fowl Trust at Slimbridge, Gloucester-

Times Porticilo rules are as follows:

1 Times Porticilo is free. Punchase of The
Times is not a condition of taking part.

2 Times Porticilo list comprises a group of
public companies whose shares are lated on
The Stock Exchange and quoted in The Times
Stock Exchange priors page. The companies
comprising that last will change from day to
day. The first is divided into four groups of ten
stares (1-10, 11-20, 21-30 and 31-40) and
every Porticilo card contains two numbers
from sach group. Central) and 7 (Walsall); no entry from Salford Circus: junction 7 southbound entry closed 7-10am weekdays; junction 4 northbound entry closed 7.30-9am. M6c Contraf-

starce (1-10, 11-20, 21-30 and 31-40) and every Portolio card contains the numbers from each group.

3 Times Portolio "dividend" will be the figure in pence which represents the optimum remembers in prices (i.e., largest increase or conest lead of a combination of reight five from each group) of the 40 shares which on any day, comprise the Times Portiolio list.

4 The daily dividend will be surrounced each card and the receity devicted and be announced each satisfag in The Times.

5 Times Portiolio list and devials of the daily or weekly dividend will also be available for inspection at the offices of The Times.

6 If the overall pints incompress of more than one combination of starce equals the dividend, the groze will be equally divided among the cleanants holding those combinations of shares.

celements inciding these combinations of shared. Claims are subject to scrutiny before payment. Any Tenes Porticilo card that is detaced, tempered with or incorrectly printed in any way will be declared void.

8 Employees of News international pic and its subsidiaries and of Europrint Group Limited (producers and distributions of the sard) or members of their immediate tendeds are not atowed in play Times Portición.

9 All pericipants will be subject to these fulles. All instructions on "how to play" and "how to claim" whether published in The Tropes or in Times Pericipo Cards will be gested to be part of these Rules.

10 In any dispute. The Editor's decision is final and no correspondence will be entained into. nto. 11 -ti for any reason The Times Prices Page is not published in the normal way Times Portiolio will be suspended for that day.

How to play - Daily Divident On each day your unique set of eight numbers war represent connercest and moustrief shares published in The Times Portfolio let which wall appear on the Stock Euchange Prices page

in the columns provided night to your characters the price change (4-or -), in prince, as published in that day's Times.

After lessing the price changes of your eight chance for thet tay, add up all eight share changes to give you your overall total plus or minus (4-or -).

Check your overall total against The Times Portiols dividend published on the Slock Exchange Prices page.

If your overall total mulches The Times Portiols dividend you have won outright or a share of the total prize money stated for that charge and must dean your prize as majoruted.

total.

Add these logether to determine your weekly Portfolio total.

If your total matches the published weekly chidend figure you have won outfort or a share of the price money stated for that week, and must claim your price as instructed below.

How to claim
Telephone The Times Porticile claims line
0256-53272 between 10.00 am and 2.30 pm,
on the day your overall total neatches. The
Times Porticile Dividend. No claims can be
accepted outside these hoors.
You must have your card with you when you
telephone.

Tool maps many your trophores comeons also biologhous.

If you are unable to talephores comeons also can clear on your behalf but they shust have your eard and call The Times Portfolio claims-line between the eliptated fames.

No responsibility can be accepted for feiture to contact the claims office for any reason within the stated house.

The above instructions are applicable to both dely and weekly dividend claims.

Seem Times Particulo cards include paper Some Times Particlio cards lactude mino misprints in the instructions on the revers side. These cards are not invalidated. The wording of Rules 2 and 3 has been expended from earlier versions for derification purposes. The Game-Issell is not affected and will organize to be played in exactly the same very as believe.

Ruiss will appear again in Friday's paper
